59-inch 6-Series Velocity Adjustable Double-Sided Breath Guard for 4-Pan/Well 4-Series Front-of-House Serving System with 120-Volt Heat Strip with Led Lighting

Easy to use and incredibly reliable, the Vollrath 6-Series Velocity double-sided breath guard is a versatile addition to your serving area. Designed for your 4-pan/well 4-Series front-of-house serving system, this durable breath guard is made of tempered glass panels and stainless steel tubing, promising years of reliable service. With eight pre-set positions, this breath guard offers both versatility and consistency, and the simple adjustment mechanism allows one person to make adjustments quickly and easily. The LED lights improve visibility, the heat strip helps maintain serving temperatures and the reliable design keeps your food safe from contaminants while adding a sleek appearance to any double-sided buffet.

- Simple push-button mechanism enables single-person adjustment
- Eight pre-set positions accommodate NSF, full-serve, self-serve and cleaning position and ensure consistent spacing across multiple units
- Visual indication shows when breath guard is in NSF position and eliminates need for measuring
- Standard above-counter flange mount (below-counter mount available)
- Ships knocked down (assembled shipment available)
- Stainless steel construction means no plastic parts to break and gives all components a consistent aesthetic
- 11-gauge stainless steel tubing eliminates the need for center support that penetrates the counter/interferes with service
- Comes standard with 3/8-inch-thick tempered glass panels (1/2-inch-thick available)
- Welded mitered joints increase structural integrity
- LED light strip improves product visibility
- Heat strip helps maintain serving temperatures
- Heat and light strips require hardwiring

73 ½-inch 6-Series Velocity Adjustable Cafeteria-Style Breath Guard for 5-Pan/Well Drop-Ins

Versatile, reliable and convenient, the Vollrath 6-Series Velocity cafeteria-style breath guard is sure to exceed your expectations. Designed for your 5-pan/well drop-ins, this breath guard is constructed of tempered glass panels and stainless steel tubing to ensure excellent visibility and strength. This breath guard features eight pre-set positions, promising versatility and consistency, and the simple adjustment mechanism allows one person to make adjustments quickly and easily. The reliable, sleek design keeps your food safe and adds an elegant appearance to any serving area.

- Simple push-button mechanism enables single-person adjustment
- Eight pre-set positions accommodate NSF, full-serve, self-serve and cleaning position and ensure consistent spacing across multiple units
- Visual indication shows when breath guard is in NSF position and eliminates need for measuring
- Standard above-counter flange mount (below-counter mount available)
- Ships knocked down (assembled shipment available)
- Stainless steel construction means no plastic parts to break and gives all components a consistent aesthetic
- 11-gauge stainless steel tubing eliminates the need for center support that penetrates the counter/interferes with service
- Comes standard with 3/8-inch-thick tempered glass panels (1/2-inch-thick available)
- Welded mitered joints increase structural integrity

87-inch 6-Series Velocity Adjustable Cafeteria-Style Breath Guard for 6-Pan/Well 4-Series Front-of-House Serving System with 120-Volt Heat Strip with Led Lighting

The Vollrath 6-Series Velocity cafeteria-style breath guard is sleek, easy to use and impressively effective. This breath guard is designed for your 6-pan/well 4-Series front-of-house serving system and is constructed of tempered glass panels and stainless steel tubing to ensure excellent visibility and strength. Designed with eight pre-set positions that promise versatility and consistency, this breath guard features a simple adjustment mechanism that allows one person to make adjustments quickly and easily. The LED lights improve visibility, the heat strip helps maintain serving temperatures and the reliable, sleek design keeps your food safe while adding an elegant appearance to any serving area.

- Simple push-button mechanism enables single-person adjustment
- Eight pre-set positions accommodate NSF, full-serve, self-serve and cleaning position and ensure consistent spacing across multiple units
- Visual indication shows when breath guard is in NSF position and eliminates need for measuring
- Standard above-counter flange mount (below-counter mount available)
- Ships knocked down (assembled shipment available)
- Stainless steel construction means no plastic parts to break and gives all components a consistent aesthetic
- 11-gauge stainless steel tubing eliminates the need for center support that penetrates the counter/interferes with service
- Comes standard with 3/8-inch-thick tempered glass panels (1/2-inch-thick available)
- Welded mitered joints increase structural integrity
- LED light strip improves product visibility
- Heat strip helps maintain serving temperatures
- Heat and light strips require hardwiring

34 ½-inch 6-Series Velocity Adjustable Cafeteria-Style Breath Guard for 2-Pan/Well Drop-Ins with 120-Volt Heat Strip

Designed with both protection and presentation in mind, the Vollrath 6-Series Velocity cafeteria-style breath guard is perfect for your 2-pan/well drop-ins. With tempered glass panels and stainless steel tubing, the solid construction ensures excellent visibility and strength. This breath guard features eight pre-set positions, promising versatility and consistency, and the simple adjustment mechanism allows one person to make adjustments quickly and easily. The heat strip maintains serving temperatures while the reliable, sleek design keeps your food safe and adds an elegant appearance to any serving area.

- Simple push-button mechanism enables single-person adjustment
- Eight pre-set positions accommodate NSF, full-serve, self-serve and cleaning position and ensure consistent spacing across multiple units
- Visual indication shows when breath guard is in NSF position and eliminates need for measuring
- Standard above-counter flange mount (below-counter mount available)
- Ships knocked down (assembled shipment available)
- Stainless steel construction means no plastic parts to break and gives all components a consistent aesthetic
- 11-gauge stainless steel tubing eliminates the need for center support that penetrates the counter/interferes with service
- Comes standard with 3/8-inch-thick tempered glass panels (1/2-inch-thick available)
- Welded mitered joints increase structural integrity
- Heat strip helps maintain serving temperatures and requires hardwiring

- Simple push-button mechanism enables single-person adjustment
- Eight pre-set positions accommodate NSF, full-serve, self-serve and cleaning position and ensure consistent spacing across multiple units
- Visual indication shows when breath guard is in NSF position and eliminates need for measuring
- Standard above-counter flange mount (below-counter mount available)
- Ships knocked down (assembled shipment available)
- Stainless steel construction means no plastic parts to break and gives all components a consistent aesthetic
- 11-gauge stainless steel tubing eliminates the need for center support that penetrates the counter/interferes with service
- Comes standard with 3/8-inch-thick tempered glass panels (1/2-inch-thick available)
- Welded mitered joints increase structural integrity
- Heat strip helps maintain serving temperatures and requires hardwiring

60 ¼-inch 6-Series Velocity Adjustable Double-Sided Breath Guard for 4-Pan/Well Drop-Ins with 120-Volt Led Light Strip

Easy to use and incredibly reliable, the Vollrath 6-Series Velocity double-sided breath guard is a versatile addition to your serving area. Designed for your 4-pan/well drop-ins, this durable breath guard is made of tempered glass panels and stainless steel tubing, promising years of reliable service. With eight pre-set positions, this breath guard offers both versatility and consistency, and the simple adjustment mechanism allows one person to make adjustments quickly and easily. The LED light strip improves visibility while the reliable design keeps your food safe from contaminants and adds a sleek appearance to any double-sided buffet.

- Simple push-button mechanism enables single-person adjustment
- Eight pre-set positions accommodate NSF, full-serve, self-serve and cleaning position and ensure consistent spacing across multiple units
- Visual indication shows when breath guard is in NSF position and eliminates need for measuring
- Standard above-counter flange mount (below-counter mount available)
- Ships knocked down (assembled shipment available)
- Stainless steel construction means no plastic parts to break and gives all components a consistent aesthetic
- 11-gauge stainless steel tubing eliminates the need for center support that penetrates the counter/interferes with service
- Comes standard with 3/8-inch-thick tempered glass panels (1/2-inch-thick available)
- Welded mitered joints increase structural integrity
- LED light strip improves product visibility and requires hardwiring

31-inch 6-Series Velocity Adjustable Single-Sided Breath Guard for 2-Pan/Well 4-Series Front-of-House Serving System with 120-Volt Led Light Strip

Shield your food from dust, germs and other contaminants with the Vollrath 6-Series Velocity single-sided breath guard. Designed for your 2-pan/well 4-Series front-of-house serving system, this breath guard is convenient, easy to use and sleekly designed. The durable tempered glass panels provide a clear view of food items and the stainless steel tubing promises years of service. With eight pre-set positions, this breath guard offers both versatility and consistency, and the simple adjustment mechanism allows one person to make adjustments quickly and easily. The LED light strip improves visibility while the reliable design keeps your food safe and adds a sleek appearance to any single-sided buffet.

- Simple push-button mechanism enables single-person adjustment
- Eight pre-set positions accommodate NSF, full-serve, self-serve and cleaning position and ensure consistent spacing across multiple units
- Visual indication shows when breath guard is in NSF position and eliminates need for measuring
- Standard above-counter flange mount (below-counter mount available)
- Ships knocked down (assembled shipment available)
- Stainless steel construction means no plastic parts to break and gives all components a consistent aesthetic
- 11-gauge stainless steel tubing eliminates the need for center support that penetrates the counter/interferes with service
- Comes standard with 3/8-inch-thick tempered glass panels (1/2-inch-thick available)
- Welded mitered joints increase structural integrity
- LED light strip improves product visibility and requires hardwiring

47-inch 6-Series Velocity Adjustable Double-Sided Breath Guard for 3-Pan/Well Drop-Ins with 120-Volt Heat Strip

Prevent contamination while providing excellent visibility with the Vollrath 6-Series Velocity double-sided breath guard. Designed for your 3-pan/well drop-ins, this durable breath guard is made of tempered glass panels and stainless steel tubing, promising years of reliable service. With eight pre-set positions, this breath guard offers both versatility and consistency, and the simple adjustment mechanism allows one person to make adjustments quickly and easily. The heat strip maintains serving temperatures while the reliable design keeps your food safe from contaminants and adds a sleek appearance to any double-sided buffet.

- Simple push-button mechanism enables single-person adjustment
- Eight pre-set positions accommodate NSF, full-serve, self-serve and cleaning position and ensure consistent spacing across multiple units
- Visual indication shows when breath guard is in NSF position and eliminates need for measuring
- Standard above-counter flange mount (below-counter mount available)
- Ships knocked down (assembled shipment available)
- Stainless steel construction means no plastic parts to break and gives all components a consistent aesthetic
- 11-gauge stainless steel tubing eliminates the need for center support that penetrates the counter/interferes with service
- Comes standard with 3/8-inch-thick tempered glass panels (1/2-inch-thick available)
- Welded mitered joints increase structural integrity
- Heat strip helps maintain serving temperatures and requires hardwiring

73-inch 6-Series Velocity Adjustable Single-Sided Breath Guard for 5-Pan/Well 4-Series Front-of-House Serving System with 120-Volt Heat Strip with Led Lighting

Maximize visibility without sacrificing protection with the Vollrath 6-Series Velocity single-sided breath guard. Designed for your 5-pan/well 4-Series front-of-house serving system, this breath guard prevents contamination, creates an elegant, streamlined appearance and is impressively easy to use. The durable tempered glass panels provide a clear view of food items and the stainless steel tubing promises years of service. With eight pre-set positions, this breath guard offers both versatility and consistency, and the simple adjustment mechanism allows one person to make adjustments quickly and easily. The LED lights improve visibility, the heat strip helps maintain serving temperatures and the reliable design keeps your food safe and adds a sleek appearance to any single-sided buffet.

- Simple push-button mechanism enables single-person adjustment
- Eight pre-set positions accommodate NSF, full-serve, self-serve and cleaning position and ensure consistent spacing across multiple units
- Visual indication shows when breath guard is in NSF position and eliminates need for measuring
- Standard above-counter flange mount (below-counter mount available)
- Ships knocked down (assembled shipment available)
- Stainless steel construction means no plastic parts to break and gives all components a consistent aesthetic
- 11-gauge stainless steel tubing eliminates the need for center support that penetrates the counter/interferes with service
- Comes standard with 3/8-inch-thick tempered glass panels (1/2-inch-thick available)
- Welded mitered joints increase structural integrity
- LED light strip improves product visibility
- Heat strip helps maintain serving temperatures
- Heat and light strips require hardwiring

73-inch 6-Series Velocity Adjustable Single-Sided Breath Guard for 5-Pan/Well 4-Series Front-of-House Serving System

Maximize visibility without sacrificing protection with the Vollrath 6-Series Velocity single-sided breath guard. Designed for your 5-pan/well 4-Series front-of-house serving system, this breath guard prevents contamination, creates an elegant, streamlined appearance and is impressively easy to use. The durable tempered glass panels provide a clear view of food items and the stainless steel tubing promises years of service. With eight pre-set positions, this breath guard offers both versatility and consistency, and the simple adjustment mechanism allows one person to make adjustments quickly and easily. The reliable design keeps your food safe and adds a sleek appearance to any single-sided buffet.

- Simple push-button mechanism enables single-person adjustment
- Eight pre-set positions accommodate NSF, full-serve, self-serve and cleaning position and ensure consistent spacing across multiple units
- Visual indication shows when breath guard is in NSF position and eliminates need for measuring
- Standard above-counter flange mount (below-counter mount available)
- Ships knocked down (assembled shipment available)
- Stainless steel construction means no plastic parts to break and gives all components a consistent aesthetic
- 11-gauge stainless steel tubing eliminates the need for center support that penetrates the counter/interferes with service
- Comes standard with 3/8-inch-thick tempered glass panels (1/2-inch-thick available)
- Welded mitered joints increase structural integrity

73-inch traditional NSF-style breath guard for five-well 4-Series unit or drop-in well with stainless steel countertop

The traditional NSF-style breath guard by Vollrath offers superior safety and a classic presentation. The 1 1/2-inch extruded aluminum frame is strong and lightweight, while the 3/8-inch tempered glass is secured in a tight-fitting channel for a continuous, clean line from the framework to the glass. The traditional NSF-certified design does an excellent job protecting your food items from dust, germs and other contaminants, so it offers incredible peace of mind. This breath guard can be mounted to any five-well Signature Server® unit or drop-in wells with stainless steel countertops.

- 1 1/2-inch extruded aluminum is strong and lightweight
- 1/4-inch tempered glass is secured in a tight-fitting channel for a continuous, clean line from the framework to the glass
- Traditional NSF-certified design offers exceptional protection from dust, germs and other contaminants
- Important: Specify 14-gauge stainless steel countertops and discuss mounting with Vollrath representative before ordering
- Please note this is a made-to-order item. These items require additional time for fulfillment. Made-to-order items cannot be changed, canceled or returned and may be subject to a minimum-order quantity. Contact your Vollrath sales representative for details.

60.25-inch standard contemporary double-sided buffet-style breath guard for four-well 4-Series unit, V-class base, or drop-in well with non-stainless steel countertop

The contemporary double-sided buffet-style breath guard by Vollrath offers superior safety and a sleek, streamlined appearance that enhances your presentation. The 1-inch tubular stainless steel frame is durable and long-lasting, while the 3/8-inch tempered glass with polished ends protects your food items from dust, germs and other contaminants. It’s food-safe and meets sanitation requirements, offering incredible peace of mind. This breath guard can be mounted to any four-well Signature Server® unit, V-class base, or drop-in wells with non-stainless steel countertops. It's shipped knocked down to reduce transportation costs, and the included instructions and mounting materials ensure easy assembly and installation.

- 1-inch stainless steel tubular frame is sleek, durable and long-lasting
- 3/8-inch tempered glass with polished ends protects food from dust, germs and other contaminants
- Food-safe and meets sanitation requirements for peace of mind
- Ships knocked down to reduce transportation costs
- Assembly and mounting materials and instructions are included for easy installation
- Please note this is a made-to-order item. These items require additional time for fulfillment. Made-to-order items cannot be changed, canceled or returned and may be subject to a minimum-order quantity. Contact your Vollrath sales representative for details.

86 3/4-inch standard contemporary cafeteria-style breath guard for six-well 4-Series unit, V-class base, or drop-in well with non-stainless steel countertop

The contemporary cafeteria-style breath guard by Vollrath offers superior safety and a sleek, streamlined appearance that enhances your presentation. The 1-inch tubular stainless steel frame is durable and long-lasting, while the 3/8-inch tempered glass with polished ends protects your food items from dust, germs and other contaminants. It’s food-safe and meets sanitation requirements, offering incredible peace of mind. This breath guard can be mounted to any six-well Signature Server® unit, V-class base, or drop-in wells with non-stainless steel countertops. It's shipped knocked down to reduce transportation costs, and the included instructions and mounting materials ensure easy assembly and installation.

- 1-inch stainless steel tubular frame is sleek, durable and long-lasting
- 3/8-inch tempered glass with polished ends protects food from dust, germs and other contaminants
- Food-safe and meets sanitation requirements for peace of mind
- Ships knocked down to reduce transportation costs
- Assembly and mounting materials and instructions are included for easy installation
- Please note this is a made-to-order item. These items require additional time for fulfillment. Made-to-order items cannot be changed, canceled or returned and may be subject to a minimum-order quantity. Contact your Vollrath sales representative for details.

73-inch standard contemporary single-sided buffet-style breath guard for five-well 4-Series unit, V-class base, or drop-in well with stainless steel countertop

The contemporary single-sided buffet-style breath guard by Vollrath offers superior safety and a sleek, streamlined appearance that enhances your presentation. The 1-inch tubular stainless steel frame is durable and long-lasting, while the 3/8-inch tempered glass with polished ends protects your food items from dust, germs and other contaminants. It’s food-safe and meets sanitation requirements, offering incredible peace of mind. This breath guard can be mounted to any five-well Signature Server® unit, V-class base, or drop-in wells with stainless steel countertops. It's shipped knocked down to reduce transportation costs, and the included instructions and mounting materials ensure easy assembly and installation.

- 1-inch stainless steel tubular frame is sleek, durable and long-lasting
- 3/8-inch tempered glass with polished ends protects food from dust, germs and other contaminants
- Food-safe and meets sanitation requirements for peace of mind
- Ships knocked down to reduce transportation costs
- Assembly and mounting materials and instructions are included for easy installation
- Important: Specify 14-gauge stainless steel countertops and discuss mounting with Vollrath representative before ordering
- Please note this is a made-to-order item. These items require additional time for fulfillment. Made-to-order items cannot be changed, canceled or returned and may be subject to a minimum-order quantity. Contact your Vollrath sales representative for details.

Standard Progressive Style Breath Guards

These breath guards can be used with Signature Server® and V-class bases, as well as drop-ins. They are available in Standard and NSF certified models. For more information and detailed dimensions, please reference our spec sheets.

- End frames constructed of 3/8" (1 cm) water-jet cut aluminum with extruded aliminum glass frames. Progressive Style breath guards are both light weight for easy installation and strong for long-term use
- 1/4" (6.4 mm) tempered glass is secured in a tight fitting channel, creating a continuous, clean line from framework to glass.
- Standard sizes - 2 thru 6 well lengths fit most popular drop-in models. Custom sizes also available.
- Available in standard Gray Hammer Semi-Gloss or 9 stylish powder-coated colors
- Accessories include fluorescent lights, incandescent lights, Cayenne® heat strips and Cayenne® heat strips with lights. Electrical appliances are UL and CUL listed.
- Mounts to stainless steel, solid surface, and laminate counter tops
- Foodsafe and meets sanitation requirements.
- Important: Specify 14 gauge stainless steel countertops when using Progressive Style Breath Guards
- *Information below is not complete. For detailed specifications and step-by-step ordering instructions, please see PDF spec sheet attachment on resources tab below

Standard Progressive Style Breath Guards

These breath guards can be used with Signature Server® and V-class bases, as well as drop-ins. They are available in Standard and NSF certified models. For more information and detailed dimensions, please reference our spec sheets.

- End frames constructed of 3/8" (1 cm) water-jet cut aluminum with extruded aliminum glass frames. Progressive Style breath guards are both light weight for easy installation and strong for long-term use
- 1/4" (6.4 mm) tempered glass is secured in a tight fitting channel, creating a continuous, clean line from framework to glass.
- Standard sizes - 2 thru 6 well lengths fit most popular drop-in models. Custom sizes also available.
- Available in standard Gray Hammer Semi-Gloss or 9 stylish powder-coated colors
- Accessories include fluorescent lights, incandescent lights, Cayenne® heat strips and Cayenne® heat strips with lights. Electrical appliances are UL and CUL listed.
- Mounts to stainless steel, solid surface, and laminate counter tops
- Foodsafe and meets sanitation requirements.
- Important: Specify 14 gauge stainless steel countertops when using Progressive Style Breath Guards
- *Information below is not complete. For detailed specifications and step-by-step ordering instructions, please see PDF spec sheet attachment on resources tab below
- NOTE: Item made to order, cannot be cancelled or returned.

34.5-inch Standard Traditional Style Breath Guards

These breath guards can be used with Signature Server® with non-stainless steel countertops and V-Class bases, as well as drop-ins. For more information and detailed dimensions, please reference our spec sheets.

- Constructed of 1 1/2" (3.2 cm) extruded aluminum, Traditional Breath Guards are both light weight for easy installation and strong for long time use.
- 1/4" (6.4 mm) tempered glass is secured in a tight fitting channel, creating a continuous, clean line from framework to glass.
- Standard sizes - 2 thru 6 well lengths fit most popular drop-in models. Custom sizes also available.
- Available in natural aluminum or 6 stylish powder-coated colors.
- Accessories include fluorescent lights, incandescent lights, Cayenne® heat strips and Cayenne® heat strips with lights. Electrical appliances are UL and CUL listed.
- Shipped pre-assembled in a sturdy crate.
- Mounts to stainless steel, solid surface and laminate countertops. Easy to follow mounting instructions included.
- 1 year warranty.
- Foodsafe and meets sanitation requirements.
- Important: Specify 14 gauge stainless steel countertops when using Traditional Breath Guards

73-inch standard traditional double-sided buffet-style breath guard for five-well 4-Series unit, V-class base, or drop-in well with stainless steel countertop

Offering the best of both worlds, the traditional double-sided buffet-style breath guard by Vollrath is lightweight for easy installation and strong for long-term use. It's constructed of 1 1/2-inch extruded aluminum and features 1/4-inch tempered glass that's secured in a tight-fitting channel for a continuous, clean line from the framework to the glass. The sleek design offers exceptional protection from dust, germs and other contaminants. This breath guard can be mounted to any five-well Signature Server® unit, V-class base, or drop-in wells with stainless steel countertops.

- 1 1/2-inch extruded aluminum is lightweight for easy installation and strong for long-term use
- 1/4-inch tempered glass is secured in a tight-fitting channel for a continuous, clean line from the framework to the glass
- Sleek design offers exceptional protection from dust, germs and other contaminants
- Important: Specify 14-gauge stainless steel countertops and discuss mounting with Vollrath representative before ordering
- Please note this is a made-to-order item. These items require additional time for fulfillment. Made-to-order items cannot be changed, canceled or returned and may be subject to a minimum-order quantity. Contact your Vollrath sales representative for details.

Two-well 120-volt Hot, Cold, Frozen drop-in unit with auto drain and flat flange

Crafted from rugged 18-gauge, 300-series stainless steel, this unit is built to withstand heavy use while maintaining its sleek appearance. The foamed-in-place polyurethane insulation and well-wrapped refrigeration coils ensure energy efficiency and consistent performance. Using eco-friendly R290 refrigerant, the component minimizes environmental impact without sacrificing functionality. Designed for flexibility, it accommodates full-size and fractional food pans up to 6 inches deep, with a 2-inch stepped cold-wall recess that maintains NSF compliance by creating a cold-air blanket over food. With features like a built-in ?-inch integral drain, optional auto-drain capabilities, and flexible mounting options for counters up to 3 inches thick, this innovative solution simplifies installation, cleaning, and operation to keep your kitchen running smoothly.

- Rugged 18-gauge, 300-series stainless steel construction for durability
- Independent well operation in hot, cold, or frozen modes
- Eco-friendly R290 refrigerant with a lower GWP (Global Warming Potential)
- User interface with 4' (1.2 m) connection for flexible mounting

- Wrapped refrigeration coils for maximum cooling efficiency
- Foamed-in-place polyurethane insulation enhances thermal performance
- Standard mounting clips included for installation on counters up to 3" (7.6 cm) thick
- 2" cold-wall recess creates cold-air blanket for NSF compliance
- Compatible with full-size and fractional pans up to 6" deep
- ?" integral drain simplifies water removal
- 6' (1.5 m) cord with plug included for easy setup
- Made in the USA

- User interface with 4' (1.2 m) connection for flexible mounting

- Wrapped refrigeration coils for maximum cooling efficiency
- Foamed-in-place polyurethane insulation enhances thermal performance
- Standard mounting clips included for installation on counters up to 3" (7.6 cm) thick
- 2" cold-wall recess creates cold-air blanket for NSF compliance
- Compatible with full-size and fractional pans up to 6" deep
- ?" integral drain simplifies water removal
- 6' (1.5 m) cord with plug included for easy setup
- Made in the USA

Three-well 120-volt Hot, Cold, Frozen drop-in unit with flat flange

Crafted from rugged 18-gauge, 300-series stainless steel, this unit is built to withstand heavy use while maintaining its sleek appearance. The foamed-in-place polyurethane insulation and well-wrapped refrigeration coils ensure energy efficiency and consistent performance. Using eco-friendly R290 refrigerant, the component minimizes environmental impact without sacrificing functionality. Designed for flexibility, it accommodates full-size and fractional food pans up to 6 inches deep, with a 2-inch stepped cold-wall recess that maintains NSF compliance by creating a cold-air blanket over food. With features like a built-in ?-inch integral drain, optional auto-drain capabilities, and flexible mounting options for counters up to 3 inches thick, this innovative solution simplifies installation, cleaning, and operation to keep your kitchen running smoothly.

- Rugged 18-gauge, 300-series stainless steel construction for durability
- Independent well operation in hot, cold, or frozen modes
- Eco-friendly R290 refrigerant with a lower GWP (Global Warming Potential)
- User interface with 4' (1.2 m) connection for flexible mounting
- Wrapped refrigeration coils for maximum cooling efficiency
- Foamed-in-place polyurethane insulation enhances thermal performance

- Standard mounting clips included for installation on counters up to 3" (7.6 cm) thick

- Wrapped refrigeration coils for maximum cooling efficiency
- Foamed-in-place polyurethane insulation enhances thermal performance
- Standard mounting clips included for installation on counters up to 3" (7.6 cm) thick
- 2" cold-wall recess creates cold-air blanket for NSF compliance
- Compatible with full-size and fractional pans up to 6" deep
- ?" integral drain simplifies water removal
- 6' (1.5 m) cord with plug included for easy setup
- Made in the USA

Two-well 120-volt Hot, Cold, Frozen drop-in unit with auto drain

Crafted from rugged 18-gauge, 300-series stainless steel, this unit is built to withstand heavy use while maintaining its sleek appearance. The foamed-in-place polyurethane insulation and well-wrapped refrigeration coils ensure energy efficiency and consistent performance. Using eco-friendly R290 refrigerant, the component minimizes environmental impact without sacrificing functionality. Designed for flexibility, it accommodates full-size and fractional food pans up to 6 inches deep, with a 2-inch stepped cold-wall recess that maintains NSF compliance by creating a cold-air blanket over food. With features like a built-in ?-inch integral drain, optional auto-drain capabilities, and flexible mounting options for counters up to 3 inches thick, this innovative solution simplifies installation, cleaning, and operation to keep your kitchen running smoothly.

- Rugged 18-gauge, 300-series stainless steel construction for durability
- Independent well operation in hot, cold, or frozen modes
- Eco-friendly R290 refrigerant with a lower GWP (Global Warming Potential)
- User interface with 4' (1.2 m) connection for flexible mounting
- Wrapped refrigeration coils for maximum cooling efficiency
- Foamed-in-place polyurethane insulation enhances thermal performance

- Standard mounting clips included for installation on counters up to 3" (7.6 cm) thick

Two-well 120-volt NSF 7-certified refrigerated modular drop-in cold well with flat flange

Hold all your deliciously prechilled food at ideal serving temperatures with the two-well 120-volt refrigerated modular drop-in cold well by Vollrath. The fabricated well and flange are made of strong 300-Series stainless steel that promises years of use, and the exterior is constructed of 20-gauge galvanized steel for impressive durability. The refrigeration coils surround the exterior side walls of the well for maximum cooling, and the thick polyurethane insulation helps maintain cold temperatures and improves energy efficiency. With a 3-inch recessed design, this drop-in cold well keeps food low, minimizing the impact of ambient air, and the deep design accommodates 6-inch-deep pans easily. The condensing unit is suspended directly below the well to maximize space, while the flat flange creates a sleek, streamlined appearance. Designed for top-mount installation, this drop-in cold well features a 6-foot cord and plug, meaning no hardwiring is required, ensuring quick, convenient installation.

- Made in the USA
- 300-Series stainless steel fabricated well and flange promise years of use
- 20-gauge galvanized steel exterior is impressively durable
- Thick polyurethane foam insulation helps maintain cold temperatures and improves energy efficiency
- Uses R513A, a nonflammable low Global Warming Potential (GWP) refrigerant
- Refrigeration coils surround the exterior side walls for maximum cooling
- Condensing unit suspended right below well for convenience
- Flat flange creates a sleek, streamlined appearance
- NSF-certified
- Designed for top-mount installation
- Deep well fits 6-inch-deep standard 12" x 20" pans with adaptor bars
- 3-inch recess lowers food pan into well and shields it from ambient air
- 1-inch integral drain
- Remote on-off switch with 4-foot cord
- 4-foot control cord allows remote mounting

Four-well 120-volt NSF 7-certified refrigerated modular drop-in cold well with flat flange

Hold all your deliciously prechilled food at ideal serving temperatures with the four-well 120-volt refrigerated modular drop-in cold well by Vollrath. The fabricated well and flange are made of strong 300-Series stainless steel that promises years of use, and the exterior is constructed of 20-gauge galvanized steel for impressive durability. The refrigeration coils surround the exterior side walls of the well for maximum cooling, and the thick polyurethane insulation helps maintain cold temperatures and improves energy efficiency. With a 3-inch recessed design, this drop-in cold well keeps food low, minimizing the impact of ambient air, and the deep design accommodates 6-inch-deep pans easily. The condensing unit is suspended directly below the well to maximize space, while the flat flange creates a sleek, streamlined appearance. Designed for top-mount installation, this drop-in cold well features a 6-foot cord and plug, meaning no hardwiring is required, ensuring quick, convenient installation.

- Made in the USA
- 300-Series stainless steel fabricated well and flange promise years of use
- 20-gauge galvanized steel exterior is impressively durable
- Thick polyurethane foam insulation helps maintain cold temperatures and improves energy efficiency
- Uses R513A, a nonflammable low Global Warming Potential (GWP) refrigerant
- Refrigeration coils surround the exterior side walls for maximum cooling
- Condensing unit suspended right below well for convenience
- Flat flange creates a sleek, streamlined appearance
- NSF-certified
- Designed for top-mount installation
- Deep well fits 6-inch-deep standard 12" x 20" pans with adaptor bars
- 3-inch recess lowers food pan into well and shields it from ambient air
- 1-inch integral drain
- Remote on-off switch with 4-foot cord
- 4-foot control cord allows remote mounting

With a 3-inch recessed design, this drop-in cold well keeps food low, minimizing the impact of ambient air, and the deep design accommodates 6-inch-deep pans easily. The condensing unit is suspended directly below the well to maximize space, while the full-perimeter drip edge contains spills and condensation. Designed for top-mount installation, this drop-in cold well features a 6-foot cord and plug, meaning no hardwiring is required, ensuring quick, convenient installation.

- Made in the USA
- 300-Series stainless steel fabricated well and flange promise years of use
- 20-gauge galvanized steel exterior is impressively durable
- Thick polyurethane foam insulation helps maintain cold temperatures and improves energy efficiency
- Units utilize R290 refrigerant, which has a lower GWP (Global Warming Potential) than many previously-used refrigerants
- Refrigeration coils surround the exterior side walls for maximum cooling
- Condensing unit suspended right below well for convenience
- Flat work surface around opening
- Full-perimeter drip edge contains spills and condensation
- NSF-certified
- Designed for top-mount installation
- Deep well fits 6-inch-deep standard 12" x 20" pans with adaptor bars
- 3-inch recess lowers food pan into well and shields it from ambient air
- 1-inch integral drain
- Remote on-off switch with 4-foot cord

- Made in the USA
- 300-Series stainless steel fabricated well and flange promise years of use
- 20-gauge galvanized steel exterior is impressively durable
- Thick polyurethane foam insulation helps maintain cold temperatures and improves energy efficiency
- Uses R290, a nonflammable low Global Warming Potential (GWP) refrigerant
- Refrigeration coils surround the exterior side walls for maximum cooling
- Condensing unit suspended right below well for convenience
- Flat work surface around opening
- Full-perimeter drip edge contains spills and condensation
- NSF-certified
- Designed for top-mount installation
- Deep well fits 6-inch-deep standard 12" x 20" pans with adaptor bars
- 3-inch recess lowers food pan into well and shields it from ambient air
- 1-inch integral drain
- Remote on-off switch with 4-foot cord

Two-well 120-volt NSF 7-certified refrigerated modular drop-in cold well

Hold all your deliciously prechilled food at ideal serving temperatures with the refrigerated modular drop-in cold well by Vollrath. The fabricated well and flange are made of strong 300-Series stainless steel that promises years of use, and the exterior is constructed of 20-gauge galvanized steel for impressive durability. The refrigeration coils surround the exterior side walls of the well for maximum cooling, and the thick polyurethane insulation helps maintain cold temperatures and improves energy efficiency. With a 3-inch recessed design, this drop-in cold well keeps food low, minimizing the impact of ambient air, and the deep design accommodates 6-inch-deep pans easily. The condensing unit is suspended directly below the well to maximize space, while the full-perimeter drip edge contains spills and condensation. Designed for top-mount installation, this drop-in cold well features a 6-foot cord and plug, meaning no hardwiring is required, ensuring quick, convenient installation.

Three-well short-side nonrefrigerated cold well

Keep your cold food deliciously chilled in the nonrefrigerated cold well by Vollrath. This strong well is made of durable stainless steel, and the 8-inch depth holds your food pans and large amounts of ice to keep your food items cool. Thick polyurethane foam insulation helps trap and maintain the desired cold temperature, keeping your ice frozen longer and reducing the number of refills needed. The full-perimeter drip edge contains spills and condensation, while the integrated 1-inch drain and included drain plug are easy to use.

- Made in the USA
- 18-8 grade stainless steel construction is durable and long-lasting
- Thick polyurethane insulation keeps ice frozen longer
- Full-perimeter drip edge contains spills and condensation
- Short-side design is perfect for narrow serving areas
- NSF-certified
- 1-inch integrated drain and included drain plug are easy to use
- 8-inch depth holds your food pans and large amounts of ice
- Please note this is a made-to-order item. These items require additional time for fulfillment. Made-to-order items cannot be changed, canceled or returned and may be subject to a minimum-order quantity. Contact your Vollrath sales representative for details.

Four-well short-side nonrefrigerated cold well

Keep your cold food deliciously chilled in the nonrefrigerated cold well by Vollrath. This strong well is made of durable stainless steel, and the 8-inch depth holds four food pans and large amounts of ice to keep your food items cool. Thick polyurethane foam insulation helps trap and maintain the desired cold temperature, keeping your ice frozen longer and reducing the number of refills needed. The full-perimeter drip edge contains spills and condensation, while the integrated 1-inch drain and included drain plug are easy to use.

Six-well nonrefrigerated cold well

Keep your cold food deliciously chilled in the nonrefrigerated cold well by Vollrath. This strong well is made of durable stainless steel, and the 8-inch depth holds your food pans and large amounts of ice to keep your food items cool. Thick polyurethane foam insulation helps trap and maintain the desired cold temperature, keeping your ice frozen longer and reducing the number of refills needed. The full-perimeter drip edge contains spills and condensation, while the integrated 1-inch drain and included drain plug are easy to use.

- Made in the USA
- 18-8 grade stainless steel construction is durable and long-lasting
- Thick polyurethane insulation keeps ice frozen longer
- Full-perimeter drip edge contains spills and condensation
- NSF-certified
- 1-inch integrated drain and included drain plug are easy to use
- 8-inch depth holds your food pans and large amounts of ice
- Please note this is a made-to-order item. These items require additional time for fulfillment. Made-to-order items cannot be changed, canceled or returned and may be subject to a minimum-order quantity. Contact your Vollrath sales representative for details.

120 Volt Two-Pan Refrigerated Short Side Drop Ins

Our innovative short side drop ins are now available in a refrigerated version.

- Cutout dimensions has a 7/8" (2.2 cm) corner radius
- Cold drop-ins are best used for holding periods up to 4 hours - for best performance, stainless steel containers are recommended
- Display well 6 5/8" (16.8 cm) deep
- Thick polyurethane foam insulation
- Zero clearance for flexibility in installation
- NSF7 units
- Drain plug included
- NOTE: Item made to order, cannot be canceled or returned.

Two-well 120-volt standard refrigerated drop-in frost top

Hold all your deliciously prechilled food items, appetizer trays and more at ideal serving temperatures with the refrigerated drop-in frost top by Vollrath. Perfect for self-service, the display surface sits flush with the countertop for a clean, streamlined appearance, while the refrigeration coils underneath provide efficient, effective cooling. Additional coils are attached to the sides of the display to create a full frost pattern, while the condensing unit is suspended right below the surface to maximize space. The frost top features one-piece construction for a smooth look, and the flange and display area are constructed of durable 300-Series stainless steel that promises years of use. A full-perimeter drip edge contains spills and condensation, and the top-mount design ensures quick, convenient installation.

- Flange and display are constructed of durable 300-Series stainless steel
- Frost top features one-piece construction
- Polystyrene insulation surrounds the cooling coils, minimizing energy usage and ensuring lower-cost operation
- Uses R513A, a nonflammable low Global Warming Potential (GWP) refrigerant
- Refrigeration coils are attached to the underside of the display surface to provide maximum cooling
- Additional coils are attached to the sides of the display to create a full frost pattern
- Condensing unit suspended below the frost top to maximize space
- Flat frost top is flush with counter for a streamlined appearance
- Full-perimeter drip edge contains spills and condensation
- NSF-certified
- Designed for top-mount installation
- Display surface averages 0°F when ambient temperature is 70°F
- ?-inch integral drain
- Remote on-off switch with 4-foot cord
- 6-foot cord with plug does not require hardwiring

Four-well 120-volt standard refrigerated drop-in frost top

Hold all your deliciously prechilled food items, appetizer trays and more at ideal serving temperatures with the refrigerated drop-in frost top by Vollrath. Perfect for self-service, the display surface sits flush with the countertop for a clean, streamlined appearance, while the refrigeration coils underneath provide efficient, effective cooling. Additional coils are attached to the sides of the display to create a full frost pattern, while the condensing unit is suspended right below the surface to maximize space. The frost top features one-piece construction for a smooth look, and the flange and display area are constructed of durable 300-Series stainless steel that promises years of use. A full-perimeter drip edge contains spills and condensation, and the top-mount design ensures quick, convenient installation.

- Flange and display are constructed of durable 300-Series stainless steel
- Frost top features one-piece construction
- Polystyrene insulation surrounds the cooling coils, minimizing energy usage and ensuring lower-cost operation
- Uses R513A, a nonflammable low Global Warming Potential (GWP) refrigerant
- Refrigeration coils are attached to the underside of the display surface to provide maximum cooling
- Additional coils are attached to the sides of the display to create a full frost pattern
- Condensing unit suspended below the frost top to maximize space
- Flat frost top is flush with counter for a streamlined appearance
- Full-perimeter drip edge contains spills and condensation
- NSF-certified
- Designed for top-mount installation
- Display surface averages 0 F when ambient temperature is 70°F
- ?-inch integral drain
- Remote on-off switch with 4-foot cord
- 6-foot cord with plug does not require hardwiring

Five-well NSF 7-certified remote refrigerated drop-in cold well

Keep your cold food perfectly chilled with the five-well remote refrigerated drop-in cold well by Vollrath. With remote refrigeration, this high-performing well is equally convenient and reliable, while the strong stainless steel construction promises years of use. Thick polyurethane foam insulation helps maintain temperatures and improves energy efficiency, and the 6 ?-inch depth fits full- or fractional-size pans up to 6-inches deep.

- Made in the USA
- Strong stainless steel construction is durable and long-lasting
- Thick polyurethane foam insulation helps maintain cold temperatures and improves energy efficiency
- Drain plug included
- NSF-certified
- Shoulder is recessed 3 inches
- 6 ?-inch depth fits full- or fractional-size pans up to 6-inches deep
- For best performance, stainless steel pans are recommended
- Please note this is a made-to-order item. These items require additional time for fulfillment. Made-to-order items cannot be changed, canceled or returned and may be subject to a minimum-order quantity. Contact your Vollrath sales representative for details.
- Shallow recess protects food from ambient air while still providing visibility
- NSF-certified
- Designed for top-mount installation
- Five deep wells fit 6-inch-deep pans
- ?-inch integral drain
- Please note this is a made-to-order item. These items require additional time for fulfillment. Made-to-order items cannot be changed, canceled or returned and may be subject to a minimum-order quantity. Contact your Vollrath sales representative for details.

Three-well 120-volt NSF 7-certified short-side refrigerated drop-in cold well

Designed to help you create a narrower serving area, the refrigerated drop-in cold well by Vollrath saves valuable space and holds all your deliciously prechilled food at ideal serving temperatures. The fabricated well and flange are made of strong 300-Series stainless steel that promises years of use, and the exterior is constructed of 20-gauge galvanized steel for impressive durability. The refrigeration coils surround the exterior side walls of the well for maximum cooling, and the thick polyurethane insulation helps maintain cold temperatures and improves energy efficiency. With a 3-inch recessed design, this drop-in cold well keeps food low, minimizing the impact of ambient air, and the deep design accommodates 6-inch-deep pans easily. The condensing unit is suspended directly below the well to maximize space, while the full-perimeter drip edge contains spills and condensation. Designed for top-mount installation, this drop-in cold well features a 6-foot cord and plug, meaning no hardwiring is required, ensuring quick, convenient installation.

- Made in the USA
- 300-Series stainless steel fabricated well and flange promise years of use
- 20-gauge galvanized steel exterior is impressively durable
- Thick polyurethane foam insulation helps maintain cold temperatures and improves energy efficiency
- Uses R513A, a nonflammable low Global Warming Potential (GWP) refrigerant
- Refrigeration coils surround the exterior side walls for maximum cooling
- Condensing unit suspended right below well for convenience
- Flat work surface around opening
- Full-perimeter drip edge contains spills and condensation
- NSF-certified
- Designed for top-mount installation
- Deep well fits 6-inch-deep standard 12" x 20" pans with adaptor bars
- 3-inch recess lowers food pan into well and shields it from ambient air
- 1-inch integral drain
- Remote on-off switch with 4-foot cord

- 20-gauge galvanized steel exterior is impressively durable
- Thick polyurethane foam insulation helps maintain cold temperatures and improves energy efficiency
- Uses R290, a nonflammable low Global Warming Potential (GWP) refrigerant
- Refrigeration coils surround the exterior side walls for maximum cooling
- Condensing unit suspended right below well for convenience
- Flat work surface around opening
- Full-perimeter drip edge contains spills and condensation
- NSF-certified
- Designed for top-mount installation
- Deep well fits 6-inch-deep standard 12" x 20" pans with adaptor bars
- 3-inch recess lowers food pan into well and shields it from ambient air
- 1-inch integral drain
- Remote on-off switch with 4-foot cord

120 Volt One-pan Standard Refrigerated Cold Pan

Keep your most popular cold foods chilled throughout the day with the one pan standard drop in refrigerated cold food well! This cold food well features enough room in its compartment to hold one full size food pans. The top is made of stainless steel with a 3/8" overhang on all sides and a full-perimeter drip edge to sit flush with your countertops while keeping them clean of runoff. The 1" drain siphons runoff from inside the well, and the entire unit is insulated with polyurethane foam to ensure premium energy efficiency. This item requires a remote refrigeration system for operation (sold separately).

- 8" (20.3 cm) deep well
- Thick polyurethane foam insulation
- Drain plug included
- Cold drop-ins are best used for holding periods up to 4 hours - for best performance, stainless steel containers are recommended
- * Cutout dimension has 7/8" (2.2 cm) corner radius

Three-well 120-volt standard refrigerated modular drop-in cold well with flat flange

Hold all your deliciously prechilled food at ideal serving temperatures with the three-well 120-volt refrigerated modular drop-in cold well by Vollrath. The fabricated well and flange are made of strong 300-Series stainless steel that promises years of use, and the exterior is constructed of 20-gauge galvanized steel for impressive durability. The refrigeration coils surround the exterior side walls of the well for maximum cooling, and the thick polyurethane insulation helps maintain cold temperatures and improves energy efficiency. With a 3-inch recessed design, this drop-in cold well keeps food low, minimizing the impact of ambient air, and the deep design accommodates 6-inch-deep pans easily. The condensing unit is suspended directly below the well to maximize space, while the flat flange creates a sleek, streamlined appearance. Designed for top-mount installation, this drop-in cold well features a 6-foot cord and plug, meaning no hardwiring is required, ensuring quick, convenient installation.

- Made in the USA
- 300-Series stainless steel fabricated well and flange promise years of use
- 20-gauge galvanized steel exterior is impressively durable
- Thick polyurethane foam insulation helps maintain cold temperatures and improves energy efficiency
- Uses R513A, a nonflammable low Global Warming Potential (GWP) refrigerant
- Refrigeration coils surround the exterior side walls for maximum cooling
- Condensing unit suspended right below well for convenience
- Flat flange creates a sleek, streamlined appearance
- Designed for top-mount installation
- 1-year parts and labor limited warranty
- 5-year limited warranty on compressor
- 6-foot cord with plug does not require hardwiring
- 4-foot control cord allows remote mounting
- Please note this is a made-to-order item. These items require additional time for fulfillment. Made-to-order items cannot be changed, canceled or returned and may be subject to a minimum-order quantity. Contact your Vollrath sales representative for details.

Two-well 120-volt standard refrigerated modular drop-in cold well with flat flange

Hold all your deliciously prechilled food at ideal serving temperatures with the two-well 120-volt refrigerated modular drop-in cold well by Vollrath. The fabricated well and flange are made of strong 300-Series stainless steel that promises years of use, and the exterior is constructed of 20-gauge galvanized steel for impressive durability. The refrigeration coils surround the exterior side walls of the well for maximum cooling, and the thick polyurethane insulation helps maintain cold temperatures and improves energy efficiency. With a 3-inch recessed design, this drop-in cold well keeps food low, minimizing the impact of ambient air, and the deep design accommodates 6-inch-deep pans easily. The condensing unit is suspended directly below the well to maximize space, while the flat flange creates a sleek, streamlined appearance. Designed for top-mount installation, this drop-in cold well features a 6-foot cord and plug, meaning no hardwiring is required, ensuring quick, convenient installation.

- Made in the USA
- 300-Series stainless steel fabricated well and flange promise years of use
- 20-gauge galvanized steel exterior is impressively durable
- Thick polyurethane foam insulation helps maintain cold temperatures and improves energy efficiency
- Uses R290, a nonflammable low Global Warming Potential (GWP) refrigerant
- Refrigeration coils surround the exterior side walls for maximum cooling
- Condensing unit suspended right below well for convenience
- Flat flange creates a sleek, streamlined appearance
- Designed for top-mount installation
- 1-year parts and labor limited warranty
- 5-year limited warranty on compressor
- 6-foot cord with plug does not require hardwiring
- 4-foot control cord allows remote mounting
- Please note this is a made-to-order item. These items require additional time for fulfillment. Made-to-order items cannot be changed, canceled or returned and may be subject to a minimum-order quantity. Contact your Vollrath sales representative for details.

Four-well remote refrigerated standard drop-in cold well

Keep your cold food perfectly chilled with the four-well remote refrigerated standard drop-in cold well by Vollrath. With remote refrigeration, this high-performing well is equally convenient and reliable, while the strong stainless steel construction promises years of use. Thick polyurethane foam insulation helps maintain temperatures and improves energy efficiency, and the 8-inch-deep well fits full- or fractional-size pans easily.

- Made in the USA
- Strong stainless steel construction is durable and long-lasting
- Thick polyurethane foam insulation helps maintain cold temperatures and improves energy efficiency
- Drain plug included
- 8-inch-deep well fits full- or fractional-sized pans
- For best performance, stainless steel pans are recommended
- Please note this is a made-to-order item. These items require additional time for fulfillment. Made-to-order items cannot be changed, canceled or returned and may be subject to a minimum-order quantity. Contact your Vollrath sales representative for details.
- Factory-set cold control on compressor provides mini-defrost with every compressor-off cycle
- Flat flange creates a sleek, streamlined appearance
- Deep well fits 6-inch-deep standard 12" x 20" pans with adaptor bars
- 3-inch recess lowers food pan into well and shields it from ambient air
- 1-inch integral drain
- Remote on-off switch with 4-foot cord
- 6-foot cord with plug does not require hardwiring
- Please note this is a made-to-order item. These items require additional time for fulfillment. Made-to-order items cannot be changed, canceled or returned and may be subject to a minimum-order quantity. Contact your Vollrath sales representative for details.

Four-well 120-volt standard short-side refrigerated drop-in cold well with flat flange

Designed to help you create a narrower serving area, the four-well 120-volt short-side refrigerated drop-in cold well by Vollrath saves valuable space and holds all your deliciously prechilled food at ideal serving temperatures. The fabricated well and flange are made of strong 300-Series stainless steel that promises years of use, and the exterior is constructed of 20-gauge galvanized steel for impressive durability. The refrigeration coils surround the exterior side walls of the well for maximum cooling, and the thick polyurethane insulation helps maintain cold temperatures and improves energy efficiency. With a 3-inch recessed design, this drop-in cold well keeps food low, minimizing the impact of ambient air, and the deep design accommodates 6-inch-deep pans easily. The condensing unit is suspended directly below the well to maximize space, while the flat flange creates a sleek, streamlined appearance. Designed for top-mount installation, this drop-in cold well features a 6-foot cord and plug, meaning no hardwiring is required, ensuring quick, convenient installation.

- Made in the USA
- 300-Series stainless steel fabricated well and flange promise years of use
- 20-gauge galvanized steel exterior is impressively durable
- Thick polyurethane foam insulation helps maintain cold temperatures and improves energy efficiency
- Uses R513A, a nonflammable low Global Warming Potential (GWP) refrigerant
- Refrigeration coils surround the exterior side walls for maximum cooling
- Condensing unit suspended right below well for convenience
- Flat flange creates a sleek, streamlined appearance
- NSF-certified
- Deep well fits 6-inch-deep standard 12" x 20" pans with adaptor bars
- 3-inch recess lowers food pan into well and shields it from ambient air
- 1-inch integral drain
- Remote on-off switch with 4-foot cord
- 6-foot cord with plug does not require hardwiring

Three-well 120-volt standard short-side refrigerated drop-in cold well

Designed to help you create a narrower serving area, the refrigerated drop-in cold well by Vollrath saves valuable space and holds all your deliciously prechilled food at ideal serving temperatures. The fabricated well and flange are made of strong 300-Series stainless steel that promises years of use, and the exterior is constructed of 20-gauge galvanized steel for impressive durability. The refrigeration coils surround the exterior side walls of the well for maximum cooling, and the thick polyurethane insulation helps maintain cold temperatures and improves energy efficiency. With a 3-inch recessed design, this drop-in cold well keeps food low, minimizing the impact of ambient air, and the deep design accommodates 6-inch-deep pans easily. The condensing unit is suspended directly below the well to maximize space, while the full-perimeter drip edge contains spills and condensation. Designed for top-mount installation, this drop-in cold well features a 6-foot cord and plug, meaning no hardwiring is required, ensuring quick, convenient installation.

- Made in the USA
- 300-Series stainless steel fabricated well and flange promise years of use
- 20-gauge galvanized steel exterior is impressively durable
- Thick polyurethane foam insulation helps maintain cold temperatures and improves energy efficiency
- Uses R513A, a nonflammable low Global Warming Potential (GWP) refrigerant
- Refrigeration coils surround the exterior side walls for maximum cooling
- Condensing unit suspended right below well for convenience
- Flat work surface around opening
- Full-perimeter drip edge contains spills and condensation
- Designed for top-mount installation
- Deep well fits 6-inch-deep standard 12" x 20" pans with adaptor bars
- 3-inch recess lowers food pan into well and shields it from ambient air
- 1-inch integral drain
- Remote on-off switch with 4-foot cord
- 6-foot cord with plug does not require hardwiring

Three-well 120-volt drop-in hot or cold well with manual drain, thermostatic controls and flat flange

Serving up an incomparable level of efficiency, versatility and performance, the three-well 120-volt drop-in hot or cold well by Vollrath is an excellent choice for a wide range of establishments. The unique design lets you change back and forth from hot to cold with the flip of a switch. The wells are made of durable stainless steel and feature individual controls that allow you to serve a variety of food items at their ideal serving temperatures. The thermostatic controls ensure accurate heating, and the high-density polyurethane foam insulation traps heat and maximizes energy efficiency. Refrigeration coils surround the exterior walls for quick, consistent cooling, while the flat flange creates a sleek, streamlined appearance.

- Made in the USA
- 18-gauge 300-Series stainless steel wells and 18-gauge galvanized steel exterior housing are durable and long-lasting
- High-density polyurethane foam insulation traps heat and maximizes energy efficiency
- Reliable thermostatic controls ensure accurate heating
- Change between hot and cold with the flip of a switch
- Individual well controls allow you to serve a variety of foods at a variety of temperatures
- Manual drain is reliable and easy to use
- NSF-certified
- Flush-mount drop-in design can be installed into most countertop materials
- 6-foot cord with plug does not require hardwiring
- 5-foot control cord allows remote mounting
- Please note this is a made-to-order item. These items require additional time for fulfillment. Made-to-order items cannot be changed, canceled or returned and may be subject to a minimum-order quantity. Contact your Vollrath sales representative for details.

Voltage 120

Construction

Special Feature ..... Flat Flange

Four-well 120-volt and 208- to 240-volt drop-in hot or cold well with auto-drain, thermostatic controls and flat flange

Serving up an incomparable level of efficiency, versatility and performance, the four-well drop-in hot or cold well by Vollrath is an excellent choice for a wide range of establishments. The unique design lets you change back and forth from hot to cold with the flip of a switch. The well is made of durable stainless steel and allows you to serve hot or cold food items at the ideal serving temperature. The thermostatic controls ensure accurate heating, and the high-density polyurethane foam insulation traps heat and maximizes energy efficiency. Refrigeration coils surround the exterior walls for quick, consistent cooling, while the flat flange creates a sleek, streamlined appearance. With the automatic drain system, this versatile hot or cold drop-in well is easy to use and incredibly convenient.

- Made in the USA
- 18-gauge 300-Series stainless steel well and 18-gauge galvanized steel exterior housing are durable and long-lasting
- High-density polyurethane foam insulation traps heat and maximizes energy efficiency
- Reliable thermostatic controls ensure accurate heating
- Change between hot and cold with the flip of a switch

Three-well 120-volt drop-in hot or cold well with auto-drain and thermostatic controls

Serving up an incomparable level of efficiency, versatility and performance, the hot or cold well by Vollrath is an excellent choice for a wide range of establishments. The unique design lets you change back and forth from hot to cold with the flip of a switch. The wells are made of durable stainless steel and feature individual controls that allow you to serve a variety of food items at their ideal serving temperatures. The thermostatic controls ensure accurate heating, and the high-density polyurethane foam insulation traps heat and maximizes energy efficiency. Refrigeration coils surround the exterior walls for quick, consistent cooling, while the full-perimeter drip edge contains spills and condensation for a clean, attractive display.

- Made in the USA
- 18-gauge 300-Series stainless steel wells and 18-gauge galvanized steel exterior housing are durable and long-lasting
- High-density polyurethane foam insulation traps heat and maximizes energy efficiency
- Reliable thermostatic controls ensure accurate heating
- Change between hot and cold with the flip of a switch
- Individual well controls allow you to serve a variety of foods at a variety of temperatures
- Auto-drain feature offers additional convenience and ease of use — auto-fill option not available on this product
- Uses R513A, a nonflammable low Global Warming Potential (GWP) refrigerant
- Wells pass NSF 4 and NSF 7 performance testing for open-top hot holding and refrigerated buffet units.
- Listed under NSF/ANSI 169 for special-purpose food equipment and devices
- 1-year parts and labor limited warranty
- 5-year limited warranty on compressor
- 6-foot cord with plug does not require hardwiring
- 4-foot control cord allows remote mounting
- Please note this is a made-to-order item. These items require additional time for fulfillment. Made-to-order items cannot be changed, canceled or returned and may be subject to a minimum-order quantity. Contact your Vollrath sales representative for details.

36-inch FlexVent™ versatile slide-in with downdraft vent and fire suppression system

Elevate your serving line by adding a Vollrath® FlexVent™ versatile slide-in with downdraft vent system and fire suppression. This slide-in unit provides unparalleled flexibility for presentation cooking by eliminating the need for a bulky exhaust hood. The self-contained unit is both sophisticated and practical accommodating a variety of electrical cooking equipment – from induction ranges, griddles to sandwich presses, and even fryers – that can be easily interchanged. The included shelf is adjustable to fulfill a variety of height requirements that suit different equipment, ergonomic needs, and health code requirements. Ideal for presentation cooking, this UL Recognized and UL Classified station will fit seamlessly into your custom serving line for an aesthetically pleasing look.

NOTES:

This product is made to order and cannot be cancelled or returned.

This product is UL Recognized. UL Recognized components are incomplete in certain constructional features and require professional installation and subsequent evaluation to relevant safety standards.

- Fully self-contained downdraft recirculating vent and fire suppression system with UL710B Certification eliminates the need for bulky exhaust hoods
- Interchange cord-and-plug cooking equipment, slide-in unit is not intended for use with gas equipment
- Adjustable shelf fulfills a variety of height requirements for equipment, ergonomic needs, and health code requirements and enables the proper function of the fire suppression system
- Fits seamlessly to custom serving lines for aesthetically pleasing look
- Works with industry-wide breath guard configurations as guided by local health code requirements
- Access panel on operator side allows for one side servicing
- UL Recognized to UL710B
- UL Classified to NSF 2
- Max. configurable appliance load: Voltage - 120/208-240; Hz - 60; Wattage - 7200; Amps - 30

Refrigerated Curved Drop-In Display Cases

Vollrath's Refrigerated Display Cabinet is a great way to present your food and keep it cold. Suitable for a large variety of foods. Create a full lineup with multiple refrigerated units or the matching Heated Display Cabinet.

- Inside lighting strips located at both at the top of the cabinet and underneath the upper shelf create optimum food display throughout cabinet
- Attractively designed base allows display to be used either as a drop-in or as a freestanding countertop unit - use two or more units to create excellent refrigerated merchandising display lineups
- Dual fans circulate air throughout unit to ensure even temperature control
- Double-glazed front glass gives added strength and insulation
- Lift-and-remove rear sliding doors for easy display changes and end of day cleaning
- 12 1/4" (31.1 cm) bottom shelf depth to accommodate steam table pans, trays, bowls, or other display items
- Top shelf - 7 1/2" (19 cm) depth
- Digitally controlled thermostat for precise and consistent settings
- Refrigerated units: 36° to 46° F (2° to 21° C) temperature range
- Note: These items must ship by truck
- 3 year warranty on compressor
- International models have CE certification only

36-inch-wide 120-volt curved-front Cayenne® refrigerated drop-in display case with rear access

The Vollrath® curved-front Cayenne refrigerated drop-in display case chills and displays a variety of food items. The unique design allows this display to be used either as a drop-in or freestanding countertop unit. Precise temperature controls keep items looking and tasting fresh, while durable triple-glazed glass provides excellent insulation and visibility. Rear sliding doors allow easy access, making food selection and restocking simple and convenient. The two shelves provide plenty of room for your products, and the interior lighting optimizes food visibility.

- Digitally controlled thermostat allows more accurate cooling
- Dual fans circulate air for improved temperature distribution
- Temperature ranges from 36°F to 46°F to accommodate a large variety of food products
- Rear doors lift out for easy cleaning
- 3-year limited warranty on compressor

60-inch-wide 120-volt curved-glass drop-in Refrigerated display case with rear access

With the Vollrath® drop-in refrigerated display case, customers have a clear view of the cool products, not the refrigeration below. Drop it into your space to set the stage for freshness, which is always on display thanks to double-glazed front glass that won't fog and a floating shelf that's adjustable to three positions. Serving up 120 volts, its precise digital temperature control, interior lighting at the top and shelf, and easy-access rear sliding doors make the case for must-have convenience. Can be used as a countertop unit too!

- 32°F to 46°F temperature range adds versatility
- Fans circulate air for accurate, even cooling
- Self-contained system offers auto or manual defrost
- Glass heater keeps customer viewing area clear
- Sliding doors lift and remove for easy cleaning
- 6-foot cord allows you to display virtually anywhere
- Digital thermostat on control panel provides precise settings
- Glass heater keeps customer viewing area clear
- Rear sliding doors lift and remove for easy cleaning
- R-290 is a high-performing, environmentally friendly refrigerant
- Standard Vollrath 1 year warranty, 5-year limited warranty on compressor
- UL Energy Verified for Canada

120 Volt Single-Well Bottom Mount Hot or Cold Drop-In

Two units in one for the ultimate in convenient serving.

- Versatile hot/cold drop-in units provide the ultimate in convenient serving options
- Allows you to change from a cold salad bar to hot dinner buffet with the flip of a switch
- Wells pass NSF 4 and NSF 7 performance testing for open top hot food holding and refrigerated buffet units. They are listed under NSF/ANSI 169 for special purpose food equipment and devices.
- A full perimeter drip edge contains spills and condensation within the stainless steel countertop area for a clean, appetizing display
- Top and seamless well are 18-gauge 300 series stainless steel
- High-density polyurethane foam insulation surrounds the well exterior for the ultimate in efficient performance and energy savings
- One-well units available in top and bottom mount designs
- Exterior housing is 18-gauge galvanized steel
- Refrigeration coils surround the exterior sidewalls of the well for maximum cooling
- Thermostatic hot control
- Unit comes with 6 ft. (1.5 m) cord and plug and does not require hard wiring
- 4 ft. (1.2 m) flexible control cord
- One year parts and labor warranty - additional four years on compressor
- Note: Item made to order, cannot be canceled or returned.
- Controls wells individually

33-inch-wide Double-Sided Low Profile Hinged Glass Buffet Breath Guards 2-Well/Pan

Allow for easy cleaning and access to product, without compromising food protection.

- Each panel is constructed of ?" tempered glass to ensure superior durability as well as clear view of the food
- A welded top frame assembly gives these breath guards a lower profile and creates a more open viewing area toward the food
- Available on Signature Server® and V-Class Custom Units
- Mount clean to the counter without the need for a large flange
- Extruded aluminum upright supports include a built-in wiring chase to accommodate lighting and heat options
- Glass panels are installed on a multi-position hinge that allow glass to pivot up and down or hold securely at any position
- A single person can lift and lower glass panels without multiple adjustment points like a typical adjustable breath guard
- LED lighting options are available

74-inch-wide Double-Sided Low Profile Hinged Glass Buffet Breath Guards 5-Well/Pan

Allow for easy cleaning and access to product, without compromising food protection.

- Each panel is constructed of ?" tempered glass to ensure superior durability as well as clear view of the food
- A welded top frame assembly gives these breath guards a lower profile and creates a more open viewing area toward the food
- Available on Signature Server® and V-Class Custom Units
- Mount clean to the counter without the need for a large flange
- Extruded aluminum upright supports include a built-in wiring chase to accommodate lighting and heat options
- Glass panels are installed on a multi-position hinge that allow glass to pivot up and down or hold securely at any position
- A single person can lift and lower glass panels without multiple adjustment points like a typical adjustable breath guard
- LED lighting options are available

73-inch traditional cafeteria-style breath guard with top shelf for five-well 4-Series unit or drop-in well with non-stainless steel countertop

The traditional cafeteria-style breath guard by Vollrath offers superior safety and a classic presentation. The 1 1/2-inch extruded aluminum frame is strong and lightweight, while the 3/8-inch tempered glass is secured in a tight-fitting channel for a continuous, clean line from the framework to the glass. The traditional NSF-certified design does an excellent job protecting your food items from dust, germs and other contaminants, so it offers incredible peace of mind, and the top shelf provides additional surface area. This breath guard can be mounted to any five-well Signature Server® unit or drop-in wells with non-stainless steel countertops.

- 1 1/2-inch extruded aluminum is strong and lightweight
- 1/4-inch tempered glass is secured in a tight-fitting channel for a continuous, clean line from the framework to the glass
- Traditional NSF-certified design offers exceptional protection from dust, germs and other contaminants
- Top shelf provides additional surface area
- Please note this is a made-to-order item. These items require additional time for fulfillment. Made-to-order items cannot be changed, canceled or returned and may be subject to a minimum-order quantity. Contact your Vollrath sales representative for details.

73-inch traditional cafeteria-style breath guard with top shelf for five-well 4-Series unit or drop-in well with non-stainless steel countertop

The traditional cafeteria-style breath guard by Vollrath offers superior safety and a classic presentation. The 1 1/2-inch extruded aluminum frame is strong and lightweight, while the 3/8-inch tempered glass is secured in a tight-fitting channel for a continuous, clean line from the framework to the glass. The traditional NSF-certified design does an excellent job protecting your food items from dust, germs and other contaminants, so it offers incredible peace of mind, and the top shelf provides additional surface area. This breath guard can be mounted to any five-well Signature Server® unit or drop-in wells with non-stainless steel countertops.

- 1 1/2-inch extruded aluminum is strong and lightweight
- 1/4-inch tempered glass is secured in a tight-fitting channel for a continuous, clean line from the framework to the glass
- Traditional NSF-certified design offers exceptional protection from dust, germs and other contaminants
- Top shelf provides additional surface area
- Please note this is a made-to-order item. These items require additional time for fulfillment. Made-to-order items cannot be changed, canceled or returned and may be subject to a minimum-order quantity. Contact your Vollrath sales representative for details.

H54" 120V MED-W DL RT

- Sheathed style element for dependability and longer life
- Structurally engineered aluminum heater housing offers maximum strength with minimal weight
- Bright anodized aluminum heat reflector generates more even heat over food holding area
- Reflector assembly is field-adjustable allowing operator to direct heat pattern where needed
- One year parts and labor warranty supported by a service network for worry-free operation. Additional one year warranty on heating element (parts only).
- Mounting and trim options available
- NOTE: Cayenne Heat Strips and Cayenne Light Strips are custom ordered and cannot be cancelled or returned
- See specification sheet for the variable widths, watts, and amps

H42" 208V MED-W DL RI

- Sheathed style element for dependability and longer life
- Structurally engineered aluminum heater housing offers maximum strength with minimal weight
- Bright anodized aluminum heat reflector generates more even heat over food holding area
- Reflector assembly is field-adjustable allowing operator to direct heat pattern where needed
- One year parts and labor warranty supported by a service network for worry-free operation. Additional one year warranty on heating element (parts only).
- Mounting and trim options available
- NOTE: Cayenne Heat Strips and Cayenne Light Strips are custom ordered and cannot be cancelled or returned

H48" 208V MED-W S HW

- Sheathed style element for dependability and longer life
- Structurally engineered aluminum heater housing offers maximum strength with minimal weight
- Bright anodized aluminum heat reflector generates more even heat over food holding area
- Reflector assembly is field-adjustable allowing operator to direct heat pattern where needed
- One year parts and labor warranty supported by a service network for worry-free operation. Additional one year warranty on heating element (parts only).
- Mounting and trim options available
- NOTE: Cayenne Heat Strips and Cayenne Light Strips are custom ordered and cannot be cancelled or returned
- See specification sheet for the variable widths, watts, and amps

- Sheathed style element for dependability and longer life
- Structurally engineered aluminum heater housing offers maximum strength with minimal weight
- Bright anodized aluminum heat reflector generates more even heat over food holding area
- Reflector assembly is field-adjustable allowing operator to direct heat pattern where needed
- One year parts and labor warranty supported by a service network for worry-free operation. Additional one year warranty on heating element (parts only).
- Mounting and trim options available
- NOTE: Cayenne Heat Strips and Cayenne Light Strips are custom ordered and cannot be cancelled or returned
- See specification sheet for the variable widths, watts, and amps

H24" 120V MED-W DS RT

- Sheathed style element for dependability and longer life
- Structurally engineered aluminum heater housing offers maximum strength with minimal weight
- Bright anodized aluminum heat reflector generates more even heat over food holding area
- Reflector assembly is field-adjustable allowing operator to direct heat pattern where needed
- One year parts and labor warranty supported by a service network for worry-free operation. Additional one year warranty on heating element (parts only).
- Mounting and trim options available

H60" 120V HIGH-W S RT

- Sheathed style element for dependability and longer life
- Structurally engineered aluminum heater housing offers maximum strength with minimal weight
- Bright anodized aluminum heat reflector generates more even heat over food holding area
- Reflector assembly is field-adjustable allowing operator to direct heat pattern where needed
- One year parts and labor warranty supported by a service network for worry-free operation. Additional one year warranty on heating element (parts only).
- Mounting and trim options available
- NOTE: Cayenne Heat Strips and Cayenne Light Strips are custom ordered and cannot be cancelled or returned
- See specification sheet for the variable widths, watts, and amps

H30" 240V HIGH-W DL FM RI

- Sheathed style element for dependability and longer life
- Structurally engineered aluminum heater housing offers maximum strength with minimal weight
- Bright anodized aluminum heat reflector generates more even heat over food holding area
- Reflector assembly is field-adjustable allowing operator to direct heat pattern where needed
- One year parts and labor warranty supported by a service network for worry-free operation. Additional one year warranty on heating element (parts only).
- Mounting and trim options available
- NOTE: Cayenne Heat Strips and Cayenne Light Strips are custom ordered and cannot be cancelled or returned
- See specification sheet for the variable widths, watts, and amps

H30" 240V MED-W SL

- Sheathed style element for dependability and longer life
- Structurally engineered aluminum heater housing offers maximum strength with minimal weight
- Bright anodized aluminum heat reflector generates more even heat over food holding area
- Reflector assembly is field-adjustable allowing operator to direct heat pattern where needed
- One year parts and labor warranty supported by a service network for worry-free operation. Additional one year warranty on heating element (parts only).
- Mounting and trim options available
- NOTE: Cayenne Heat Strips and Cayenne Light Strips are custom ordered and cannot be cancelled or returned
- See specification sheet for the variable widths, watts, and amps

Case Lot Measurement

Case Width.....15

Case Height.....5.75

Case Length.....30

H30" 208V HIGH-W S

- Sheathed style element for dependability and longer life
- Structurally engineered aluminum heater housing offers maximum strength with minimal weight
- Bright anodized aluminum heat reflector generates more even heat over food holding area
- Reflector assembly is field-adjustable allowing operator to direct heat pattern where needed
- One year parts and labor warranty supported by a service network for worry-free operation. Additional one year warranty on heating element (parts only).
- Mounting and trim options available
- NOTE: Cayenne Heat Strips and Cayenne Light Strips are custom ordered and cannot be cancelled or returned
- See specification sheet for the variable widths, watts, and amps

H42" 120V MED-W SL RT

- Sheathed style element for dependability and longer life
- Structurally engineered aluminum heater housing offers maximum strength with minimal weight
- Bright anodized aluminum heat reflector generates more even heat over food holding area
- Reflector assembly is field-adjustable allowing operator to direct heat pattern where needed
- One year parts and labor warranty supported by a service network for worry-free operation. Additional one year warranty on heating element (parts only).
- Mounting and trim options available
- NOTE: Cayenne Heat Strips and Cayenne Light Strips are custom ordered and cannot be cancelled or returned
- See specification sheet for the variable widths, watts, and amps

H24" 240V MED-W DS OT

- Sheathed style element for dependability and longer life
- Structurally engineered aluminum heater housing offers maximum strength with minimal weight
- Bright anodized aluminum heat reflector generates more even heat over food holding area
- Reflector assembly is field-adjustable allowing operator to direct heat pattern where needed
- One year parts and labor warranty supported by a service network for worry-free operation. Additional one year warranty on heating element (parts only).
- Mounting and trim options available
- NOTE: Cayenne Heat Strips and Cayenne Light Strips are custom ordered and cannot be cancelled or returned
- See specification sheet for the variable widths, watts, and amps

H24" 120V HIGH-W S RT FM

- Sheathed style element for dependability and longer life
- Structurally engineered aluminum heater housing offers maximum strength with minimal weight
- Bright anodized aluminum heat reflector generates more even heat over food holding area
- Reflector assembly is field-adjustable allowing operator to direct heat pattern where needed
- One year parts and labor warranty supported by a service network for worry-free operation. Additional one year warranty on heating element (parts only).
- Mounting and trim options available
- NOTE: Cayenne Heat Strips and Cayenne Light Strips are custom ordered and cannot be cancelled or returned
- See specification sheet for the variable widths, watts, and amps

24-inch 120-volt medium-wattage Cayenne® heat strip for hard-wire installation

Keep food items hot and fresh with the Cayenne heat strip by Vollrath. It features a structurally engineered aluminum housing that offers maximum strength with minimal weight. The unique element ensures impressive heat production, with a sheathed design f

- Structurally engineered aluminum housing offers maximum strength with minimal weight
- Sheathed element design provides improved dependability and longevity
- Anodized bright aluminum reflector ensures evenly dispersed heat and creates a large temperature zone above 140°F for safer food holding
- Toggle switches are easy to use
- Two screws allow quick service access
- Stainless steel mounting brackets with preset mounting holes provide proper spacing for safe installation
- Fixed or remote switch installation options offer flexibility
- Optional Kool-Touch trim (Vollrath item number 1789724, sold separately) is heat-resistant for increased safety
- Please note this is a made-to-order item. These items require additional time for fulfillment. Made-to-order items cannot be changed, canceled or returned and may be subject to a minimum-order quantity. Contact your Vollrath sales representative for details.

60-inch 120-volt medium-wattage Cayenne® heat strip for hard-wire installation

Keep food items hot and fresh with the Cayenne heat strip by Vollrath. It features a structurally engineered aluminum housing that offers maximum strength with minimal weight. The unique element ensures impressive heat production, with a sheathed design f

- Structurally engineered aluminum housing offers maximum strength with minimal weight
- Sheathed element design provides improved dependability and longevity
- Anodized bright aluminum reflector ensures evenly dispersed heat and creates a large temperature zone above 140°F for safer food holding
- Toggle switches are easy to use
- Two screws allow quick service access
- Stainless steel mounting brackets with preset mounting holes provide proper spacing for safe installation
- Fixed or remote switch installation options offer flexibility
- Optional Kool-Touch trim (Vollrath item number 1789760, sold separately) is heat-resistant for increased safety
- Please note this is a made-to-order item. These items require additional time for fulfillment. Made-to-order items cannot be changed, canceled or returned and may be subject to a minimum-order quantity. Contact your Vollrath sales representative for details.

54-inch 120-volt stainless steel flush-mount drop-in heated shelf in natural finish with thermostatic controls

Create a sleek self-service station with the drop-in heated shelf by Vollrath. Designed to blend seamlessly with other Vollrath drop-ins, this stainless steel heated shelf features a natural finish for even heating and uniform results. Separate warming zones, which are identified easily by stamped marks, can be used individually or paired for maximum energy efficiency. Nine heat settings offer exceptional versatility, and digital thermostatic controls ensure accurate heating. The sleek design creates a streamlined appearance, making this heated shelf an attractive addition to your buffet or serving area.

- Stainless steel construction is durable and long-lasting
- Natural finish for even heating and uniform results
- Reliable thermostatic controls ensure accurate heating
- Nine heat settings offer excellent versatility
- Two warming zones can be used individually or paired for maximum energy efficiency
- Warming zones are identified easily with stamped marks
- NSF-certified
- Flush-mount drop-in design can be installed into most countertop materials
- 6-foot cord with plug does not require hardwiring
- 5-foot control cord allows remote mounting

24-inch 120-volt aluminum flush-mount drop-in heated shelf with thermostatic controls and hardcoat strength coating in black

Create a sleek self-service station with the 24-inch flush-mount drop-in heated shelf by Vollrath. Designed to blend seamlessly with other Vollrath drop-ins, this aluminum heated shelf features a hardcoat strength coating that alters the surface of the shelf with a unique electrochemical bonding process that results in a nonporous and nonreactive surface that is 400 percent stronger. Separate warming zones, which are identified easily by stamped marks, can be used individually or paired for maximum energy efficiency. Nine heat settings offer exceptional versatility, and digital thermostatic controls ensure accurate heating. The black color creates a streamlined appearance, making this heated shelf an attractive addition to your buffet or serving area.

- Aluminum construction is exceptionally durable
- Hardcoat strength coating alters the surface of the shelf with a unique electrochemical bonding process that results in a stronger, nonporous and nonreactive surface
- Reliable thermostatic controls ensure accurate heating
- Nine heat settings offer excellent versatility
- Two warming zones can be used individually or paired for maximum energy efficiency
- Warming zones are identified easily with stamped marks
- Must be hand-washed to preserve unique hardcoat surface
- Recessed design is sized to uniformly align with other Vollrath® drop-ins for a clean visual presentation
- 6-foot cord with plug does not require hardwiring

42-inch 120-volt stainless steel recessed drop-in heated shelf in natural finish with thermostatic controls

Create a sleek self-service station with the 42-inch recessed drop-in heated shelf by Vollrath. Designed to blend seamlessly with other Vollrath drop-ins, this stainless steel heated shelf features a natural finish for even heating and uniform results. Separate warming zones, which are identified easily by stamped marks, can be used individually or paired for maximum energy efficiency. Nine heat settings offer exceptional versatility, and digital thermostatic controls ensure accurate heating. The sleek design creates a streamlined appearance, making this heated shelf an attractive addition to your buffet or serving area.

- Stainless steel construction is durable and long-lasting
- Natural finish for even heating and uniform results
- Reliable thermostatic controls ensure accurate heating
- Nine heat settings offer excellent versatility
- Two warming zones can be used individually or paired for maximum energy efficiency
- Warming zones are identified easily with stamped marks
- NSF-certified
- Recessed design is sized to uniformly align with other Vollrath® drop-ins for a clean visual presentation
- 6-foot cord with plug does not require hardwiring
- 6-foot power cord, 4-foot control cord
- NSF-certified
- Please note this is a made-to-order item. These items require additional time for fulfillment. Made-to-order items cannot be changed, canceled or returned and may be subject to a minimum-order quantity. Contact your Vollrath sales representative for details.

30-inch 120-volt aluminum recessed drop-in heated shelf with thermostatic controls and hardcoat strength coating in black

Create a sleek self-service station with the 30-inch recessed drop-in heated shelf by Vollrath. Designed to blend seamlessly with other Vollrath drop-ins, this aluminum heated shelf features a hardcoat strength coating that alters the surface of the shelf with a unique electrochemical bonding process that results in a nonporous and nonreactive surface that is 400 percent stronger. Separate warming zones, which are identified easily by stamped marks, can be used individually or paired for maximum energy efficiency. Nine heat settings offer exceptional versatility, and digital thermostatic controls ensure accurate heating. The black color creates a streamlined appearance, making this heated shelf an attractive addition to your buffet or serving area.

- Aluminum construction is exceptionally durable
- Hardcoat strength coating alters the surface of the shelf with a unique electrochemical bonding process that results in a stronger, nonporous and nonreactive surface
- Reliable thermostatic controls ensure accurate heating
- Nine heat settings offer excellent versatility
- Two warming zones can be used individually or paired for maximum energy efficiency
- Warming zones are identified easily with stamped marks
- Must be hand-washed to preserve unique hardcoat surface
- NSF-certified
- Recessed design is sized to uniformly align with other Vollrath® drop-ins for a clean visual presentation
- 6-foot cord with plug does not require hardwiring
- 5-foot control cord allows remote mounting
- Adjustor bars are recommended when using fractional-size pans
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces
