54-inch 120-volt stainless steel recessed drop-in heated shelf in natural finish with thermostatic controls

Create a sleek self-service station with the 54-inch recessed drop-in heated shelf by Vollrath. Designed to blend seamlessly with other Vollrath drop-ins, this stainless steel heated shelf features a natural finish for even heating and uniform results. Separate warming zones, which are identified easily by stamped marks, can be used individually or paired for maximum energy efficiency. Nine heat settings offer exceptional versatility, and digital thermostatic controls ensure accurate heating. The sleek design creates a streamlined appearance, making this heated shelf an attractive addition to your buffet or serving area.

- Stainless steel construction is durable and long-lasting
- Natural finish for even heating and uniform results
- Reliable thermostatic controls ensure accurate heating
- Nine heat settings offer excellent versatility
- Two warming zones can be used individually or paired for maximum energy efficiency
- Warming zones are identified easily with stamped marks
- NSF-certified
- Flush-mount drop-in design can be installed into most countertop materials
- 6-foot cord with plug does not require hardwiring
- 5-foot control cord allows remote mounting
- Vollrath-style well
- Please note this is a made-to-order item. These items require additional time for fulfillment. Made-to-order items cannot be changed, canceled or returned and may be subject to a minimum-order quantity. Contact your Vollrath sales representative for details.

54-inch 120-volt aluminum flush-mount drop-in heated shelf with thermostatic controls and hardcoat strength coating in black

Create a sleek self-service station with the 54-inch flush-mount drop-in heated shelf by Vollrath. Designed to blend seamlessly with other Vollrath drop-ins, this aluminum heated shelf features a hardcoat strength coating that alters the surface of the shelf with a unique electrochemical bonding process that results in a nonporous and nonreactive surface that is 400 percent stronger. Separate warming zones, which are identified easily by stamped marks, can be used individually or paired for maximum energy efficiency. Nine heat settings offer exceptional versatility, and digital thermostatic controls ensure accurate heating. The black color creates a streamlined appearance, making this heated shelf an attractive addition to your buffet or serving area.

- Aluminum construction is exceptionally durable
- Hardcoat strength coating alters the surface of the shelf with a unique electrochemical bonding process that results in a stronger, nonporous and nonreactive surface
- Reliable thermostatic controls ensure accurate heating
- Nine heat settings offer excellent versatility
- Two warming zones can be used individually or paired for maximum energy efficiency
- Warming zones are identified easily with stamped marks
- Must be hand-washed to preserve unique hardcoat surface
- NSF-certified
- Flush-mount drop-in design can be installed into most countertop materials
- 6-foot cord with plug does not require hardwiring
- Industry-style well
- 6-foot power cord, 4-foot control cord
- Please note this is a made-to-order item. These items require additional time for fulfillment. Made-to-order items cannot be changed, canceled or returned and may be subject to a minimum-order quantity. Contact your Vollrath sales representative for details.

60-inch 120-volt aluminum recessed drop-in heated shelf with thermostatic controls and hardcoat strength coating in black

Create a sleek self-service station with the 60-inch recessed drop-in heated shelf by Vollrath. Designed to blend seamlessly with other Vollrath drop-ins, this aluminum heated shelf features a hardcoat strength coating that alters the surface of the shelf with a unique electrochemical bonding process that results in a nonporous and nonreactive surface that is 400 percent stronger. Separate warming zones, which are identified easily by stamped marks, can be used individually or paired for maximum energy efficiency. Nine heat settings offer exceptional versatility, and digital thermostatic controls ensure accurate heating. The black color creates a streamlined appearance, making this heated shelf an attractive addition to your buffet or serving area.

- Aluminum construction is exceptionally durable
- Hardcoat strength coating alters the surface of the shelf with a unique electrochemical bonding process that results in a stronger, nonporous and nonreactive surface
- Reliable thermostatic controls ensure accurate heating
- Nine heat settings offer excellent versatility
- Two warming zones can be used individually or paired for maximum energy efficiency
- Warming zones are identified easily with stamped marks
- Must be hand-washed to preserve unique hardcoat surface
- NSF-certified
- Flush-mount drop-in design can be installed into most countertop materials
- 6-foot cord with plug does not require hardwiring
- Vollrath-style well
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces
- Please note this is a made-to-order item. These items require additional time for fulfillment. Made-to-order items cannot be changed, canceled or returned and may be subject to a minimum-order quantity. Contact your Vollrath sales representative for details.
- 6-foot power cord, 4-foot control cord

18-inch 208-volt low-profile heat strip in natural finish

The Vollrath® low-profile heat strip keeps all your hot food items appetizingly warm. The durable construction provides maximum strength with minimal weight, while the slim design creates a clean appearance and improves visibility. This heat strip is incredibly powerful and easily maintains perfect serving temperatures. The heating element works with the reflector to provide efficient, consistent and evenly dissipated heat, and the convenient remote infinite control gives you the freedom to select the perfect setting for your needs, making this heat strip the perfect addition to any breath guard in your hot food area.

- Slim design is 65% smaller than the original Vollrath heat strip and 19-35% smaller than the leading competitors, creating a clean appearance and improving visibility
- Designed to maintain ideal serving temperatures for all your hot food items by providing a consistent, even blanket of heat
- Powerful heating element maximizes heat production and efficiency and offers up to 14% more heat penetration than the leading competitive heat strips when heating a 12- x 20-inch pan
- Reflector ensures consistent, even heat distribution to better maintain optimal food quality

- All units come standard with strong, 3-inch mounting brackets. Optional 1- and 2-inch brackets can be purchased separately
- Strong brackets promise reliable mount under breath guard
- Convenient toggle control allows for simple on/off functionality
- Natural finish creates a sleek look

42-inch 120-volt low-profile heat strip in white

The Vollrath® low-profile heat strip keeps all your hot food items appetizingly warm. The durable construction provides maximum strength with minimal weight, while the slim design creates a clean appearance and improves visibility. This heat strip is incredibly powerful and easily maintains perfect serving temperatures. The heating element works with the reflector to provide efficient, consistent and evenly dissipated heat, and the convenient remote infinite control gives you the freedom to select the perfect setting for your needs, making this heat strip the perfect addition to any breath guard in your hot food area.

- Slim design is 65% smaller than the original Vollrath heat strip and 19-35% smaller than the leading competitors, creating a clean appearance and improving visibility
- Designed to maintain ideal serving temperatures for all your hot food items by providing a consistent, even blanket of heat
- Powerful heating element maximizes heat production and efficiency and offers up to 14% more heat penetration than the leading competitive heat strips when heating a 12- x 20-inch pan
- Reflector ensures consistent, even heat distribution to better maintain optimal food quality

- All units come standard with strong, 3-inch mounting brackets. Optional 1- and 2-inch brackets can be purchased separately
- Strong brackets promise reliable mount under breath guard
- Convenient remote infinite control allows you to select ideal temperature
- White color creates a clean, fresh look

48-inch 208-volt low-profile heat strip in natural finish

The Vollrath® low-profile heat strip keeps all your hot food items appetizingly warm. The durable construction provides maximum strength with minimal weight, while the slim design creates a clean appearance and improves visibility. This heat strip is incredibly powerful and easily maintains perfect serving temperatures. The heating element works with the reflector to provide efficient, consistent and evenly dissipated heat, and the convenient remote infinite control gives you the freedom to select the perfect setting for your needs, making this heat strip the perfect addition to any breath guard in your hot food area.

- Slim design is 65% smaller than the original Vollrath heat strip and 19-35% smaller than the leading competitors, creating a clean appearance and improving visibility
- Designed to maintain ideal serving temperatures for all your hot food items by providing a consistent, even blanket of heat
- Powerful heating element maximizes heat production and efficiency and offers up to 14% more heat penetration than the leading competitive heat strips when heating a 12- x 20-inch pan
- Reflector ensures consistent, even heat distribution to better maintain optimal food quality

- All units come standard with strong, 3-inch mounting brackets. Optional 1- and 2-inch brackets can be purchased separately
- Strong brackets promise reliable mount under breath guard
- Convenient toggle control allows for simple on/off functionality
- Natural finish creates a sleek look

This heat strip is incredibly powerful and easily maintains perfect serving temperatures. The heating element works with the reflector to provide efficient, consistent and evenly dissipated heat, and the convenient remote infinite control gives you the freedom to select the perfect setting for your needs, making this heat strip the perfect addition to any breath guard in your hot food area.

- Slim design is 65% smaller than the original Vollrath heat strip and 19-35% smaller than the leading competitors, creating a clean appearance and improving visibility
- Designed to maintain ideal serving temperatures for all your hot food items by providing a consistent, even blanket of heat
- Powerful heating element maximizes heat production and efficiency and offers up to 14% more heat penetration than the leading competitive heat strips when heating a 12- x 20-inch pan
- Reflector ensures consistent, even heat distribution to better maintain optimal food quality

- All units come standard with strong, 3-inch mounting brackets. Optional 1- and 2-inch brackets can be purchased separately
- Strong brackets promise reliable mount under breath guard
- Convenient remote infinite control allows you to select ideal temperature
- White color creates a clean, fresh look

36-inch 208-volt low-profile heat strip in copper vein

The Vollrath® low-profile heat strip keeps all your hot food items appetizingly warm. The durable construction provides maximum strength with minimal weight, while the slim design creates a clean appearance and improves visibility. This heat strip is incredibly powerful and easily maintains perfect serving temperatures. The heating element works with the reflector to provide efficient, consistent and evenly dissipated heat, and the convenient remote infinite control gives you the freedom to select the perfect setting for your needs, making this heat strip the perfect addition to any breath guard in your hot food area.

- Slim design is 65% smaller than the original Vollrath heat strip and 19-35% smaller than the leading competitors, creating a clean appearance and improving visibility
- Designed to maintain ideal serving temperatures for all your hot food items by providing a consistent, even blanket of heat
- Powerful heating element maximizes heat production and efficiency and offers up to 14% more heat penetration than the leading competitive heat strips when heating a 12- x 20-inch pan
- Reflector ensures consistent, even heat distribution to better maintain optimal food quality

- All units come standard with strong, 3-inch mounting brackets. Optional 1- and 2-inch brackets can be purchased separately
- Strong brackets promise reliable mount under breath guard
- Convenient remote infinite control allows you to select ideal temperature
- Copper vein color creates a warm, rich appearance

72-inch 208-volt low-profile heat strip in white

The Vollrath® low-profile heat strip keeps all your hot food items appetizingly warm. The durable construction provides maximum strength with minimal weight, while the slim design creates a clean appearance and improves visibility. This heat strip is incredibly powerful and easily maintains perfect serving temperatures. The heating element works with the reflector to provide efficient, consistent and evenly dissipated heat, and the convenient remote infinite control gives you the freedom to select the perfect setting for your needs, making this heat strip the perfect addition to any breath guard in your hot food area.

- Slim design is 65% smaller than the original Vollrath heat strip and 19-35% smaller than the leading competitors, creating a clean appearance and improving visibility
- Designed to maintain ideal serving temperatures for all your hot food items by providing a consistent, even blanket of heat
- Powerful heating element maximizes heat production and efficiency and offers up to 14% more heat penetration than the leading competitive heat strips when heating a 12- x 20-inch pan
- Reflector ensures consistent, even heat distribution to better maintain optimal food quality

- All units come standard with strong, 3-inch mounting brackets. Optional 1- and 2-inch brackets can be purchased separately
- Strong brackets promise reliable mount under breath guard
- Convenient toggle control allows for simple on/off functionality
- White color creates a clean, fresh look

84-inch 120-volt low-profile heat strip in silver vein

The Vollrath® low-profile heat strip keeps all your hot food items appetizingly warm. The durable construction provides maximum strength with minimal weight, while the slim design creates a clean appearance and improves visibility. This heat strip is incredibly powerful and easily maintains perfect serving temperatures. The heating element works with the reflector to provide efficient, consistent and evenly dissipated heat, and the convenient remote infinite control gives you the freedom to select the perfect setting for your needs, making this heat strip the perfect addition to any breath guard in your hot food area.

- Slim design is 65% smaller than the original Vollrath heat strip and 19-35% smaller than the leading competitors, creating a clean appearance and improving visibility
- Designed to maintain ideal serving temperatures for all your hot food items by providing a consistent, even blanket of heat
- Powerful heating element maximizes heat production and efficiency and offers up to 14% more heat penetration than the leading competitive heat strips when heating a 12- x 20-inch pan
- Reflector ensures consistent, even heat distribution to better maintain optimal food quality

- All units come standard with strong, 3-inch mounting brackets. Optional 1- and 2-inch brackets can be purchased separately
- Strong brackets promise reliable mount under breath guard
- Convenient remote infinite control allows you to select ideal temperature
- Silver color creates a classic look

- Slim design is 65% smaller than the original Vollrath heat strip and 19-35% smaller than the leading competitors, creating a clean appearance and improving visibility
- Designed to maintain ideal serving temperatures for all your hot food items by providing a consistent, even blanket of heat
- Powerful heating element maximizes heat production and efficiency and offers up to 14% more heat penetration than the leading competitive heat strips when heating a 12- x 20-inch pan
- Reflector ensures consistent, even heat distribution to better maintain optimal food quality

- All units come standard with strong, 3-inch mounting brackets. Optional 1- and 2-inch brackets can be purchased separately
- Strong brackets promise reliable mount under breath guard
- Convenient remote infinite control allows you to select ideal temperature
- Black color creates a sophisticated appearance

84-inch 208-volt low-profile heat strip in black

The Vollrath® low-profile heat strip keeps all your hot food items appetizingly warm. The durable construction provides maximum strength with minimal weight, while the slim design creates a clean appearance and improves visibility. This heat strip is incredibly powerful and easily maintains perfect serving temperatures. The heating element works with the reflector to provide efficient, consistent and evenly dissipated heat, and the convenient remote infinite control gives you the freedom to select the perfect setting for your needs, making this heat strip the perfect addition to any breath guard in your hot food area.

- Slim design is 65% smaller than the original Vollrath heat strip and 19-35% smaller than the leading competitors, creating a clean appearance and improving visibility
- Designed to maintain ideal serving temperatures for all your hot food items by providing a consistent, even blanket of heat
- Powerful heating element maximizes heat production and efficiency and offers up to 14% more heat penetration than the leading competitive heat strips when heating a 12- x 20-inch pan

The Vollrath® low-profile heat strip keeps all your hot food items appetizingly warm. The durable construction provides maximum strength with minimal weight, while the slim design creates a clean appearance and improves visibility. This heat strip is incredibly powerful and easily maintains perfect serving temperatures. The heating element works with the reflector to provide efficient, consistent and evenly dissipated heat, and the convenient remote infinite control gives you the freedom to select the perfect setting for your needs, making this heat strip the perfect addition to any breath guard in your hot food area.

- Slim design is 65% smaller than the original Vollrath heat strip and 19-35% smaller than the leading competitors, creating a clean appearance and improving visibility
- Designed to maintain ideal serving temperatures for all your hot food items by providing a consistent, even blanket of heat
- Powerful heating element maximizes heat production and efficiency and offers up to 14% more heat penetration than the leading competitive heat strips when heating a 12- x 20-inch pan
- Reflector ensures consistent, even heat distribution to better maintain optimal food quality

- All units come standard with strong, 3-inch mounting brackets. Optional 1- and 2-inch brackets can be purchased separately
- Strong brackets promise reliable mount under breath guard
- Convenient remote infinite control allows you to select ideal temperature
- Black color creates a sophisticated appearance

84-inch 120-volt low-profile heat strip in black

The Vollrath® low-profile heat strip keeps all your hot food items appetizingly warm. The durable construction provides maximum strength with minimal weight, while the slim design creates a clean appearance and improves visibility. This heat strip is incredibly powerful and easily maintains perfect serving temperatures. The heating element works with the reflector to provide efficient, consistent and evenly dissipated heat, and the convenient remote infinite control gives you the freedom to select the perfect setting for your needs, making this heat strip the perfect addition to any breath guard in your hot food area.

- Slim design is 65% smaller than the original Vollrath heat strip and 19-35% smaller than the leading competitors, creating a clean appearance and improving visibility
- Designed to maintain ideal serving temperatures for all your hot food items by providing a consistent, even blanket of heat
- Powerful heating element maximizes heat production and efficiency and offers up to 14% more heat penetration than the leading competitive heat strips when heating a 12- x 20-inch pan
- Reflector ensures consistent, even heat distribution to better maintain optimal food quality

- All units come standard with strong, 3-inch mounting brackets. Optional 1- and 2-inch brackets can be purchased separately
- Strong brackets promise reliable mount under breath guard
- Convenient toggle control allows for simple on/off functionality
- Black color creates a sophisticated appearance

36-inch 208-volt low-profile heat strip in copper vein

The Vollrath® low-profile heat strip keeps all your hot food items appetizingly warm. The durable construction provides maximum strength with minimal weight, while the slim design creates a clean appearance and improves visibility. This heat strip is incredibly powerful and easily maintains perfect serving temperatures. The heating element works with the reflector to provide efficient, consistent and evenly dissipated heat, and the convenient remote infinite control gives you the freedom to select the perfect setting for your needs, making this heat strip the perfect addition to any breath guard in your hot food area.

- Slim design is 65% smaller than the original Vollrath heat strip and 19-35% smaller than the leading competitors, creating a clean appearance and improving visibility
- Designed to maintain ideal serving temperatures for all your hot food items by providing a consistent, even blanket of heat
- Powerful heating element maximizes heat production and efficiency and offers up to 14% more heat penetration than the leading competitive heat strips when heating a 12- x 20-inch pan
- Reflector ensures consistent, even heat distribution to better maintain optimal food quality

- All units come standard with strong, 3-inch mounting brackets. Optional 1- and 2-inch brackets can be purchased separately
- Strong brackets promise reliable mount under breath guard
- Convenient toggle control allows for simple on/off functionality
- Copper vein color creates a warm, rich appearance

- Powerful heating element maximizes heat production and efficiency and offers up to 14% more heat penetration than the leading competitive heat strips when heating a 12- x 20-inch pan
- Reflector ensures consistent, even heat distribution to better maintain optimal food quality

- All units come standard with strong, 3-inch mounting brackets. Optional 1- and 2-inch brackets can be purchased separately
- Strong brackets promise reliable mount under breath guard
- Convenient remote infinite control allows you to select ideal temperature
- White color creates a clean, fresh look

42-inch 208-volt low-profile heat strip in copper vein

The Vollrath® low-profile heat strip keeps all your hot food items appetizingly warm. The durable construction provides maximum strength with minimal weight, while the slim design creates a clean appearance and improves visibility. This heat strip is incredibly powerful and easily maintains perfect serving temperatures. The heating element works with the reflector to provide efficient, consistent and evenly dissipated heat, and the convenient remote infinite control gives you the freedom to select the perfect setting for your needs, making this heat strip the perfect addition to any breath guard in your hot food area.

- Slim design is 65% smaller than the original Vollrath heat strip and 19-35% smaller than the leading competitors, creating a clean appearance and improving visibility
- Designed to maintain ideal serving temperatures for all your hot food items by providing a consistent, even blanket of heat
- Powerful heating element maximizes heat production and efficiency and offers up to 14% more heat penetration than the leading competitive heat strips when heating a 12- x 20-inch pan
- Reflector ensures consistent, even heat distribution to better maintain optimal food quality

- All units come standard with strong, 3-inch mounting brackets. Optional 1- and 2-inch brackets can be purchased separately
- Strong brackets promise reliable mount under breath guard
- Convenient toggle control allows for simple on/off functionality
- Copper vein color creates a warm, rich appearance

The durable construction provides maximum strength with minimal weight, while the slim design creates a clean appearance and improves visibility. This heat strip is incredibly powerful and easily maintains perfect serving temperatures. The heating element works with the reflector to provide efficient, consistent and evenly dissipated heat, and the convenient remote infinite control gives you the freedom to select the perfect setting for your needs, making this heat strip the perfect addition to any breath guard in your hot food area.

- Slim design is 65% smaller than the original Vollrath heat strip and 19-35% smaller than the leading competitors, creating a clean appearance and improving visibility
- Designed to maintain ideal serving temperatures for all your hot food items by providing a consistent, even blanket of heat
- Powerful heating element maximizes heat production and efficiency and offers up to 14% more heat penetration than the leading competitive heat strips when heating a 12- x 20-inch pan
- Reflector ensures consistent, even heat distribution to better maintain optimal food quality

- All units come standard with strong, 3-inch mounting brackets. Optional 1- and 2-inch brackets can be purchased separately
- Strong brackets promise reliable mount under breath guard
- Convenient remote infinite control allows you to select ideal temperature
- Black color creates a sophisticated appearance

42-inch 120-volt low-profile heat strip in copper vein

The Vollrath® low-profile heat strip keeps all your hot food items appetizingly warm. The durable construction provides maximum strength with minimal weight, while the slim design creates a clean appearance and improves visibility. This heat strip is incredibly powerful and easily maintains perfect serving temperatures. The heating element works with the reflector to provide efficient, consistent and evenly dissipated heat, and the convenient remote infinite control gives you the freedom to select the perfect setting for your needs, making this heat strip the perfect addition to any breath guard in your hot food area.

- Slim design is 65% smaller than the original Vollrath heat strip and 19-35% smaller than the leading competitors, creating a clean appearance and improving visibility
- Designed to maintain ideal serving temperatures for all your hot food items by providing a consistent, even blanket of heat
- Powerful heating element maximizes heat production and efficiency and offers up to 14% more heat penetration than the leading competitive heat strips when heating a 12- x 20-inch pan
- Reflector ensures consistent, even heat distribution to better maintain optimal food quality

- All units come standard with strong, 3-inch mounting brackets. Optional 1- and 2-inch brackets can be purchased separately
- Strong brackets promise reliable mount under breath guard
- Convenient toggle control allows for simple on/off functionality
- Copper vein color creates a warm, rich appearance

60-inch 120-volt low-profile heat strip in brass

The Vollrath® low-profile heat strip keeps all your hot food items appetizingly warm. The durable construction provides maximum strength with minimal weight, while the slim design creates a clean appearance and improves visibility. This heat strip is incredibly powerful and easily maintains perfect serving temperatures. The heating element works with the reflector to provide efficient, consistent and evenly dissipated heat, and the convenient remote infinite control gives you the freedom to select the perfect setting for your needs, making this heat strip the perfect addition to any breath guard in your hot food area.

- Slim design is 65% smaller than the original Vollrath heat strip and 19-35% smaller than the leading competitors, creating a clean appearance and improving visibility
- Designed to maintain ideal serving temperatures for all your hot food items by providing a consistent, even blanket of heat
- Powerful heating element maximizes heat production and efficiency and offers up to 14% more heat penetration than the leading competitive heat strips when heating a 12- x 20-inch pan
- Reflector ensures consistent, even heat distribution to better maintain optimal food quality

- All units come standard with strong, 3-inch mounting brackets. Optional 1- and 2-inch brackets can be purchased separately
- Strong brackets promise reliable mount under breath guard
- Convenient remote infinite control allows you to select ideal temperature
- Brass color creates a timeless appearance

72-inch 120-volt low-profile heat strip in chrome

The Vollrath® low-profile heat strip keeps all your hot food items appetizingly warm. The durable construction provides maximum strength with minimal weight, while the slim design creates a clean appearance and improves visibility. This heat strip is incredibly powerful and easily maintains perfect serving temperatures. The heating element works with the reflector to provide efficient, consistent and evenly dissipated heat, and the convenient remote infinite control gives you the freedom to select the perfect setting for your needs, making this heat strip the perfect addition to any breath guard in your hot food area.

- Slim design is 65% smaller than the original Vollrath heat strip and 19-35% smaller than the leading competitors, creating a clean appearance and improving visibility
- Designed to maintain ideal serving temperatures for all your hot food items by providing a consistent, even blanket of heat
- Powerful heating element maximizes heat production and efficiency and offers up to 14% more heat penetration than the leading competitive heat strips when heating a 12- x 20-inch pan
- Reflector ensures consistent, even heat distribution to better maintain optimal food quality

- All units come standard with strong, 3-inch mounting brackets. Optional 1- and 2-inch brackets can be purchased separately
- Strong brackets promise reliable mount under breath guard
- Convenient remote infinite control allows you to select ideal temperature
- Chrome color creates a polished appearance

- Slim design is 65% smaller than the original Vollrath heat strip and 19-35% smaller than the leading competitors, creating a clean appearance and improving visibility
- Designed to maintain ideal serving temperatures for all your hot food items by providing a consistent, even blanket of heat
- Powerful heating element maximizes heat production and efficiency and offers up to 14% more heat penetration than the leading competitive heat strips when heating a 12- x 20-inch pan
- Reflector ensures consistent, even heat distribution to better maintain optimal food quality

- All units come standard with strong, 3-inch mounting brackets. Optional 1- and 2-inch brackets can be purchased separately
- Strong brackets promise reliable mount under breath guard
- Convenient remote infinite control allows you to select ideal temperature
- Black color creates a sophisticated appearance

66-inch 120-volt low-profile heat strip in brass

The Vollrath® low-profile heat strip keeps all your hot food items appetizingly warm. The durable construction provides maximum strength with minimal weight, while the slim design creates a clean appearance and improves visibility. This heat strip is incredibly powerful and easily maintains perfect serving temperatures. The heating element works with the reflector to provide efficient, consistent and evenly dissipated heat, and the convenient remote infinite control gives you the freedom to select the perfect setting for your needs, making this heat strip the perfect addition to any breath guard in your hot food area.

- Slim design is 65% smaller than the original Vollrath heat strip and 19-35% smaller than the leading competitors, creating a clean appearance and improving visibility
- Designed to maintain ideal serving temperatures for all your hot food items by providing a consistent, even blanket of heat
- Powerful heating element maximizes heat production and efficiency and offers up to 14% more heat penetration than the leading competitive heat strips when heating a 12- x 20-inch pan
- Reflector ensures consistent, even heat distribution to better maintain optimal food quality

- All units come standard with strong, 3-inch mounting brackets. Optional 1- and 2-inch brackets can be purchased separately
- Strong brackets promise reliable mount under breath guard
- Convenient toggle control allows for simple on/off functionality
- Brass color creates a timeless appearance

78-inch 208-volt low-profile heat strip in natural finish

The Vollrath® low-profile heat strip keeps all your hot food items appetizingly warm. The durable construction provides maximum strength with minimal weight, while the slim design creates a clean appearance and improves visibility. This heat strip is incredibly powerful and easily maintains perfect serving temperatures. The heating element works with the reflector to provide efficient, consistent and evenly dissipated heat, and the convenient remote infinite control gives you the freedom to select the perfect setting for your needs, making this heat strip the perfect addition to any breath guard in your hot food area.

- Slim design is 65% smaller than the original Vollrath heat strip and 19-35% smaller than the leading competitors, creating a clean appearance and improving visibility
- Designed to maintain ideal serving temperatures for all your hot food items by providing a consistent, even blanket of heat
- Powerful heating element maximizes heat production and efficiency and offers up to 14% more heat penetration than the leading competitive heat strips when heating a 12- x 20-inch pan
- Reflector ensures consistent, even heat distribution to better maintain optimal food quality

- All units come standard with strong, 3-inch mounting brackets. Optional 1- and 2-inch brackets can be purchased separately
- Strong brackets promise reliable mount under breath guard
- Convenient toggle control allows for simple on/off functionality
- Natural finish creates a sleek look

18-inch 208-volt low-profile heat strip in white

The Vollrath® low-profile heat strip keeps all your hot food items appetizingly warm. The durable construction provides maximum strength with minimal weight, while the slim design creates a clean appearance and improves visibility. This heat strip is incredibly powerful and easily maintains perfect serving temperatures. The heating element works with the reflector to provide efficient, consistent and evenly dissipated heat, and the convenient remote infinite control gives you the freedom to select the perfect setting for your needs, making this heat strip the perfect addition to any breath guard in your hot food area.

- Slim design is 65% smaller than the original Vollrath heat strip and 19-35% smaller than the leading competitors, creating a clean appearance and improving visibility
- Designed to maintain ideal serving temperatures for all your hot food items by providing a consistent, even blanket of heat
- Powerful heating element maximizes heat production and efficiency and offers up to 14% more heat penetration than the leading competitive heat strips when heating a 12- x 20-inch pan
- Reflector ensures consistent, even heat distribution to better maintain optimal food quality

- All units come standard with strong, 3-inch mounting brackets. Optional 1- and 2-inch brackets can be purchased separately
- Strong brackets promise reliable mount under breath guard
- Convenient remote infinite control allows you to select ideal temperature
- White color creates a clean, fresh look

36-inch 120-volt low-profile heat strip in white

The Vollrath® low-profile heat strip keeps all your hot food items appetizingly warm. The durable construction provides maximum strength with minimal weight, while the slim design creates a clean appearance and improves visibility. This heat strip is incredibly powerful and easily maintains perfect serving temperatures. The heating element works with the reflector to provide efficient, consistent and evenly dissipated heat, and the convenient remote infinite control gives you the freedom to select the perfect setting for your needs, making this heat strip the perfect addition to any breath guard in your hot food area.

- Slim design is 65% smaller than the original Vollrath heat strip and 19-35% smaller than the leading competitors, creating a clean appearance and improving visibility
- Designed to maintain ideal serving temperatures for all your hot food items by providing a consistent, even blanket of heat
- Powerful heating element maximizes heat production and efficiency and offers up to 14% more heat penetration than the leading competitive heat strips when heating a 12- x 20-inch pan
- Reflector ensures consistent, even heat distribution to better maintain optimal food quality

- All units come standard with strong, 3-inch mounting brackets. Optional 1- and 2-inch brackets can be purchased separately
- Strong brackets promise reliable mount under breath guard
- Convenient remote infinite control allows you to select ideal temperature
- White color creates a clean, fresh look

- Slim design is 65% smaller than the original Vollrath heat strip and 19-35% smaller than the leading competitors, creating a clean appearance and improving visibility
- Designed to maintain ideal serving temperatures for all your hot food items by providing a consistent, even blanket of heat
- Powerful heating element maximizes heat production and efficiency and offers up to 14% more heat penetration than the leading competitive heat strips when heating a 12- x 20-inch pan
- Reflector ensures consistent, even heat distribution to better maintain optimal food quality

- All units come standard with strong, 3-inch mounting brackets. Optional 1- and 2-inch brackets can be purchased separately
- Strong brackets promise reliable mount under breath guard
- Convenient toggle control allows for simple on/off functionality
- Black color creates a sophisticated appearance

42-inch 208-volt low-profile heat strip in brass

The Vollrath® low-profile heat strip keeps all your hot food items appetizingly warm. The durable construction provides maximum strength with minimal weight, while the slim design creates a clean appearance and improves visibility. This heat strip is incredibly powerful and easily maintains perfect serving temperatures. The heating element works with the reflector to provide efficient, consistent and evenly dissipated heat, and the convenient remote infinite control gives you the freedom to select the perfect setting for your needs, making this heat strip the perfect addition to any breath guard in your hot food area.

- Slim design is 65% smaller than the original Vollrath heat strip and 19-35% smaller than the leading competitors, creating a clean appearance and improving visibility
- Designed to maintain ideal serving temperatures for all your hot food items by providing a consistent, even blanket of heat
- Powerful heating element maximizes heat production and efficiency and offers up to 14% more heat penetration than the leading competitive heat strips when heating a 12- x 20-inch pan
- Reflector ensures consistent, even heat distribution to better maintain optimal food quality

- All units come standard with strong, 3-inch mounting brackets. Optional 1- and 2-inch brackets can be purchased separately
- Strong brackets promise reliable mount under breath guard
- Convenient remote infinite control allows you to select ideal temperature
- Brass color creates a timeless appearance

30-inch 120-volt low-profile heat strip in chrome

The Vollrath® low-profile heat strip keeps all your hot food items appetizingly warm. The durable construction provides maximum strength with minimal weight, while the slim design creates a clean appearance and improves visibility. This heat strip is incredibly powerful and easily maintains perfect serving temperatures. The heating element works with the reflector to provide efficient, consistent and evenly dissipated heat, and the convenient remote infinite control gives you the freedom to select the perfect setting for your needs, making this heat strip the perfect addition to any breath guard in your hot food area.

- Slim design is 65% smaller than the original Vollrath heat strip and 19-35% smaller than the leading competitors, creating a clean appearance and improving visibility
- Designed to maintain ideal serving temperatures for all your hot food items by providing a consistent, even blanket of heat
- Powerful heating element maximizes heat production and efficiency and offers up to 14% more heat penetration than the leading competitive heat strips when heating a 12- x 20-inch pan
- Reflector ensures consistent, even heat distribution to better maintain optimal food quality

- All units come standard with strong, 3-inch mounting brackets. Optional 1- and 2-inch brackets can be purchased separately
- Strong brackets promise reliable mount under breath guard
- Convenient toggle control allows for simple on/off functionality
- Chrome color creates a polished appearance

30-inch 120-volt low-profile heat strip in brass

The Vollrath® low-profile heat strip keeps all your hot food items appetizingly warm. The durable construction provides maximum strength with minimal weight, while the slim design creates a clean appearance and improves visibility. This heat strip is incredibly powerful and easily maintains perfect serving temperatures. The heating element works with the reflector to provide efficient, consistent and evenly dissipated heat, and the convenient remote infinite control gives you the freedom to select the perfect setting for your needs, making this heat strip the perfect addition to any breath guard in your hot food area.

- Slim design is 65% smaller than the original Vollrath heat strip and 19-35% smaller than the leading competitors, creating a clean appearance and improving visibility
- Designed to maintain ideal serving temperatures for all your hot food items by providing a consistent, even blanket of heat
- Powerful heating element maximizes heat production and efficiency and offers up to 14% more heat penetration than the leading competitive heat strips when heating a 12- x 20-inch pan
- Reflector ensures consistent, even heat distribution to better maintain optimal food quality

- All units come standard with strong, 3-inch mounting brackets. Optional 1- and 2-inch brackets can be purchased separately
- Strong brackets promise reliable mount under breath guard
- Convenient remote infinite control allows you to select ideal temperature
- Brass color creates a timeless appearance

54-inch 120-volt low-profile heat strip in natural finish

The Vollrath® low-profile heat strip keeps all your hot food items appetizingly warm. The durable construction provides maximum strength with minimal weight, while the slim design creates a clean appearance and improves visibility. This heat strip is incredibly powerful and easily maintains perfect serving temperatures. The heating element works with the reflector to provide efficient, consistent and evenly dissipated heat, and the convenient remote infinite control gives you the freedom to select the perfect setting for your needs, making this heat strip the perfect addition to any breath guard in your hot food area.

- Slim design is 65% smaller than the original Vollrath heat strip and 19-35% smaller than the leading competitors, creating a clean appearance and improving visibility
- Designed to maintain ideal serving temperatures for all your hot food items by providing a consistent, even blanket of heat
- Powerful heating element maximizes heat production and efficiency and offers up to 14% more heat penetration than the leading competitive heat strips when heating a 12- x 20-inch pan
- Reflector ensures consistent, even heat distribution to better maintain optimal food quality

- All units come standard with strong, 3-inch mounting brackets. Optional 1- and 2-inch brackets can be purchased separately
- Strong brackets promise reliable mount under breath guard
- Convenient remote infinite control allows you to select ideal temperature
- Natural finish creates a sleek look

120 Volt Single-Well Full-Size Cayenne® Drop-In Food Warmer

The Vollrath® one-well Cayenne drop-in food warmer heats your food while maximizing energy efficiency. Thermostatic controls allow for more accurate heating, and the durable stainless steel body is built to last. This full-size drop-in warmer fits right into your counter, and positioning pins hold the unit in place. No permanent wiring is needed, so this unit can easily lift out and become a countertop warmer if desired. This warmer comes with a 6-foot cord and plug for ultimate convenience.

- Stainless steel warmer is durable and long lasting
- Thermostatic controls allow for more accurate heating
- 6-foot cord and plug easily reach your outlet
- Drop-in well requires 23-9/16- x 14-7/16-inch cutout
- 4-inch-deep full or fractional size pans are recommended

120-volt single-well full-size Cayenne® drop-in warmer with integral drain and front-mounted control panel

The one-well Cayenne drop-in food warmer by Vollrath heats your food while maximizing energy efficiency. This full-size drop-in well has front-mounted thermostatic temperature controls for more accurate warming. The self-insulating design and direct-contact heating element improve energy efficiency. A low-water indicator light keeps you informed, and a bottom-mounted drain and drain valve make cleaning simple. This warmer comes with a 5-foot cord and plug for ultimate convenience and fits into your countertop easily.

- Made in the USA
- Thermoset fiber-reinforced resin well is durable and long-lasting
- Self-insulating well improves energy efficiency
- Reliable thermostatic controls ensure accurate heating
- Direct-contact heating element improves efficiency
- Low-water indicator light keeps you informed
- Bottom-mounted drain for easy cleaning
- NSF-certified
- 5-foot cord and plug
- 4-inch-deep full or fractional size pans are recommended

120-volt bottom-mount fabricator hot well with standard drain, Vollrath-style well and 3-foot remote control lead

Designed to maintain ideal serving temperatures and food safety, the bottom-mount hot well by Vollrath makes sure your food tastes just as good as intended. Made of 20-gauge 18-8 grade stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing, and the 6 ?-inch depth fits full- or fractional-size pans up to 6 inches deep. The remote control panel offers convenient operation, and thermostatic controls ensure accurate heating. This bottom-mount hot well requires hardwiring and comes with 6-foot wire lead for remote control module installation. While this hot well can operate wet or dry, moist operation is recommended for even heating, superior quality and NSF certification.

- Made in the USA
- 20-gauge 18-8 grade stainless steel is durable and long-lasting
- High-density glass fiber insulation on the sides, ends and below the element traps heat
- Stainless steel remote control panel offers convenient, easy operation
- Reliable thermostatic controls ensure accurate heating
- Standard drain and drain screen included
- 1-year parts and labor limited warranty
- NSF-certification with moist operation
- 6 ?-inch depth accommodates full- and fractional-size pans up to 6 inches deep
- Drip-free flange contains moisture and spills
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces

120-volt bottom-mount fabricator hot well with standard drain, industry-style well and 6-foot remote control lead

Designed to maintain ideal serving temperatures and food safety, the bottom-mount hot well by Vollrath makes sure your food tastes just as good as intended. Made of 20-gauge 18-8 grade stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing, and the 6 ?-inch depth fits full- or fractional-size pans up to 6 inches deep. The remote control panel offers convenient operation, and thermostatic controls ensure accurate heating. This bottom-mount hot well requires hardwiring and comes with 6-foot wire lead for remote control module installation. While this hot well can operate wet or dry, moist operation is recommended for even heating, superior quality and NSF certification.

- Made in the USA
- 20-gauge 18-8 grade stainless steel is durable and long-lasting
- High-density glass fiber insulation on the sides, ends and below the element traps heat
- Stainless steel remote control panel offers convenient, easy operation
- Reliable thermostatic controls ensure accurate heating
- Standard drain and drain screen included
- 1-year parts and labor limited warranty
- NSF-certification with moist operation
- 6 ?-inch depth accommodates full- and fractional-size pans up to 6 inches deep
- 6-foot cord and plug easily reach your outlet
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces
- 2-year standard limited warranty
- Please note this is a made-to-order item. These items require additional time for fulfillment. Made-to-order items cannot be changed, canceled or returned and may be subject to a minimum-order quantity. Contact your Vollrath sales representative for details.

208 to 240 Volt Four-Pan Bain Marie Hot Drop-In

Open design allows use of templates and greater than full size steam table pans.

- 300 series stainless steel construction for corrosion resistance, longevity, and efficient cleaning
- Six foot power cord and four foot control cord
- High density glass fiber insulation
- Deep drawn stainless wells are 6 5/8" (16.8 cm) deep
- Cord and plug configuration eliminates need for electrician
- Adjustable mounting clips
- Autofill option available
- Detachable control unit for remote mounting
- Thermostat controls temperature accurately and maintains steam for safe food handling
- Dripless design helps prevent condensation on counter - keeping counters clean
- Deep stainless well holds up to 6" deep food pans
- Holds standard steam table pans
- Zero clearance required for installation with lower energy costs and faster heating times.
- Keeps food at safe holding temperatures
- * Cutout has 7/8" (2.2 cm) corner radius

Six-pan 240-volt bain-marie drop-in hot well with thermostatic controls

The six-pan 240-volt bain-marie drop-in hot-well by Vollrath features a unique open design that allows you to use templates and larger-than-full-size steam table pans for impressive versatility. Made of 300-Series stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing. The thermostatic controls ensure accurate heating, and the detachable control unit can be mounted remotely for impressive convenience. With the cord and plug configuration, which eliminates the need for hardwiring, and the adjustable mounting clips, installation is an easy task. The dripless design helps prevent countertop condensation, which keeps your food area clean so you and your guests can focus on your appetizing food items.

- Made in the USA
- 300-Series stainless steel is durable and long-lasting
- High-density glass fiber insulation traps heat
- Reliable thermostatic controls ensure accurate heating
- Detachable control unit for remote mounting
- Dripless design prevents condensation on counters
- Cord and plug configuration eliminates the need for hardwiring

Four-pan 208-volt bain-marie drop-in hot well with thermostatic controls

The four-pan 208-volt bain-marie drop-in hot-well by Vollrath features a unique open design that allows you to use templates and larger-than-full-size steam table pans for impressive versatility. Made of 300-Series stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing. The thermostatic controls ensure accurate heating, and the detachable control unit can be mounted remotely for impressive convenience. With the cord and plug configuration, which eliminates the need for hardwiring, and the adjustable mounting clips, installation is an easy task. The dripless design helps prevent countertop condensation, which keeps your food area clean so you and your guests can focus on your appetizing food items.

- Made in the USA
- 300-Series stainless steel is durable and long-lasting
- High-density glass fiber insulation traps heat
- Reliable thermostatic controls ensure accurate heating
- Detachable control unit for remote mounting
- Dripless design prevents condensation on counters
- Cord and plug configuration eliminates the need for hardwiring
- NSF-certified
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces
- 6-foot remote control lead
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces
- 2-year standard limited warranty
- 6 ?-inch depth accommodates 6-inch-deep pans

Five-well 240-volt 3125-watt modular drop-in hot well with manifold drain, infinite controls, Auto-Fill system and flat flange

Keep a variety of food items at perfect serving temperatures with ease, thanks to the five-well 240-volt modular drop-in hot well by Vollrath. Made of 300-Series stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing. The Auto-Fill system maintains perfect water levels for easy operation, and the unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, and the flat flange creates a sleek, streamlined appearance. The control panel can be mounted remotely for convenient operation, and the easy-to-use infinite controls ensure accurate temperature settings.

- Made in the USA
- 300-Series stainless steel is durable and long-lasting
- High-density glass fiber insulation on the sides, ends and below the element traps heat
- Easy-to-use infinite controls ensure accurate temperature settings
- Detachable control unit for remote mounting
- Auto-Fill system maintains perfect water levels for easy operation
- Energy-efficient heating element uses smaller circuit and reduces installation costs while offering comparable performance to higher-wattage elements
- Full-perimeter gasket under drip flange reduces installation time
- Drip-free flange contains moisture and spills
- Cord and plug configuration eliminates the need for hardwiring
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces
- 6 ?-inch depth accommodates 6-inch-deep pans
- Please note this is a made-to-order item. These items require additional time for fulfillment. Made-to-order items cannot be changed, canceled or returned and may be subject to a minimum-order quantity. Contact your Vollrath sales representative for details.

Each well features an individual drain shutoff for convenience, and the flat flange creates a sleek, streamlined appearance. The easy-to-use infinite controls ensure accurate temperature settings and are detachable for remote mounting, making this drop-in a popular, reliable choice.

- Made in the USA
- 300-Series stainless steel is durable and long-lasting
- High-density glass fiber insulation on the sides, ends and below the element traps heat
- Easy-to-use infinite controls ensure accurate temperature settings
- Detachable control unit for remote mounting
- Energy-efficient heating element uses smaller circuit and reduces installation costs while offering comparable performance to higher-wattage elements
- Individual drain shutoffs for user convenience
- Flat flange creates a sleek, streamlined appearance
- Cord and plug configuration eliminates the need for hardwiring
- NSF-certified
- NSF-certified
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces
- 6 ?-inch depth accommodates 6-inch-deep pans
- 6 ?-inch depth accommodates 6-inch-deep pans

Five-well 208- to 240-volt 5000-watt modular drop-in hot well with manifold drain, infinite controls, Auto-Fill system and flat flange

Keep a variety of food items at perfect serving temperatures with ease, thanks to the five-well modular drop-in hot well by Vollrath. Made of 300-Series stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing. The Auto-Fill system maintains perfect water levels for easy operation, and the unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, and the flat flange creates a sleek, streamlined appearance. The control panel can be mounted remotely for convenient operation, and the easy-to-use infinite controls ensure accurate temperature settings.

Five-well 208-volt 3125-watt modular drop-in hot well with manifold drain, thermostatic controls and Auto-Fill system

Keep a variety of food items at perfect serving temperatures with ease, thanks to the five-well modular drop-in hot well by Vollrath. Made of 300-Series stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing. The Auto-Fill system maintains perfect water levels for easy operation, and the unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, while a drip-free flange contains moisture and spills. The control panel can be mounted remotely for convenient operation, and thermostatic controls ensure accurate heating.

- Made in the USA
- 300-Series stainless steel is durable and long-lasting
- High-density glass fiber insulation on the sides, ends and below the element traps heat
- Reliable thermostatic controls ensure accurate heating
- Detachable control unit for remote mounting
- Auto-Fill system maintains perfect water levels for easy operation
- Energy-efficient heating element uses smaller circuit and reduces installation costs while offering comparable performance to higher-wattage elements
- Manifold drains with individual well shutoffs for user convenience
- Full-perimeter gasket under drip flange reduces installation time
- Drip-free flange contains moisture and spills
- Cord and plug configuration eliminates the need for hardwiring
- NSF-certified
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces
- 6 ?-inch depth accommodates 6-inch-deep pans
- Please note this is a made-to-order item. These items require additional time for fulfillment. Made-to-order items cannot be changed, canceled or returned and may be subject to a minimum-order quantity. Contact your Vollrath sales representative for details.

Five-well 208- to 240-volt 5000-watt modular drop-in hot well with manifold drain and thermostatic controls

Keep a variety of food items at perfect serving temperatures with ease, thanks to the five-well modular drop-in hot well by Vollrath. Made of 300-Series stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing. The unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, while a drip-free flange contains moisture and spills. The control panel can be mounted remotely for convenient operation, and thermostatic controls ensure accurate heating.

- Made in the USA
- 300-Series stainless steel is durable and long-lasting
- High-density glass fiber insulation on the sides, ends and below the element traps heat
- Reliable thermostatic controls ensure accurate heating
- Detachable control unit for remote mounting
- Energy-efficient heating element uses smaller circuit and reduces installation costs while offering comparable performance to higher-wattage elements
- Manifold drains with individual well shutoffs for user convenience
- Full-perimeter gasket under drip flange reduces installation time
- Drip-free flange contains moisture and spills
- Cord and plug configuration eliminates the need for hardwiring
- NSF-certified
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces
- 6 ?-inch depth accommodates 6-inch-deep pans
- Please note this is a made-to-order item. These items require additional time for fulfillment. Made-to-order items cannot be changed, canceled or returned and may be subject to a minimum-order quantity. Contact your Vollrath sales representative for details.

Five-well 208- to 240-volt 5000-watt modular marine-grade stainless steel drop-in hot well with manifold drain, thermostatic controls and flat flange

Keep a variety of food items at perfect serving temperatures with ease, thanks to the five-well modular drop-in hot well by Vollrath. Made with marine-grade stainless steel, this durable well stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance. High-density glass fiber insulation reduces energy waste, helping you maximize efficiency. The unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, and the flat flange creates a sleek, streamlined appearance. The control panel can be mounted remotely for convenient operation, and thermostatic controls ensure accurate heating.

Five-well 208- to 240-volt 5000-watt modular marine-grade stainless steel drop-in hot well with standard drain, infinite controls and flat flange

Keep a variety of food items at perfect serving temperatures with ease, thanks to the five-well modular drop-in hot well by Vollrath. Made with marine-grade stainless steel, this durable well stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance. High-density glass fiber insulation reduces energy waste, helping you maximize efficiency. The unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features an individual drain shutoff for convenience, and the flat flange creates a sleek, streamlined appearance. The easy-to-use infinite controls ensure accurate temperature settings and are detachable for remote mounting, making this drop-in a popular, reliable choice.

The control panel can be mounted remotely for convenient operation, and the easy-to-use infinite controls ensure accurate temperature settings.

- Made in the USA
- Marine-grade stainless steel stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance
- High-density glass fiber insulation on the sides, ends and below the element traps heat
- Easy-to-use infinite controls ensure accurate temperature settings
- Detachable control unit for remote mounting
- Auto-Fill system maintains perfect water levels for easy operation
- Energy-efficient heating element uses smaller circuit and reduces installation costs while offering comparable performance to higher-wattage elements
- Manifold drains with individual well shutoffs for user convenience
- Full-perimeter gasket under drip flange reduces installation time
- NSF-certified
- Cord and plug configuration eliminates the need for hardwiring
- 6 ?-inch depth accommodates 6-inch-deep pans
- 6 ?-inch depth accommodates 6-inch-deep pans
- 6 ?-inch depth accommodates 6-inch-deep pans

Five-well 240-volt 3125-watt modular marine-grade stainless steel drop-in hot well with manifold drain, thermostatic controls and Auto-Fill system

Keep a variety of food items at perfect serving temperatures with ease, thanks to the five-well 240-volt modular drop-in hot well by Vollrath. Made with marine-grade stainless steel, this durable well stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance. High-density glass fiber insulation reduces energy waste, helping you maximize efficiency. The Auto-Fill system maintains perfect water levels for easy operation, and the unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, while a drip-free flange contains moisture and spills. The control panel can be mounted remotely for convenient operation, and thermostatic controls ensure accurate heating.

Five-well 240-volt 3125-watt modular marine-grade stainless steel drop-in hot well with standard drain and infinite controls

Keep a variety of food items at perfect serving temperatures with ease, thanks to the five-well 240-volt modular drop-in hot well by Vollrath. Made with marine-grade stainless steel, this durable well stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance. High-density glass fiber insulation reduces energy waste, helping you maximize efficiency. The unique design requires a smaller circuit, reduces installation costs and provides comparable performance to higher-wattage elements. Each well features an individual drain shutoff for convenience, while a drip-free flange contains moisture and spills. The easy-to-use infinite controls ensure accurate temperature settings and are detachable for remote mounting, making this hot well a popular, reliable choice.

Five-well 208- to 240-volt 5000-watt modular marine-grade stainless steel drop-in hot well with standard drain and infinite controls

Keep a variety of food items at perfect serving temperatures with ease, thanks to the five-well modular drop-in hot well by Vollrath. Made with marine-grade stainless steel, this durable well stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance. High-density glass fiber insulation reduces energy waste, helping you maximize efficiency. The unique design requires a smaller circuit, reduces installation costs and provides comparable performance to higher-wattage elements. Each well features an individual drain shutoff for convenience, while a drip-free flange contains moisture and spills. The easy-to-use infinite controls ensure accurate temperature settings and are detachable for remote mounting, making this hot well a popular, reliable choice.

- Made in the USA
- Marine-grade stainless steel stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance
- High-density glass fiber insulation on the sides, ends and below the element traps heat and maximizes energy efficiency
- Easy-to-use infinite controls ensure accurate temperature settings
- Detachable control unit for remote mounting
- Energy-efficient heating element uses smaller circuit and reduces installation costs while providing comparable performance to higher-wattage elements
- Individual drain shutoffs for user convenience
- Full-perimeter gasket under drip flange reduces installation time
- Drip-free flange contains moisture and spills
- Drip-free flange contains moisture and spills
- NSF-certified
- 6 ?-inch depth accommodates 6-inch-deep pans
- Please note this is a made-to-order item. These items require additional time for fulfillment. Made-to-order items cannot be changed, canceled or returned and may be subject to a minimum-order quantity. Contact your Vollrath sales representative for details.

Four-well 120-volt 2500-watt modular drop-in hot well with manifold drain, infinite controls, Auto-Fill system and flat flange

Keep a variety of food items at perfect serving temperatures with ease, thanks to the four-well 120-volt modular drop-in hot well by Vollrath. Made of 300-Series stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing. The Auto-Fill system maintains perfect water levels for easy operation, and the unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, and the flat flange creates a sleek, streamlined appearance. The control panel can be mounted remotely for convenient operation, and the easy-to-use infinite controls ensure accurate temperature settings.

The Auto-Fill system maintains perfect water levels for easy operation, and the unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, and the flat flange creates a sleek, streamlined appearance. The control panel can be mounted remotely for convenient operation, and thermostatic controls ensure accurate heating.

- Made in the USA
- 300-Series stainless steel is durable and long-lasting
- High-density glass fiber insulation on the sides, ends and below the element traps heat
- Reliable thermostatic controls ensure accurate heating
- Detachable control unit for remote mounting
- Auto-Fill system maintains perfect water levels for easy operation
- Energy-efficient heating element uses smaller circuit and reduces installation costs while offering comparable performance to higher-wattage elements
- Flat flange creates a sleek, streamlined appearance
- Cord and plug configuration eliminates the need for hardwiring
- Cord and plug configuration eliminates the need for hardwiring
- NSF-certified
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces
- Not for use with plastic pans

Four-well 240-volt 2500-watt modular drop-in hot well with manifold drain, infinite controls, Auto-Fill system and flat flange

Keep a variety of food items at perfect serving temperatures with ease, thanks to the four-well 240-volt modular drop-in hot well by Vollrath. Made of 300-Series stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing. The Auto-Fill system maintains perfect water levels for easy operation, and the unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, and the flat flange creates a sleek, streamlined appearance. The control panel can be mounted remotely for convenient operation, and the easy-to-use infinite controls ensure accurate temperature settings.

Keep a variety of food items at perfect serving temperatures with ease, thanks to the four-well 240-volt modular drop-in hot well by Vollrath. Made of 300-Series stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing. The Auto-Fill system maintains perfect water levels for easy operation, and the unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, while a drip-free flange contains moisture and spills. The control panel can be mounted remotely for convenient operation, and the easy-to-use infinite controls ensure accurate temperature settings.

- Made in the USA
- 300-Series stainless steel is durable and long-lasting
- High-density glass fiber insulation on the sides, ends and below the element traps heat
- Easy-to-use infinite controls ensure accurate temperature settings
- Detachable control unit for remote mounting
- Auto-Fill system maintains perfect water levels for easy operation
- Energy-efficient heating element uses smaller circuit and reduces installation costs while offering comparable performance to higher-wattage elements
- Flat flange creates a sleek, streamlined appearance
- Cord and plug configuration eliminates the need for hardwiring
- NSF-certified
- NSF-certified
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces
- 6 ?-inch depth accommodates 6-inch-deep pans
- 6 ?-inch depth accommodates 6-inch-deep pans

Four-well 240-volt 2500-watt modular drop-in hot well with manifold drain and infinite controls

Keep a variety of food items at perfect serving temperatures with ease, thanks to the four-well 240-volt modular drop-in hot well by Vollrath. Made of 300-Series stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing. The unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, while a drip-free flange contains moisture and spills. The easy-to-use infinite controls ensure accurate temperature settings and are detachable for remote mounting, making this drop-in a popular, reliable choice.

- Made in the USA
- 300-Series stainless steel is durable and long-lasting
- High-density glass fiber insulation on the sides, ends and below the element traps heat
- Easy-to-use infinite controls ensure accurate temperature settings
- Detachable control unit for remote mounting
- Energy-efficient heating element uses smaller circuit and reduces installation costs while offering comparable performance to higher-wattage elements
- Manifold drains with individual well shutoffs for user convenience
- Manifold drains with individual well shutoffs for user convenience
- Full-perimeter gasket under drip flange reduces installation time
- Cord and plug configuration eliminates the need for hardwiring
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces

Four-well 208- to 240-volt 4000-watt modular drop-in hot well with manifold drain, infinite controls and Auto-Fill system

Keep a variety of food items at perfect serving temperatures with ease, thanks to the four-well modular drop-in hot well by Vollrath. Made of 300-Series stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing. The Auto-Fill system maintains perfect water levels for easy operation, and the unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, while a drip-free flange contains moisture and spills. The easy-to-use infinite controls ensure accurate temperature settings and are detachable for remote mounting, making this drop-in a popular, reliable choice.

- Made in the USA
- 300-Series stainless steel is durable and long-lasting
- High-density glass fiber insulation on the sides, ends and below the element traps heat
- Easy-to-use infinite controls ensure accurate temperature settings
- Detachable control unit for remote mounting
- Auto-Fill system maintains perfect water levels for easy operation
- Energy-efficient heating element uses smaller circuit and reduces installation costs while offering comparable performance to higher-wattage elements
- Manifold drains with individual well shutoffs for user convenience
- Full-perimeter gasket under drip flange reduces installation time
- Drip-free flange contains moisture and spills
- Cord and plug configuration eliminates the need for hardwiring
- NSF-certified
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces
- 6 ?-inch depth accommodates 6-inch-deep pans
- Please note this is a made-to-order item. These items require additional time for fulfillment. Made-to-order items cannot be changed, canceled or returned and may be subject to a minimum-order quantity. Contact your Vollrath sales representative for details.

Four-well 208-volt 2500-watt modular marine-grade stainless steel drop-in hot well with manifold drain, thermostatic controls and flat flange

Keep a variety of food items at perfect serving temperatures with ease, thanks to the four-well modular drop-in hot well by Vollrath. Made with marine-grade stainless steel, this durable well stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance. High-density glass fiber insulation reduces energy waste, helping you maximize efficiency. The unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, and the flat flange creates a sleek, streamlined appearance. The control panel can be mounted remotely for convenient operation, and thermostatic controls ensure accurate heating.

- Made in the USA
- Marine-grade stainless steel stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance
- High-density glass fiber insulation on the sides, ends and below the element traps heat
- Reliable thermostatic controls ensure accurate heating
- Detachable control unit for remote mounting
- Energy-efficient heating element uses smaller circuit and reduces installation costs while offering comparable performance to higher-wattage elements
- Manifold drains with individual well shutoffs for user convenience
- Flat flange creates a sleek, streamlined appearance
- Cord and plug configuration eliminates the need for hardwiring
- Zero-clearance installation means no trim rings required for non-metallic countertops
- Accommodates 6-inch-deep pans
- Accommodates 6-inch-deep pans
- 6 ?-inch depth accommodates 6-inch-deep pans

Four-well 240-volt 2500-watt modular marine-grade stainless steel drop-in hot well with manifold drain, thermostatic controls, Auto-Fill system and flat flange

Featuring convenient dry heat, the 120-volt modular dry hot well by Vollrath is reliable, easy to use and maintains serving temperatures perfectly. Made of 300-Series stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing. The open-element, energy-efficient design uses a smaller circuit, reduces installation costs and provides comparable performance to higher-wattage elements. Easy-to-use infinite controls ensure accurate temperature settings and are detachable for remote mounting. This hot well does not require water for operation, making it a popular, reliable choice.

- Made in the USA
- Marine-grade stainless steel stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance
- High-density glass fiber insulation on the sides, ends and below the element traps heat
- Reliable thermostatic controls ensure accurate heating
- Detachable control unit for remote mounting
- Auto-Fill system maintains perfect water levels for easy operation
- Energy-efficient heating element uses smaller circuit and reduces installation costs while offering comparable performance to higher-wattage elements
- NSF-certified
- Covered by 1-year limited warranty — see warranty page for details
- Zero-clearance installation means no trim rings required for non-metallic countertops
- Zero-clearance installation means no trim rings required for non-metallic countertops
- 6 ?-inch depth accommodates 6-inch-deep pans

Four-well 240-volt 2500-watt modular marine-grade stainless steel drop-in hot well with manifold drain, infinite controls and flat flange

Keep a variety of food items at perfect serving temperatures with ease, thanks to the four-well 240-volt modular drop-in hot well by Vollrath. Made with marine-grade stainless steel, this durable well stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance. High-density glass fiber insulation reduces energy waste, helping you maximize efficiency. The Auto-Fill system maintains perfect water levels for easy operation, and the unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, and the flat flange creates a sleek, streamlined appearance. The control panel can be mounted remotely for convenient operation, and thermostatic controls ensure accurate heating.

- Made in the USA
- Marine-grade stainless steel stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance
- High-density glass fiber insulation on the sides, ends and below the element traps heat
- Easy-to-use infinite controls ensure accurate temperature settings
- Detachable control unit for remote mounting
- Energy-efficient heating element uses smaller circuit and reduces installation costs while offering comparable performance to higher-wattage elements
- Manifold drains with individual well shutoffs for user convenience
- NSF-certified
- Covered by 1-year limited warranty — see warranty page for details
- Zero-clearance installation means no trim rings required for non-metallic countertops
- Zero-clearance installation means no trim rings required for non-metallic countertops
- 6 ?-inch depth accommodates 6-inch-deep pans
- Please note this is a made-to-order item. These items require additional time for fulfillment. Made-to-order items cannot be changed, canceled or returned and may be subject to a minimum-order quantity. Contact your Vollrath sales representative for details.

Four-well 240-volt 2500-watt modular marine-grade stainless steel drop-in hot well with manifold drain, infinite controls and Auto-Fill system

Keep a variety of food items at perfect serving temperatures with ease, thanks to the four-well 240-volt modular drop-in hot well by Vollrath. Made with marine-grade stainless steel, this durable well stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance. High-density glass fiber insulation reduces energy waste, helping you maximize efficiency. The Auto-Fill system maintains perfect water levels for easy operation, and the unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, while a drip-free flange contains moisture and spills. The control panel can be mounted remotely for convenient operation, and the easy-to-use infinite controls ensure accurate temperature settings.

High-density glass fiber insulation reduces energy waste, helping you maximize efficiency. The Auto-Fill system maintains perfect water levels for easy operation, and the unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, while a drip-free flange contains moisture and spills. The control panel can be mounted remotely for convenient operation, and thermostatic controls ensure accurate heating.

- Made in the USA
- Marine-grade stainless steel stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance
- High-density glass fiber insulation on the sides, ends and below the element traps heat
- Reliable thermostatic controls ensure accurate heating
- Detachable control unit for remote mounting
- Auto-Fill system maintains perfect water levels for easy operation
- Energy-efficient heating element uses smaller circuit and reduces installation costs while offering comparable performance to higher-wattage elements
- Full-perimeter gasket under drip flange reduces installation time
- Drip-free flange contains moisture and spills
- Drip-free flange contains moisture and spills
- Accommodates 6-inch-deep pans
- Not for use with plastic pans
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces

Four-well 240-volt 2500-watt modular marine-grade stainless steel drop-in hot well with manifold drain, thermostatic controls and Auto-Fill system

Keep a variety of food items at perfect serving temperatures with ease, thanks to the four-well 240-volt modular drop-in hot well by Vollrath. Made with marine-grade stainless steel, this durable well stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance. High-density glass fiber insulation reduces energy waste, helping you maximize efficiency. The Auto-Fill system maintains perfect water levels for easy operation, and the unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, while a drip-free flange contains moisture and spills. Four-well 208- to 240-volt 4000-watt modular marine-grade stainless steel drop-in hot well with manifold drain, infinite controls and Auto-Fill system

Keep a variety of food items at perfect serving temperatures with ease, thanks to the four-well modular drop-in hot well by Vollrath. Made with marine-grade stainless steel, this durable well stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance. High-density glass fiber insulation reduces energy waste, helping you maximize efficiency. The Auto-Fill system maintains perfect water levels for easy operation, and the unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, while a drip-free flange contains moisture and spills. The control panel can be mounted remotely for convenient operation, and the easy-to-use infinite controls ensure accurate temperature settings.

- Made in the USA
- Marine-grade stainless steel stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance
- High-density glass fiber insulation on the sides, ends and below the element traps heat
- Easy-to-use infinite controls ensure accurate temperature settings
- Detachable control unit for remote mounting
- Auto-Fill system maintains perfect water levels for easy operation
- Energy-efficient heating element uses smaller circuit and reduces installation costs while offering comparable performance to higher-wattage elements
- Manifold drains with individual well shutoffs for user convenience
- Full-perimeter gasket under drip flange reduces installation time
- Cord and plug configuration eliminates the need for hardwiring
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces
- Not for use with plastic pans
- 6-foot power cord, 4-foot control cord

Four-well 208- to 240-volt 4000-watt modular marine-grade stainless steel drop-in hot well with standard drain and thermostatic controls

Keep a variety of food items at perfect serving temperatures with ease, thanks to the four-well modular drop-in hot well by Vollrath. Made with marine-grade stainless steel, this durable well stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance. High-density glass fiber insulation reduces energy waste, helping you maximize efficiency. The unique design requires a smaller circuit, reduces installation costs and provides comparable performance to higher-wattage elements. Each well features an individual drain shutoff for convenience, while a drip-free flange contains moisture and spills. The remote control panel offers convenient operation, and the thermostatic controls ensure accurate heating.

- Made in the USA

Three-well 120-volt modular drop-in dry hot well with infinite controls and flat flange

Featuring convenient dry heat, the three-well modular dry hot well by Vollrath is reliable, easy to use and maintains serving temperatures perfectly. Made of 300-Series stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing. The open-element, energy-efficient design uses a smaller circuit, reduces installation costs and provides comparable performance to higher-wattage elements. Easy-to-use infinite controls ensure accurate temperature settings and are detachable for remote mounting, while the flat flange creates a sleek, streamlined appearance. This hot well does not require water for operation, making it a popular, reliable choice.

- 300-Series stainless steel is durable and long-lasting
- Open well, dry design does not require water to operate
- High-density glass fiber insulation traps heat and maximizes energy efficiency
- Easy-to-use infinite controls ensure accurate temperature settings
- 4-foot tethered control panel connection allows flexible mounting
- Energy-efficient heating element uses smaller circuit and reduces installation costs while providing comparable performance to higher-wattage elements
- Flat flange creates a sleek, streamlined appearance
- Cord and plug configuration eliminates the need for hardwiring
- NSF-certified
- Covered by 1-year limited warranty — see warranty page for details
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces
- Please note this is a made-to-order item. These items require additional time for fulfillment. Made-to-order items cannot be changed, canceled or returned and may be subject to a minimum-order quantity. Contact your Vollrath sales representative for details.

- 300-Series stainless steel is durable and long-lasting
- Open well, dry design does not require water to operate
- High-density glass fiber insulation traps heat and maximizes energy efficiency
- Easy-to-use infinite controls ensure accurate temperature settings
- 4-foot tethered control panel connection allows flexible mounting
- Energy-efficient heating element uses smaller circuit and reduces installation costs while providing comparable performance to higher-wattage elements
- Flat flange creates a sleek, streamlined appearance
- Cord and plug configuration eliminates the need for hardwiring
- NSF-certified
- Covered by 1-year limited warranty — see warranty page for details
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces

One-well 208- to 240-volt modular drop-in dry hot well with infinite controls and flat flange

Featuring convenient dry heat, the one-well 120-volt modular dry hot well by Vollrath is reliable, easy to use and maintains serving temperatures perfectly. Made of 300-Series stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing. The open-element, energy-efficient design uses a smaller circuit, reduces installation costs and provides comparable performance to higher-wattage elements. Thermostatic controls ensure accurate heating and are detachable for remote mounting, while the flat flange creates a sleek, streamlined appearance. This hot well does not require water for operation, making it a popular, reliable choice.

Three-well 120-volt modular drop-in dry hot well with thermostatic controls and flat flange

Featuring convenient dry heat, the three-well modular dry hot well by Vollrath is reliable, easy to use and maintains serving temperatures perfectly. Made of 300-Series stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing. The open-element, energy-efficient design uses a smaller circuit, reduces installation costs and provides comparable performance to higher-wattage elements. Thermostatic controls ensure accurate heating and are detachable for remote mounting, while the flat flange creates a sleek, streamlined appearance. This hot well does not require water for operation, making it a popular, reliable choice.

- 300-Series stainless steel is durable and long-lasting
- Open well, dry design does not require water to operate
- High-density glass fiber insulation traps heat and maximizes energy efficiency
- Reliable thermostatic controls ensure accurate heating
- 4-foot tethered control panel connection allows flexible mounting
- Energy-efficient heating element uses smaller circuit and reduces installation costs while providing comparable performance to higher-wattage elements

Six-well 208- to 240-volt modular drop-in dry hot well with thermostatic controls and flat flange

Keep your food items at perfect serving temperatures with ease, thanks to the one-well 120-volt modular drop-in hot well by Vollrath. Made of 300-Series stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing. The unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. A drain shutoff adds convenience, while a drip-free flange contains moisture and spills. The easy-to-use infinite controls ensure accurate temperature settings and are detachable for remote mounting, making this drop-in a popular, reliable choice.

- 300-Series stainless steel is durable and long-lasting
- Open well, dry design does not require water to operate
- High-density glass fiber insulation traps heat and maximizes energy efficiency
- Reliable thermostatic controls ensure accurate heating

Three-well 120-volt modular drop-in dry hot well with infinite controls

Featuring convenient dry heat, the three-well modular dry hot well by Vollrath is reliable, easy to use and maintains serving temperatures perfectly. Made of 300-Series stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing. The open-element, energy-efficient design uses a smaller circuit, reduces installation costs and provides comparable performance to higher-wattage elements. Easy-to-use infinite controls ensure accurate temperature settings and are detachable for remote mounting. This hot well does not require water for operation, making it a popular, reliable choice.

- 300-Series stainless steel is durable and long-lasting
- Open well, dry design does not require water to operate
- High-density glass fiber insulation traps heat and maximizes energy efficiency
- Easy-to-use infinite controls ensure accurate temperature settings
- 4-foot tethered control panel connection allows flexible mounting
- Energy-efficient heating element uses smaller circuit and reduces installation costs while providing comparable performance to higher-wattage elements
- Cord and plug configuration eliminates the need for hardwiring
- NSF-certified
- Covered by 1-year limited warranty — see warranty page for details
- Zero-clearance installation means no trim rings required for non-metallic countertops
- Zero-clearance installation means no trim rings required for non-metallic countertops
- NSF-certified
- 6-foot power cord, 4-foot control cord

One-well 208- to 240-volt modular drop-in dry hot well with thermostatic controls and flat flange

Featuring convenient dry heat, the two-well 120-volt modular dry hot well by Vollrath is reliable, easy to use and maintains serving temperatures perfectly. Made of 300-Series stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing. The open-element, energy-efficient design uses a smaller circuit, reduces installation costs and provides comparable performance to higher-wattage elements. Easy-to-use infinite controls ensure accurate temperature settings and are detachable for remote mounting, while the flat flange creates a sleek, streamlined appearance. This hot well does not require water for operation, making it a popular, reliable choice.

Modular drop-in auto-fill accessory

Automate your water-level monitoring for your modular drop-in and enjoy simplified, stress-free operation with the drop-in auto-fill accessory by Vollrath. This auto-fill system is available as a field-installed option using simple tools, and the thoughtful design makes it exceptionally easy to install and use. By utilizing flexible tubing, a simple reservoir with a float switch and a 6-foot cord and plug that does not require hardwiring, this auto-fill accessory eliminates the need to monitor water levels, which reduces labor and operating costs.

- Made in the USA
- Maintains constant water levels in your modular drop-ins and eliminates the need for monitoring
- Reservoir with float switch allows for remote mounting and use with multiple drop-ins
- Connects to manifold drain assembly with flexible tubing and use of simple tools easily
- Flexible tubing supplied for all connections
- Check valve/siphon brake prevents cross contamination of drain and potable water
- Adjustable water level
- 6-foot cord and NEMA 5-15P plug does not require hardwiring
- Control box mounts inside of base enclosure
- Power On/Off toggle switch is easy to use
- Solenoid valve will close if power is interrupted
- Overflow connection provided
- With manifold drain, use with one or more hot wells (12 maximum) or multiple soup wells

One-well 240-volt 625-watt modular drop-in hot well with manifold drain, thermostatic controls, Auto-Fill system and flat flange

Keep your food items at perfect serving temperatures with ease, thanks to the one-well 120-volt modular drop-in hot well by Vollrath. Made with marine-grade stainless steel, this durable well stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance. High-density glass fiber insulation reduces energy waste, helping you maximize efficiency. The unique design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. A drain shutoff adds convenience, while a drip-free flange contains moisture and spills. The easy-to-use infinite controls ensure accurate temperature settings and are detachable for remote mounting, making this drop-in a popular, reliable choice.

- Made in the USA
- 300-Series stainless steel is durable and long-lasting
- High-density glass fiber insulation on the sides, ends and below the element traps heat
- Thermostatic controls ensure accurate heating
- Detachable control unit for remote mounting
- Auto-Fill system maintains perfect water levels for easy operation
- Energy-efficient heating element uses smaller circuit and reduces installation costs while offering comparable performance to higher-wattage elements
- Drip-free flange contains moisture and spills
- Cord and plug configuration eliminates the need for hardwiring
- Drip-free flange contains moisture and spills

One-well 240-volt 625-watt modular drop-in hot well with standard drain, infinite controls and flat flange

Keep your food items at perfect serving temperatures with ease, thanks to the one-well 120-volt modular drop-in hot well by Vollrath. Made of 300-Series stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing. The unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. A drain shutoff adds convenience, while the flat flange creates a sleek, streamlined appearance. The easy-to-use infinite controls ensure accurate temperature settings and are detachable for remote mounting, making this drop-in a popular, reliable choice.

One-well 208-volt 625-watt modular drop-in hot well with manifold drain, infinite controls, Auto-Fill system and flat flange

Keep your food items at perfect serving temperatures with ease, thanks to the one-well modular drop-in hot well by Vollrath. Made of 300-Series stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing. The Auto-Fill system maintains perfect water levels for easy operation, and the unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, while the flat flange creates a sleek, streamlined appearance. The easy-to-use infinite controls ensure accurate temperature settings and are detachable for remote mounting, making this drop-in a popular, reliable choice.

- Made in the USA
- 300-Series stainless steel is durable and long-lasting
- High-density glass fiber insulation on the sides, ends and below the element traps heat
- Easy-to-use infinite controls ensure accurate temperature settings
- Detachable control unit for remote mounting
- Auto-Fill system maintains perfect water levels for easy operation
- Energy-efficient heating element uses smaller circuit and reduces installation costs while offering comparable performance to higher-wattage elements
- Manifold drains with individual well shutoffs for user convenience
- Flat flange creates a sleek, streamlined appearance
- NSF-certified
- Cord and plug configuration eliminates the need for hardwiring

One-well 208- to 240-volt 1000-watt modular drop-in hot well with manifold drain, thermostatic controls and Auto-Fill system

Keep a variety of food items at perfect serving temperatures with ease, thanks to the one-well modular drop-in hot well by Vollrath. Made of 300-Series stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing, and the Auto-Fill system maintains perfect water levels for easy operation. The unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, while a drip-free flange contains moisture and spills. The control panel can be mounted remotely for convenient operation, and thermostatic controls ensure accurate heating.

- Made in the USA
- 300-Series stainless steel is durable and long-lasting
- High-density glass fiber insulation on the sides, ends and below the element traps heat
- Reliable thermostatic controls ensure accurate heating
- Detachable control unit for remote mounting
- Auto-Fill system maintains perfect water levels for easy operation
- Energy-efficient heating element uses smaller circuit and reduces installation costs while offering comparable performance to higher-wattage elements
- Manifold drains with individual well shutoffs for user convenience
- Full-perimeter gasket under drip flange reduces installation time
- Drip-free flange contains moisture and spills
- Cord and plug configuration eliminates the need for hardwiring
- NSF-certified
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces
- 6 ?-inch depth accommodates 6-inch-deep pans
- Please note this is a made-to-order item. These items require additional time for fulfillment. Made-to-order items cannot be changed, canceled or returned and may be subject to a minimum-order quantity. Contact your Vollrath sales representative for details.

One-well 208-volt 625-watt modular drop-in hot well with standard drain and infinite controls

Keep your food items at perfect serving temperatures with ease, thanks to the one-well 240-volt modular drop-in hot well by Vollrath. Made of 300-Series stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing. The unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. A drain shutoff adds convenience, while a drip-free flange contains moisture and spills. The easy-to-use infinite controls ensure accurate temperature settings and are detachable for remote mounting, making this drop-in a popular, reliable choice.

- Made in the USA
- 300-Series stainless steel is durable and long-lasting
- High-density glass fiber insulation on the sides, ends and below the element traps heat
- Easy-to-use infinite controls ensure accurate temperature settings
- Detachable control unit for remote mounting
- Energy-efficient heating element uses smaller circuit and reduces installation costs while offering comparable performance to higher-wattage elements
- Full-perimeter gasket under drip flange reduces installation time
- Manifold drains with individual well shutoffs for user convenience
- Full-perimeter gasket under drip flange reduces installation time
- NSF-certified
- NSF-certified
- NSF-certified

One-well 120-volt 1000-watt modular marine-grade stainless steel drop-in hot well with standard drain, infinite controls and flat flange

Keep your food items at perfect serving temperatures with ease, thanks to the one-well 120-volt modular drop-in hot well by Vollrath. Made with marine-grade stainless steel, this durable well stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance. High-density glass fiber insulation reduces energy waste, helping you maximize efficiency. The unique design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. A drain shutoff adds convenience, while the flat flange creates a sleek, streamlined appearance. The thermostatic controls ensure accurate heating and are detachable for remote mounting, making this drop-in a popular, reliable choice.

One-well 208-volt 625-watt modular marine-grade stainless steel drop-in hot well with manifold drain, infinite controls and Auto-Fill system

Keep your food items at perfect serving temperatures with ease, thanks to the one-well modular drop-in hot well by Vollrath. Made with marine-grade stainless steel, this durable well stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance. High-density glass fiber insulation reduces energy waste, helping you maximize efficiency. The Auto-Fill system maintains perfect water levels for easy operation, and the unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, while a drip-free flange contains moisture and spills. The easy-to-use infinite controls ensure accurate temperature settings and are detachable for remote mounting, making this drop-in a popular, reliable choice.

- Made in the USA
- Marine-grade stainless steel stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance
- High-density glass fiber insulation on the sides, ends and below the element traps heat and maximizes energy efficiency
- Easy-to-use infinite controls ensure accurate temperature settings
- Detachable control unit for remote mounting
- Auto-Fill system maintains perfect water levels for easy operation
- Energy-efficient heating element uses smaller circuit and reduces installation costs while offering comparable performance to higher-wattage elements
- Drip-free flange contains moisture and spills
- Cord and plug configuration eliminates the need for hardwiring
- NSF-certified

One-well 208- to-240-volt 1000-watt modular marine-grade stainless steel drop-in hot well with manifold drain, thermostatic controls and Auto-Fill system

Keep a variety of food items at perfect serving temperatures with ease, thanks to the one-well modular drop-in hot well by Vollrath. Made with marine-grade stainless steel, this durable food well stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance. High-density glass fiber insulation reduces energy waste, helping you maximize efficiency, and the Auto-Fill system maintains perfect water levels for easy operation. The unique design uses a smaller circuit, reduces installation costs and provides comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, while a drip-free flange contains moisture and spills. The remote control panel offers convenient operation, and the thermostatic controls ensure accurate heating.

- Made in the USA
- Marine-grade stainless steel stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance
- High-density glass fiber insulation on the sides, ends and below the element traps heat and maximizes energy efficiency
- Reliable thermostatic controls ensure accurate heating
- Detachable control unit for remote mounting
- Auto-Fill system maintains perfect water levels for easy operation
- Energy-efficient heating element uses smaller circuit and reduces installation costs while providing comparable performance to higher-wattage elements
- Manifold drains with individual well shutoffs for user convenience
- Full-perimeter gasket under drip flange reduces installation time
- Drip-free flange contains moisture and spills
- Cord and plug configuration eliminates the need for hardwiring
- Removable bottom panels allow for service access
- NSF-certified
- 2-year standard limited warranty
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces

The Auto-Fill system maintains perfect water levels for easy operation, and the unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, while a drip-free flange contains moisture and spills. The easy-to-use infinite controls ensure accurate temperature settings and are detachable for remote mounting, making this drop-in a popular, reliable choice.

- Made in the USA
- Marine-grade stainless steel stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance
- High-density glass fiber insulation on the sides, ends and below the element traps heat and maximizes energy efficiency
- Reliable thermostatic controls ensure accurate heating
- Detachable control unit for remote mounting
- Energy-efficient heating element uses smaller circuit and reduces installation costs while offering comparable performance to higher-wattage elements
- Full-perimeter gasket under drip flange reduces installation time
- Manifold drains with individual well shutoffs for user convenience
- Full-perimeter gasket under drip flange reduces installation time
- NSF-certified

Four-well 208- to 240-volt 4000-watt short-side modular drop-in hot well with standard drain, infinite controls and flat flange

Perfect for narrow serving areas, the four-well short-side modular drop-in hot well by Vollrath saves space without compromising quality. Made of 300-Series stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing. The unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features an individual drain shutoff for convenience, while the flat flange creates a sleek, streamlined appearance. The easy-to-use infinite controls ensure accurate temperature settings and are detachable for remote mounting, making this drop-in a popular, reliable choice.

- Made in the USA
- 300-Series stainless steel is durable and long-lasting
- High-density glass fiber insulation on the sides, ends and below the element traps heat
- Easy-to-use infinite controls ensure accurate temperature settings
- Detachable control unit for remote mounting
- Energy-efficient heating element uses smaller circuit and reduces installation costs while offering comparable performance to higher-wattage elements
- Individual drain shutoffs for user convenience
- Flat flange creates a sleek, streamlined appearance
- Cord and plug configuration eliminates the need for hardwiring
- Short-side design is perfect for narrow serving areas
- NSF-certified
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces
- 6 ?-inch depth accommodates 6-inch-deep pans
- Please note this is a made-to-order item. These items require additional time for fulfillment. Made-to-order items cannot be changed, canceled or returned and may be subject to a minimum-order quantity. Contact your Vollrath sales representative for details.

Two-well 120-volt 1250-watt short-side modular drop-in hot well with manifold drain, thermostatic controls and flat flange

Perfect for narrow serving areas, the two-well 120-volt short-side modular drop-in hot well by Vollrath saves space without compromising quality. Made of 300-Series stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing. The unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, while the flat flange creates a sleek, streamlined appearance. The thermostatic controls ensure accurate heating and are detachable for remote mounting, making this drop-in a popular, reliable choice.

- Made in the USA
- 300-Series stainless steel is durable and long-lasting
- High-density glass fiber insulation on the sides, ends and below the element traps heat
- Reliable thermostatic controls ensure accurate heating
- Detachable control unit for remote mounting
- Energy-efficient heating element uses smaller circuit and reduces installation costs while offering comparable performance to higher-wattage elements
- Manifold drains with individual well shutoffs for user convenience
- Flat flange creates a sleek, streamlined appearance
- Cord and plug configuration eliminates the need for hardwiring
- Short-side design is perfect for narrow serving areas
- NSF-certified
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces
- 6 ?-inch depth accommodates 6-inch-deep pans
- Please note this is a made-to-order item. These items require additional time for fulfillment. Made-to-order items cannot be changed, canceled or returned and may be subject to a minimum-order quantity. Contact your Vollrath sales representative for details.

Two-well 208- to 240-volt 2000-watt short-side modular drop-in hot well with manifold drain, infinite controls and flat flange

Perfect for narrow serving areas, the two-well short-side modular drop-in hot well by Vollrath saves space without compromising quality. Made of 300-Series stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing. The unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, while the flat flange creates a sleek, streamlined appearance. The easy-to-use infinite controls ensure accurate temperature settings and are detachable for remote mounting, making this drop-in a popular, reliable choice.

- Flat flange creates a sleek, streamlined appearance
- Cord and plug configuration eliminates the need for hardwiring
- Short-side design is perfect for narrow serving areas
- NSF-certified
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces
- 6 ?-inch depth accommodates 6-inch-deep pans
- Please note this is a made-to-order item. These items require additional time for fulfillment. Made-to-order items cannot be changed, canceled or returned and may be subject to a minimum-order quantity. Contact your Vollrath sales representative for details.

Two-well 208- to 240-volt 2000-watt short-side modular drop-in hot well with standard drain, thermostatic controls and flat flange

Perfect for narrow serving areas, the two-well short-side modular drop-in hot well by Vollrath saves space without compromising quality. Made of 300-Series stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing. The unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features an individual drain shutoff for convenience, while the flat flange creates a sleek, streamlined appearance. The thermostatic controls ensure accurate heating and are detachable for remote mounting, making this drop-in a popular, reliable choice.

- Made in the USA
- 300-Series stainless steel is durable and long-lasting
- High-density glass fiber insulation on the sides, ends and below the element traps heat
- Reliable thermostatic controls ensure accurate heating
- Detachable control unit for remote mounting
- Energy-efficient heating element uses smaller circuit and reduces installation costs while offering comparable performance to higher-wattage elements
- Individual drain shutoffs for user convenience
- Flat flange creates a sleek, streamlined appearance
- Cord and plug configuration eliminates the need for hardwiring
- Short-side design is perfect for narrow serving areas

The unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features an individual drain shutoff for convenience, while a drip-free flange contains moisture and spills. The easy-to-use infinite controls ensure accurate temperature settings, making this drop-in a popular, reliable choice.

- Made in the USA
- 300-Series stainless steel is durable and long-lasting
- High-density glass fiber insulation on the sides, ends and below the element traps heat
- Easy-to-use infinite controls ensure accurate temperature settings
- Energy-efficient heating element uses smaller circuit and reduces installation costs while offering comparable performance to higher-wattage elements
- Individual drain shutoffs for user convenience
- Full-perimeter gasket under drip flange reduces installation time
- Drip-free flange contains moisture and spills
- Cord and plug configuration eliminates the need for hardwiring
- Short-side design is perfect for narrow serving areas
- NSF-certified
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces
- 6 ?-inch depth accommodates 6-inch-deep pans
- Please note this is a made-to-order item. These items require additional time for fulfillment. Made-to-order items cannot be changed, canceled or returned and may be subject to a minimum-order quantity. Contact your Vollrath sales representative for details.

Three-well 208- to 240-volt 3000-watt short-side modular drop-in hot well with manifold drain and infinite controls

Perfect for narrow serving areas, the three-well short-side modular drop-in hot well by Vollrath saves space without compromising quality. Made of 300-Series stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing. The unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, while a drip-free flange contains moisture and spills. The easy-to-use infinite controls ensure accurate temperature settings and are detachable for remote mounting, making this drop-in a popular, reliable choice.

- Made in the USA
- 300-Series stainless steel is durable and long-lasting
- High-density glass fiber insulation on the sides, ends and below the element traps heat
- Easy-to-use infinite controls ensure accurate temperature settings
- Detachable control unit for remote mounting
- Energy-efficient heating element uses smaller circuit and reduces installation costs while offering comparable performance to higher-wattage elements
- Manifold drains with individual well shutoffs for user convenience
- Full-perimeter gasket under drip flange reduces installation time
- Drip-free flange contains moisture and spills
- Cord and plug configuration eliminates the need for hardwiring
- Short-side design is perfect for narrow serving areas

Made of 300-Series stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing. The Auto-Fill system maintains perfect water levels for easy operation, and the unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, while a drip-free flange contains moisture and spills. The easy-to-use infinite controls ensure accurate temperature settings and are detachable for remote mounting, making this drop-in a popular, reliable choice.

- Made in the USA
- 300-Series stainless steel is durable and long-lasting
- High-density glass fiber insulation on the sides, ends and below the element traps heat
- Easy-to-use infinite controls ensure accurate temperature settings
- Detachable control unit for remote mounting
- Auto-Fill system maintains perfect water levels for easy operation
- Energy-efficient heating element uses smaller circuit and reduces installation costs while offering comparable performance to higher-wattage elements
- Manifold drains with individual well shutoffs for user convenience
- Full-perimeter gasket under drip flange reduces installation time
- Drip-free flange contains moisture and spills
- Cord and plug configuration eliminates the need for hardwiring
- Short-side design is perfect for narrow serving areas
- NSF-certified
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces
- 6 ?-inch depth accommodates 6-inch-deep pans

Three-well 120-volt 1875-watt short-side modular drop-in hot well with manifold drain and thermostatic controls

Perfect for narrow serving areas, the three-well 120-volt short-side modular drop-in hot well by Vollrath saves space without compromising quality. Made of 300-Series stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing. The unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, while a drip-free flange contains moisture and spills. The thermostatic controls ensure accurate heating and are detachable for remote mounting, making this drop-in a popular, reliable choice.

- Made in the USA
- 300-Series stainless steel is durable and long-lasting
- High-density glass fiber insulation on the sides, ends and below the element traps heat
- Reliable thermostatic controls ensure accurate heating
- Detachable control unit for remote mounting
- Energy-efficient heating element uses smaller circuit and reduces installation costs while offering comparable performance to higher-wattage elements
- Manifold drains with individual well shutoffs for user convenience
- Full-perimeter gasket under drip flange reduces installation time

Three-well 208- to 240-volt 3000-watt short-side modular drop-in hot well with standard drain and thermostatic controls

Perfect for narrow serving areas, the three-well short-side modular drop-in hot well by Vollrath saves space without compromising quality. Made of 300-Series stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing. The unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features an individual drain shutoff for convenience, while a drip-free flange contains moisture and spills. The thermostatic controls ensure accurate heating and are detachable for remote mounting, making this drop-in a popular, reliable choice.

- Made in the USA
- 300-Series stainless steel is durable and long-lasting
- High-density glass fiber insulation on the sides, ends and below the element traps heat
- Reliable thermostatic controls ensure accurate heating
- Detachable control unit for remote mounting
- Energy-efficient heating element uses smaller circuit and reduces installation costs while offering comparable performance to higher-wattage elements
- Individual drain shutoffs for user convenience
- Full-perimeter gasket under drip flange reduces installation time
- Drip-free flange contains moisture and spills
- Cord and plug configuration eliminates the need for hardwiring
- Short-side design is perfect for narrow serving areas
- NSF-certified
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces
- 6 ?-inch depth accommodates 6-inch-deep pans
- Please note this is a made-to-order item. These items require additional time for fulfillment. Made-to-order items cannot be changed, canceled or returned and may be subject to a minimum-order quantity. Contact your Vollrath sales representative for details.

Three-well 208- to 240-volt 3000-watt short-side modular marine-grade stainless steel drop-in hot well with manifold drain, thermostatic controls and flat flange

Perfect for narrow serving areas, the three-well short-side modular drop-in hot well by Vollrath saves space without compromising quality. Made with marine-grade stainless steel, this durable well stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance. High-density glass fiber insulation reduces energy waste, helping you maximize efficiency. The unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, while the flat flange creates a sleek, streamlined appearance. The thermostatic controls ensure accurate heating and are detachable for remote mounting, making this drop-in a popular, reliable choice.

High-density glass fiber insulation reduces energy waste, helping you maximize efficiency. The Auto-Fill system maintains perfect water levels for easy operation, and the unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, while a drip-free flange contains moisture and spills. The thermostatic controls ensure accurate heating and are detachable for remote mounting, making this drop-in a popular, reliable choice.

- Made in the USA
- Marine-grade stainless steel stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance
- High-density glass fiber insulation on the sides, ends and below the element traps heat and maximizes energy efficiency
- Reliable thermostatic controls ensure accurate heating
- Detachable control unit for remote mounting
- Auto-Fill system maintains perfect water levels for easy operation
- Energy-efficient heating element uses smaller circuit and reduces installation costs while offering comparable performance to higher-wattage elements
- Manifold drains with individual well shutoffs for user convenience
- Full-perimeter gasket under drip flange reduces installation time
- Drip-free flange contains moisture and spills
- Cord and plug configuration eliminates the need for hardwiring
- Short-side design is perfect for narrow serving areas
- NSF-certified
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces
- Please note this is a made-to-order item. These items require additional time for fulfillment. Made-to-order items cannot be changed, canceled or returned and may be subject to a minimum-order quantity. Contact your Vollrath sales representative for details.

Three-well 208- to 240-volt 3000-watt short-side modular marine-grade stainless steel drop-in hot well with manifold drain, infinite controls and Auto-Fill system

Perfect for narrow serving areas, the three-well short-side modular drop-in hot well by Vollrath saves space without compromising quality. Made with marine-grade stainless steel, this durable well stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance. High-density glass fiber insulation reduces energy waste, helping you maximize efficiency. The Auto-Fill system maintains perfect water levels for easy operation, and the unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, while a drip-free flange contains moisture and spills. The easy-to-use infinite controls ensure accurate temperature settings and are detachable for remote mounting, making this drop-in a popular, reliable choice.

Two-well 208- to 240-volt 2000-watt short-side modular marine-grade stainless steel drop-in hot well with manifold drain, infinite controls and Auto-Fill system

Perfect for narrow serving areas, the two-well short-side modular drop-in hot well by Vollrath saves space without compromising quality. Made with marine-grade stainless steel, this durable well stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance. High-density glass fiber insulation reduces energy waste, helping you maximize efficiency. The Auto-Fill system maintains perfect water levels for easy operation, and the unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, while a drip-free flange contains moisture and spills. The easy-to-use infinite controls ensure accurate temperature settings and are detachable for remote mounting, making this drop-in a popular, reliable choice.

Two-well 120-volt 1250-watt short-side modular marine-grade stainless steel drop-in hot well with manifold drain and thermostatic controls

Perfect for narrow serving areas, the two-well 120-volt short-side modular drop-in hot well by Vollrath saves space without compromising quality. Made with marine-grade stainless steel, this durable well stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance. High-density glass fiber insulation reduces energy waste, helping you maximize efficiency. The unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, while a drip-free flange contains moisture and spills. The thermostatic controls ensure accurate heating and are detachable for remote mounting, making this drop-in a popular, reliable choice.

- Made in the USA
- Marine-grade stainless steel stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance
- High-density glass fiber insulation on the sides, ends and below the element traps heat and maximizes energy efficiency
- Reliable thermostatic controls ensure accurate heating
- Detachable control unit for remote mounting
- Energy-efficient heating element uses smaller circuit and reduces installation costs while offering comparable performance to higher-wattage elements
- Manifold drains with individual well shutoffs for user convenience
- Full-perimeter gasket under drip flange reduces installation time
- Drip-free flange contains moisture and spills
- Cord and plug configuration eliminates the need for hardwiring
- Short-side design is perfect for narrow serving areas
- NSF-certified
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces
- 6 ?-inch depth accommodates 6-inch-deep pans
- 6 ?-inch depth accommodates 6-inch-deep pans

120 Volt Four-Well Short Side Modular Hot Drop Ins with Marine Grade Wells with Manifold Drain and Thermostatic Controls

Offer enhanced corrosion resistance and come with a standard two-year warranty

- Built with marine grade, 316 stainless steel to stand up to hard water and harsher cleaning techniques
- Available for all modular hot drop-ins and Signature Server Hot Stations
- Removable panels at the bottom of the well allow for service access

Three-well 120-volt 1875-watt short-side modular marine-grade stainless steel drop-in hot well with standard drain and infinite controls

Perfect for narrow serving areas, the three-well 120-volt short-side modular drop-in hot well by Vollrath saves space without compromising quality. Made with marine-grade stainless steel, this durable well stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance. High-density glass fiber insulation reduces energy waste, helping you maximize efficiency. The unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features an individual drain shutoff for convenience, while a drip-free flange contains moisture and spills. The easy-to-use infinite controls ensure accurate temperature settings and are detachable for remote mounting, making this drop-in a popular, reliable choice.

Four-well 120-volt 2500-watt short-side modular marine-grade stainless steel drop-in hot well with manifold drain, infinite controls and Auto-Fill system

Perfect for narrow serving areas, the four-well 120-volt short-side modular drop-in hot well by Vollrath saves space without compromising quality. Made with marine-grade stainless steel, this durable well stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance. High-density glass fiber insulation reduces energy waste, helping you maximize efficiency. The Auto-Fill system maintains perfect water levels for easy operation, and the unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, while a drip-free flange contains moisture and spills. The easy-to-use infinite controls ensure accurate temperature settings and are detachable for remote mounting, making this drop-in a popular, reliable choice.

Two-well 208- to 240-volt 2000-watt short-side modular marine-grade stainless steel drop-in hot well with manifold drain, thermostatic controls and Auto-Fill system

Perfect for narrow serving areas, the two-well short-side modular drop-in hot well by Vollrath saves space without compromising quality. Made with marine-grade stainless steel, this durable well stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance. High-density glass fiber insulation reduces energy waste, helping you maximize efficiency. The Auto-Fill system maintains perfect water levels for easy operation, and the unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, while a drip-free flange contains moisture and spills. The thermostatic controls ensure accurate heating and are detachable for remote mounting, making this drop-in a popular, reliable choice.

- Made in the USA
- Marine-grade stainless steel stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance
- High-density glass fiber insulation on the sides, ends and below the element traps heat and maximizes energy efficiency
- Reliable thermostatic controls ensure accurate heating
- Detachable control unit for remote mounting
- Auto-Fill system maintains perfect water levels for easy operation
- Energy-efficient heating element uses smaller circuit and reduces installation costs while offering comparable performance to higher-wattage elements
- Manifold drains with individual well shutoffs for user convenience
- Full-perimeter gasket under drip flange reduces installation time
- Drip-free flange contains moisture and spills
- Cord and plug configuration eliminates the need for hardwiring
- Short-side design is perfect for narrow serving areas
- NSF-certified
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces
- Please note this is a made-to-order item. These items require additional time for fulfillment. Made-to-order items cannot be changed, canceled or returned and may be subject to a minimum-order quantity. Contact your Vollrath sales representative for details.

Six-well 208- to 240-volt 6000-watt modular drop-in hot well with standard drain, infinite controls and flat flange

Keep a variety of food items at perfect serving temperatures with ease, thanks to the six-well modular drop-in hot well by Vollrath. Made of 300-Series stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing. The unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features an individual drain shutoff for convenience, and the flat flange creates a sleek, streamlined appearance. The easy-to-use infinite controls ensure accurate temperature settings and are detachable for remote mounting, making this drop-in a popular, reliable choice.

- Made in the USA

Six-well 208-volt 3750-watt modular drop-in hot well with manifold drain, infinite controls, Auto-Fill system and flat flange

Keep a variety of food items at perfect serving temperatures with ease, thanks to the six-well 208-volt modular drop-in hot well by Vollrath. Made of 300-Series stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing. The Auto-Fill system maintains perfect water levels for easy operation, and the unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, and the flat flange creates a sleek, streamlined appearance. The control panel can be mounted remotely for convenient operation, and the easy-to-use infinite controls ensure accurate temperature settings.

- Made in the USA
- 300-Series stainless steel is durable and long-lasting
- High-density glass fiber insulation on the sides, ends and below the element traps heat
- Easy-to-use infinite controls ensure accurate temperature settings
- Detachable control unit for remote mounting
- Auto-Fill system maintains perfect water levels for easy operation
- Energy-efficient heating element uses smaller circuit and reduces installation costs while offering comparable performance to higher-wattage elements
- Manifold drains with individual well shutoffs for user convenience
- Flat flange creates a sleek, streamlined appearance
- Cord and plug configuration eliminates the need for hardwiring
- NSF-certified
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces
- 6 ?-inch depth accommodates 6-inch-deep pans
- Please note this is a made-to-order item. These items require additional time for fulfillment. Made-to-order items cannot be changed, canceled or returned and may be subject to a minimum-order quantity. Contact your Vollrath sales representative for details.

Six-well 240-volt 3750-watt modular drop-in hot well with standard drain and thermostatic controls

Keep a variety of food items at perfect serving temperatures with ease, thanks to the six-well modular drop-in hot well by Vollrath. Made of 300-Series stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing. The unique design requires a smaller circuit, reduces installation costs and provides comparable performance to higher-wattage elements. Each well features an individual drain shutoff for convenience, while a drip-free flange contains moisture and spills. The remote control panel offers convenient operation, and the thermostatic controls ensure accurate heating.

- Made in the USA
- 300-Series stainless steel is durable and long-lasting
- High-density glass fiber insulation on the sides, ends and below the element traps heat
- Reliable thermostatic controls ensure accurate heating
- Detachable control unit for remote mounting
- Energy-efficient heating element uses smaller circuit and reduces installation costs while providing comparable performance to higher-wattage elements
- Individual drain shutoffs for user convenience
- Full-perimeter gasket under drip flange reduces installation time
- Drip-free flange contains moisture and spills
- Cord and plug configuration eliminates the need for hardwiring
- NSF-certified
- 2-year standard limited warranty
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces

Six-well 208 to 240-volt 6000-watt modular drop-in hot well with manifold drain, infinite controls and Auto-Fill system

Keep a variety of food items at perfect serving temperatures with ease, thanks to the six-well modular drop-in hot well by Vollrath. Made of 300-Series stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing. The Auto-Fill system maintains perfect water levels for easy operation, and the unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, while a drip-free flange contains moisture and spills. The control panel can be mounted remotely for convenient operation, and the easy-to-use infinite controls ensure accurate temperature settings.

- Made in the USA
- 300-Series stainless steel is durable and long-lasting
- High-density glass fiber insulation on the sides, ends and below the element traps heat
- Easy-to-use infinite controls ensure accurate temperature settings
- Detachable control unit for remote mounting
- Auto-Fill system maintains perfect water levels for easy operation
- Energy-efficient heating element uses smaller circuit and reduces installation costs while offering comparable performance to higher-wattage elements
- Manifold drains with individual well shutoffs for user convenience
- Full-perimeter gasket under drip flange reduces installation time
- Drip-free flange contains moisture and spills
- Cord and plug configuration eliminates the need for hardwiring
- NSF-certified
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces
- 6 ?-inch depth accommodates 6-inch-deep pans
- Please note this is a made-to-order item. These items require additional time for fulfillment. Made-to-order items cannot be changed, canceled or returned and may be subject to a minimum-order quantity. Contact your Vollrath sales representative for details.

Six-well 208- to 240-volt 6000-watt modular marine-grade stainless steel drop-in hot well with manifold drain, thermostatic controls, Auto-Fill system and flat flange

Keep a variety of food items at perfect serving temperatures with ease, thanks to the six-well modular drop-in hot well by Vollrath. Made with marine-grade stainless steel, this durable well stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance. High-density glass fiber insulation reduces energy waste, helping you maximize efficiency. The Auto-Fill system maintains perfect water levels for easy operation, and the unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, while the flat flange creates a sleek, streamlined appearance. The control panel can be mounted remotely for convenient operation, and thermostatic controls ensure accurate heating.

- Made in the USA
- Marine-grade stainless steel stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance
- High-density glass fiber insulation on the sides, ends and below the element traps heat
- Reliable thermostatic controls ensure accurate heating
- Detachable control unit for remote mounting
- Auto-Fill system maintains perfect water levels for easy operation
- Energy-efficient heating element uses smaller circuit and reduces installation costs while offering comparable performance to higher-wattage elements
- Manifold drains with individual well shutoffs for user convenience
- Flat flange creates a sleek, streamlined appearance
- Cord and plug configuration eliminates the need for hardwiring
- NSF-certified
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces
- 6 ?-inch depth accommodates 6-inch-deep pans
- Please note this is a made-to-order item. These items require additional time for fulfillment. Made-to-order items cannot be changed, canceled or returned and may be subject to a minimum-order quantity. Contact your Vollrath sales representative for details.

Six-well 208- to 240-volt 6000-watt modular marine-grade stainless steel drop-in hot well with manifold drain, infinite controls and flat flange

Keep a variety of food items at perfect serving temperatures with ease, thanks to the six-well modular drop-in hot well by Vollrath. Made with marine-grade stainless steel, this durable well stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance. High-density glass fiber insulation reduces energy waste, helping you maximize efficiency. The unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, while the flat flange creates a sleek, streamlined appearance. The easy-to-use infinite controls ensure accurate temperature settings and are detachable for remote mounting, making this drop-in a popular, reliable choice.

Made with marine-grade stainless steel, this durable well stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance. High-density glass fiber insulation reduces energy waste, helping you maximize efficiency. The Auto-Fill system maintains perfect water levels for easy operation, and the unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, while a drip-free flange contains moisture and spills. The control panel can be mounted remotely for convenient operation, and the easy-to-use infinite controls ensure accurate temperature settings.

- Made in the USA
- Marine-grade stainless steel stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance
- High-density glass fiber insulation on the sides, ends and below the element traps heat
- Easy-to-use infinite controls ensure accurate temperature settings
- Detachable control unit for remote mounting
- Auto-Fill system maintains perfect water levels for easy operation
- Energy-efficient heating element uses smaller circuit and reduces installation costs while offering comparable performance to higher-wattage elements
- Manifold drains with individual well shutoffs for user convenience
- Full-perimeter gasket under drip flange reduces installation time
- Drip-free flange contains moisture and spills
- Cord and plug configuration eliminates the need for hardwiring
- NSF-certified
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces
- 6 ?-inch depth accommodates 6-inch-deep pans
- Please note this is a made-to-order item. These items require additional time for fulfillment. Made-to-order items cannot be changed, canceled or returned and may be subject to a minimum-order quantity. Contact your Vollrath sales representative for details.

Six-well 208- to 240-volt 6000-watt modular marine-grade stainless steel drop-in hot well with standard drain and thermostatic controls

Keep a variety of food items at perfect serving temperatures with ease, thanks to the six-well modular drop-in hot well by Vollrath. Made with marine-grade stainless steel, this durable well stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance. High-density glass fiber insulation reduces energy waste, helping you maximize efficiency. The unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features an individual drain shutoff for convenience, while a drip-free flange contains moisture and spills. The control panel can be mounted remotely for convenient operation, and thermostatic controls ensure accurate heating.

- Made in the USA

Six-well 208- to 240-volt 6000-watt modular marine-grade stainless steel drop-in hot well with standard drain and infinite controls

Keep a variety of food items at perfect serving temperatures with ease, thanks to the six-well modular drop-in hot well by Vollrath. Made with marine-grade stainless steel, this durable well stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance. High-density glass fiber insulation reduces energy waste, helping you maximize efficiency. The unique design requires a smaller circuit, reduces installation costs and provides comparable performance to higher-wattage elements. Each well features an individual drain shutoff for convenience, while a drip-free flange contains moisture and spills. The easy-to-use infinite controls ensure accurate temperature settings and are detachable for remote mounting, making this hot well a popular, reliable choice.

Three-well 208- to 240-volt 3000-watt modular drop-in hot well with manifold drain, thermostatic controls, Auto-Fill system and flat flange

Keep a variety of food items at perfect serving temperatures with ease, thanks to the three-well modular drop-in hot well by Vollrath. Made of 300-Series stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing. The Auto-Fill system maintains perfect water levels for easy operation, and the unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, while the flat flange creates a sleek, streamlined appearance. The control panel can be mounted remotely for convenient operation, and thermostatic controls ensure accurate heating.

- Made in the USA
- 300-Series stainless steel is durable and long-lasting
- High-density glass fiber insulation on the sides, ends and below the element traps heat
- Reliable thermostatic controls ensure accurate heating
- Detachable control unit for remote mounting
- Auto-Fill system maintains perfect water levels for easy operation
- Energy-efficient heating element uses smaller circuit and reduces installation costs while offering comparable performance to higher-wattage elements
- Manifold drains with individual well shutoffs for user convenience
- Cord and plug configuration eliminates the need for hardwiring
- NSF-certified
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces
- 6 ?-inch depth accommodates 6-inch-deep pans

Three-well 120-volt 1875-watt modular drop-in hot well with standard drain, thermostatic controls and flat flange

Keep a variety of food items at perfect serving temperatures with ease, thanks to the three-well 120-volt modular drop-in hot well by Vollrath. Made of 300-Series stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing. The unique design requires a smaller circuit, reduces installation costs and provides comparable performance to higher-wattage elements. Each well features an individual drain shutoff for convenience, while the flat flange creates a sleek, streamlined appearance. The remote control panel offers convenient operation, and the thermostatic controls ensure accurate heating.

- Made in the USA
- 300-Series stainless steel is durable and long-lasting
- High-density glass fiber insulation on the sides, ends and below the element traps heat
- Reliable thermostatic controls ensure accurate heating
- Detachable control unit for remote mounting
- Energy-efficient heating element uses smaller circuit and reduces installation costs while providing comparable performance to higher-wattage elements
- Individual drain shutoffs for user convenience
- Flat flange creates sleek, streamlined appearance
- Cord and plug configuration eliminates the need for hardwiring
- NSF-certified
- 2-year standard limited warranty
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces
- 6 ?-inch depth accommodates 6-inch-deep pans
- 6 ?-inch depth accommodates 6-inch-deep pans

Three-well 120-volt 1875-watt modular drop-in hot well with manifold drain, thermostatic controls and flat flange

Keep a variety of food items at perfect serving temperatures with ease, thanks to the three-well 120-volt modular drop-in hot well by Vollrath. Made of 300-Series stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing. The unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, while the flat flange creates a sleek, streamlined appearance. The control panel can be mounted remotely for convenient operation, and thermostatic controls ensure accurate heating.

Three-well 240-volt 1875-watt modular drop-in hot well with standard drain, infinite controls and flat flange

Keep a variety of food items at perfect serving temperatures with ease, thanks to the three-well 240-volt modular drop-in hot well by Vollrath. Made of 300-Series stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing. The unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features an individual drain shutoff for convenience, while the flat flange creates a sleek, streamlined appearance. The easy-to-use infinite controls ensure accurate temperature settings and are detachable for remote mounting, making this drop-in a popular, reliable choice.

- Made in the USA
- 300-Series stainless steel is durable and long-lasting
- High-density glass fiber insulation on the sides, ends and below the element traps heat
- Easy-to-use infinite controls ensure accurate temperature settings
- Detachable control unit for remote mounting
- Energy-efficient heating element uses smaller circuit and reduces installation costs while offering comparable performance to higher-wattage elements
- Individual drain shutoffs for user convenience
- Flat flange creates sleek, streamlined appearance
- Cord and plug configuration eliminates the need for hardwiring
- NSF-certified
- 2-year standard limited warranty
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces
- 6 ?-inch depth accommodates 6-inch-deep pans
- 6 ?-inch depth accommodates 6-inch-deep pans

Three-well 120-volt 1875-watt modular drop-in hot well with manifold drain, thermostatic controls, Auto-Fill system and flat flange

Keep a variety of food items at perfect serving temperatures with ease, thanks to the three-well 120-volt modular drop-in hot well by Vollrath. Made of 300-Series stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing. The Auto-Fill system maintains perfect water levels for easy operation, and the unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, while the flat flange creates a sleek, streamlined appearance. The control panel can be mounted remotely for convenient operation, and thermostatic controls ensure accurate heating.

- Made in the USA
- 300-Series stainless steel is durable and long-lasting
- High-density glass fiber insulation on the sides, ends and below the element traps heat
- Reliable thermostatic controls ensure accurate heating
- Detachable control unit for remote mounting
- Auto-Fill system maintains perfect water levels for easy operation
- Energy-efficient heating element uses smaller circuit and reduces installation costs while offering comparable performance to higher-wattage elements
- Manifold drains with individual well shutoffs for user convenience
- Flat flange creates sleek, streamlined appearance
- Cord and plug configuration eliminates the need for hardwiring
- NSF-certified
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces
- 6 ?-inch depth accommodates 6-inch-deep pans
- Please note this is a made-to-order item. These items require additional time for fulfillment. Made-to-order items cannot be changed, canceled or returned and may be subject to a minimum-order quantity. Contact your Vollrath sales representative for details.

Three-well 208-volt 1875-watt modular drop-in hot well with manifold drain, infinite controls and Auto-Fill system

Keep a variety of food items at perfect serving temperatures with ease, thanks to the three-well 208-volt modular drop-in hot well by Vollrath. Made of 300-Series stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing. The Auto-Fill system maintains perfect water levels for easy operation, and the unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, while a drip-free flange contains moisture and spills. The control panel can be mounted remotely for convenient operation, and the easy-to-use infinite controls ensure accurate temperature settings.

- Made in the USA
- 300-Series stainless steel is durable and long-lasting
- High-density glass fiber insulation on the sides, ends and below the element traps heat
- Easy-to-use infinite controls ensure accurate temperature settings
- Detachable control unit for remote mounting
- Auto-Fill system maintains perfect water levels for easy operation
- Energy-efficient heating element uses smaller circuit and reduces installation costs while offering comparable performance to higher-wattage elements
- Manifold drains with individual well shutoffs for user convenience
- Full-perimeter gasket under drip flange reduces installation time
- Drip-free flange contains moisture and spills
- Cord and plug configuration eliminates the need for hardwiring
- NSF-certified
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces
- Please note this is a made-to-order item. These items require additional time for fulfillment. Made-to-order items cannot be changed, canceled or returned and may be subject to a minimum-order quantity. Contact your Vollrath sales representative for details.

Three-well 240-volt 1875-watt modular drop-in hot well with standard drain and thermostatic controls

Keep a variety of food items at perfect serving temperatures with ease, thanks to the three-well 240-volt modular drop-in hot well by Vollrath. Made of 300-Series stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing. The unique design requires a smaller circuit, reduces installation costs and provides comparable performance to higher-wattage elements. Each well features an individual drain shutoff for convenience, while a drip-free flange contains moisture and spills. The remote control panel offers convenient operation, and the thermostatic controls ensure accurate heating.

- Made in the USA
- 300-Series stainless steel is durable and long-lasting
- High-density glass fiber insulation on the sides, ends and below the element traps heat
- Reliable thermostatic controls ensure accurate heating
- Detachable control unit for remote mounting

Three-well 208-volt 1875-watt modular drop-in hot well with standard drain and thermostatic controls

Keep a variety of food items at perfect serving temperatures with ease, thanks to the three-well 208-volt modular drop-in hot well by Vollrath. Made of 300-Series stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing. The unique design requires a smaller circuit, reduces installation costs and provides comparable performance to higher-wattage elements. Each well features an individual drain shutoff for convenience, while a drip-free flange contains moisture and spills. The remote control panel offers convenient operation, and the thermostatic controls ensure accurate heating.

- Made in the USA
- 300-Series stainless steel is durable and long-lasting
- High-density glass fiber insulation on the sides, ends and below the element traps heat
- Reliable thermostatic controls ensure accurate heating
- Detachable control unit for remote mounting
- Energy-efficient heating element uses smaller circuit and reduces installation costs while providing comparable performance to higher-wattage elements
- Individual drain shutoffs for user convenience
- Full-perimeter gasket under drip flange reduces installation time
- Drip-free flange contains moisture and spills
- Cord and plug configuration eliminates the need for hardwiring

Three-well 208-volt 1875-watt modular drop-in hot well with manifold drain and infinite controls

Keep a variety of food items at perfect serving temperatures with ease, thanks to the three-well 208-volt modular drop-in hot well by Vollrath. Made of 300-Series stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing. The unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, while a drip-free flange contains moisture and spills. The easy-to-use infinite controls ensure accurate temperature settings and are detachable for remote mounting, making this drop-in a popular, reliable choice.

- Made in the USA
- 300-Series stainless steel is durable and long-lasting
- High-density glass fiber insulation on the sides, ends and below the element traps heat
- Easy-to-use infinite controls ensure accurate temperature settings
- Detachable control unit for remote mounting
- Energy-efficient heating element uses smaller circuit and reduces installation costs while offering comparable performance to higher-wattage elements
- Manifold drains with individual well shutoffs for user convenience
- Full-perimeter gasket under drip flange reduces installation time
- Full-perimeter gasket under drip flange reduces installation time
- Drip-free flange contains moisture and spills
- Cord and plug configuration eliminates the need for hardwiring
- NSF-certified
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces
- Please note this is a made-to-order item. These items require additional time for fulfillment. Made-to-order items cannot be changed, canceled or returned and may be subject to a minimum-order quantity. Contact your Vollrath sales representative for details.

Three-well 120-volt 1875-watt modular drop-in hot well with manifold drain, thermostatic controls and Auto-Fill system

Keep a variety of food items at perfect serving temperatures with ease, thanks to the three-well 120-volt modular drop-in hot well by Vollrath. Made of 300-Series stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing. The Auto-Fill system maintains perfect water levels for easy operation, and the unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, while a drip-free flange contains moisture and spills. The control panel can be mounted remotely for convenient operation, and thermostatic controls ensure accurate heating.

- Made in the USA
- 300-Series stainless steel is durable and long-lasting

Three-well 208- to 240-volt 3000-watt modular drop-in hot well with standard drain and thermostatic controls

Keep a variety of food items at perfect serving temperatures with ease, thanks to the three-well modular drop-in hot well by Vollrath. Made of 300-Series stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing. The unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features an individual drain shutoff for convenience, while a drip-free flange contains moisture and spills. The control panel can be mounted remotely for convenient operation, and thermostatic controls ensure accurate heating.

- Made in the USA
- 300-Series stainless steel is durable and long-lasting
- High-density glass fiber insulation on the sides, ends and below the element traps heat
- Reliable thermostatic controls ensure accurate heating
- Detachable control unit for remote mounting
- Energy-efficient heating element uses smaller circuit and reduces installation costs while offering comparable performance to higher-wattage elements
- Manifold drains with individual well shutoffs for user convenience
- Full-perimeter gasket under drip flange reduces installation time
- Drip-free flange contains moisture and spills
- Cord and plug configuration eliminates the need for hardwiring
- NSF-certified
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces
- 6 ?-inch depth accommodates 6-inch-deep pans
- Please note this is a made-to-order item. These items require additional time for fulfillment. Made-to-order items cannot be changed, canceled or returned and may be subject to a minimum-order quantity. Contact your Vollrath sales representative for details.

7-quart 240-volt round modular soup drop-in hot well with infinite controls

Serve delicious soups at perfect serving temperatures with the round modular soup drop-in hot well by Vollrath. Made of 300-Series stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing. The 6-foot power cord and 4-foot control cord offer flexibility of placement, with no hardwiring required. The easy-to-use infinite controls ensure accurate temperature settings, while the ?-inch ball valve shutoff drain creates a reliable seal.

- Made in the USA
- Double-wall stainless steel construction is durable and long-lasting
- High-density glass fiber insulation helps trap heat
- Easy-to-use infinite controls ensure accurate temperature settings
- NSF-certified
- ?-inch ball valve shutoff drain creates a tight seal
- 6-foot power cord and 4-foot control cord offer flexibility in placement and don't require hardwiring

120-volt top-mount fabricator drop-in hot well with standard drain and thermostatic controls

Promising superior results and exceptional energy efficiency, the top-mount drop-in hot well by Vollrath is an effective, consistent and convenient choice. Made of 18-8 grade stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing, and the 6 ?-inch depth fits full- or fractional-size pans up to 6 inches deep. With a unique, energy-efficient design, this hot well offers comparable performance to higher-wattage elements. The control unit can be mounted remotely for convenient operation, and thermostatic controls ensure accurate heating. The zero clearance allows installation flexibility, while the beveled edge is quick and easy to clean.

- Made in the USA
- 18-8 grade stainless steel is durable and long-lasting
- High-density glass fiber insulation on the sides, ends and below the element traps heat
- Remote-mounted control unit for convenient, easy operation
- Reliable thermostatic controls ensure accurate heating
- Energy-efficient heating element offers performance comparable to higher-wattage elements
- Standard drain and drain screen included
- Built-in positioning band for easy installation
- Standard mounting tabs provided for sheet metal counters
- Optional mounting kit available for laminate and solid-surface countertops (Vollrath® item number 36370)
- NSF-certified
- 6 ?-inch depth accommodates full- and fractional-size pans up to 6 inches deep
- Please note this is a made-to-order item. These items require additional time for fulfillment. Made-to-order items cannot be changed, canceled or returned and may be subject to a minimum-order quantity. Contact your Vollrath sales representative for details.

With a unique, energy-efficient design, this hot well offers comparable performance to higher-wattage elements. The control unit can be mounted remotely for convenient operation, and thermostatic controls ensure accurate heating. The zero clearance allows installation flexibility, while the beveled edge is quick and easy to clean.

- Made in the USA
- 18-8 grade stainless steel is durable and long-lasting
- High-density glass fiber insulation on the sides, ends and below the element traps heat
- Remote-mounted control unit for convenient, easy operation
- Reliable thermostatic controls ensure accurate heating
- Energy-efficient heating element offers performance comparable to higher-wattage elements
- Standard drain and drain screen included
- Built-in positioning band for easy installation
- Standard mounting tabs provided for sheet metal counters
- Optional mounting kit available for laminate and solid-surface countertops (Vollrath® item number 36370)
- NSF-certified
- 6 ?-inch depth accommodates full- and fractional-size pans up to 6 inches deep
- Please note this is a made-to-order item. These items require additional time for fulfillment. Made-to-order items cannot be changed, canceled or returned and may be subject to a minimum-order quantity. Contact your Vollrath sales representative for details.

Three-well 208- to 240-volt 3000-watt modular marine-grade stainless steel drop-in hot well with manifold drain, thermostatic controls and flat flange

Keep a variety of food items at perfect serving temperatures with ease, thanks to the three-well modular drop-in hot well by Vollrath. Made with marine-grade stainless steel, this durable well stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance. High-density glass fiber insulation reduces energy waste, helping you maximize efficiency. The unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, while the flat flange creates a sleek, streamlined appearance. The control panel can be mounted remotely for convenient operation, and thermostatic controls ensure accurate heating.

- Made in the USA
- Marine-grade stainless steel stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance
- High-density glass fiber insulation on the sides, ends and below the element traps heat
- Reliable thermostatic controls ensure accurate heating
- Detachable control unit for remote mounting
- Energy-efficient heating element uses smaller circuit and reduces installation costs while offering comparable performance to higher-wattage elements
- Manifold drains with individual well shutoffs for user convenience
- Flat flange creates a sleek, streamlined appearance
- Flat flange creates sleek, streamlined appearance
- Cord and plug configuration eliminates the need for hardwiring
- NSF-certified
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces
- 6 ?-inch depth accommodates 6-inch-deep pans

Three-well 208- to 240-volt 3000-watt modular marine-grade stainless steel drop-in hot well with standard drain, infinite controls and flat flange

Keep a variety of food items at perfect serving temperatures with ease, thanks to the three-well modular drop-in hot well by Vollrath. Made with marine-grade stainless steel, this durable well stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance. High-density glass fiber insulation reduces energy waste, helping you maximize efficiency. The unique design requires a smaller circuit, reduces installation costs and provides comparable performance to higher-wattage elements. Each well features an individual drain shutoff for convenience, while a flat flange creates a sleek, streamlined appearance. The easy-to-use infinite controls ensure accurate temperature settings and are detachable for remote mounting, making this hot well a popular, reliable choice.

High-density glass fiber insulation reduces energy waste, helping you maximize efficiency. The unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, while a drip-free flange contains moisture and spills. The easy-to-use infinite controls ensure accurate temperature settings and are detachable for remote mounting, making this drop-in a popular, reliable choice.

- Made in the USA
- Marine-grade stainless steel stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance
- High-density glass fiber insulation on the sides, ends and below the element traps heat
- Easy-to-use infinite controls ensure accurate temperature settings
- Detachable control unit for remote mounting
- Energy-efficient heating element uses smaller circuit and reduces installation costs while offering comparable performance to higher-wattage elements
- Manifold drains with individual well shutoffs for user convenience
- Full-perimeter gasket under drip flange reduces installation time
- Drip-free flange contains moisture and spills
- Cord and plug configuration eliminates the need for hardwiring
- NSF-certified
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces
- 6 ?-inch depth accommodates 6-inch-deep pans
- 6 ?-inch depth accommodates 6-inch-deep pans

Three-well 208-volt 1875-watt modular marine-grade stainless steel drop-in hot well with manifold drain and thermostatic controls

Keep a variety of food items at perfect serving temperatures with ease, thanks to the three-well 208-volt modular drop-in hot well by Vollrath. Made with marine-grade stainless steel, this durable well stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance. High-density glass fiber insulation reduces energy waste, helping you maximize efficiency. The unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, while a drip-free flange contains moisture and spills. The control panel can be mounted remotely for convenient operation, and thermostatic controls ensure accurate heating.

Three-well 120-volt 1875-watt modular marine-grade stainless steel drop-in hot well with standard drain and infinite controls

Keep a variety of food items at perfect serving temperatures with ease, thanks to the three-well 120-volt modular drop-in hot well by Vollrath. Made with marine-grade stainless steel, this durable well stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance. High-density glass fiber insulation reduces energy waste, helping you maximize efficiency. The unique design requires a smaller circuit, reduces installation costs and provides comparable performance to higher-wattage elements. Each well features an individual drain shutoff for convenience, while a drip-free flange contains moisture and spills. The easy-to-use infinite controls ensure accurate temperature settings and are detachable for remote mounting, making this hot well a popular, reliable choice.

Three-well 120-volt 1875-watt modular marine-grade stainless steel drop-in hot well with manifold drain, infinite controls and Auto-Fill system

Keep a variety of food items at perfect serving temperatures with ease, thanks to the three-well 120-volt modular drop-in hot well by Vollrath. Made with marine-grade stainless steel, this durable well stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance. High-density glass fiber insulation reduces energy waste, helping you maximize efficiency. The Auto-Fill system maintains perfect water levels for easy operation, and the unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, while a drip-free flange contains moisture and spills. The control panel can be mounted remotely for convenient operation, and the easy-to-use infinite controls ensure accurate temperature settings.

Three-well 120-volt 3000-watt modular marine-grade stainless steel drop-in hot well with standard drain and infinite controls

Keep a variety of food items at perfect serving temperatures with ease, thanks to the three-well 120-volt modular drop-in hot well by Vollrath. Made with marine-grade stainless steel, this durable well stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance. High-density glass fiber insulation reduces energy waste, helping you maximize efficiency. The unique design requires a smaller circuit, reduces installation costs and provides comparable performance to higher-wattage elements. Each well features an individual drain shutoff for convenience, while a drip-free flange contains moisture and spills. The easy-to-use infinite controls ensure accurate temperature settings and are detachable for remote mounting, making this hot well a popular, reliable choice.

The Auto-Fill system maintains perfect water levels for easy operation, and the unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, while a drip-free flange contains moisture and spills. The control panel can be mounted remotely for convenient operation, and thermostatic controls ensure accurate heating.

- Made in the USA
- Marine-grade stainless steel stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance
- High-density glass fiber insulation on the sides, ends and below the element traps heat
- Reliable thermostatic controls ensure accurate heating
- Detachable control unit for remote mounting
- Auto-Fill system maintains perfect water levels for easy operation
- Energy-efficient heating element uses smaller circuit and reduces installation costs while offering comparable performance to higher-wattage elements
- Manifold drains with individual well shutoffs for user convenience
- Full-perimeter gasket under drip flange reduces installation time
- Drip-free flange contains moisture and spills
- Cord and plug configuration eliminates the need for hardwiring
- NSF-certified
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces
- Please note this is a made-to-order item. These items require additional time for fulfillment. Made-to-order items cannot be changed, canceled or returned and may be subject to a minimum-order quantity. Contact your Vollrath sales representative for details.

Three-well 240-volt 1875-watt modular marine-grade stainless steel drop-in hot well with standard drain and infinite controls

Keep a variety of food items at perfect serving temperatures with ease, thanks to the three-well 240-volt modular drop-in hot well by Vollrath. Made with marine-grade stainless steel, this durable well stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance. High-density glass fiber insulation reduces energy waste, helping you maximize efficiency. The unique design requires a smaller circuit, reduces installation costs and provides comparable performance to higher-wattage elements. Each well features an individual drain shutoff for convenience, while a drip-free flange contains moisture and spills. The easy-to-use infinite controls ensure accurate temperature settings and are detachable for remote mounting, making this hot well a popular, reliable choice.

High-density glass fiber insulation reduces energy waste, helping you maximize efficiency. The unique design requires a smaller circuit, reduces installation costs and provides comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, while a drip-free flange contains moisture and spills. The remote control panel offers convenient operation, and the thermostatic controls ensure accurate heating.

- Made in the USA
- Marine-grade stainless steel stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance
- High-density glass fiber insulation on the sides, ends and below the element traps heat and maximizes energy efficiency
- Reliable thermostatic controls ensure accurate heating
- Detachable control unit for remote mounting
- Energy-efficient heating element uses smaller circuit and reduces installation costs while providing comparable performance to higher-wattage elements
- Manifold drains with individual well shutoffs for user convenience
- Full-perimeter gasket under drip flange reduces installation time
- Drip-free flange contains moisture and spills
- Cord and plug configuration eliminates the need for hardwiring
- Removable bottom panels allow for service access
- NSF-certified
- 2-year standard limited warranty
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces
- 6 ?-inch depth accommodates 6-inch-deep pans

Three-well 208- to 240-volt 3000-watt modular marine-grade stainless steel drop-in hot well with manifold drain and infinite controls

Keep a variety of food items at perfect serving temperatures with ease, thanks to the three-well modular drop-in hot well by Vollrath. Made with marine-grade stainless steel, this durable food well stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance. High-density glass fiber insulation reduces energy waste, helping you maximize efficiency. The unique design requires a smaller circuit, reduces installation costs and provides comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, while a drip-free flange contains moisture and spills. The easy-to-use infinite controls ensure accurate temperature settings and are detachable for remote mounting, making this food well a popular, reliable choice.

Two-well 208-volt 1250-watt modular drop-in hot well with manifold drain, infinite controls, Auto-Fill system and flat flange

Keep a variety of food items at perfect serving temperatures with ease, thanks to the two-well 208-volt modular drop-in hot well by Vollrath. Made of 300-Series stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing. The Auto-Fill system maintains perfect water levels for easy operation, and the unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, while the flat flange creates a sleek, streamlined appearance. The control panel can be mounted remotely for convenient operation, and the easy-to-use infinite controls ensure accurate temperature settings.

- Made in the USA
- 300-Series stainless steel is durable and long-lasting
- High-density glass fiber insulation on the sides, ends and below the element traps heat

Case Lot Weight (lbs.) 105.0

Two-well 208-volt 1250-watt modular drop-in hot well with standard drain, infinite controls and flat flange

Keep a variety of food items at perfect serving temperatures with ease, thanks to the two-well 208-volt modular drop-in hot well by Vollrath. Made of 300-Series stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing. The unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features an individual drain shutoff for convenience, while the flat flange creates a sleek, streamlined appearance. The easy-to-use infinite controls ensure accurate temperature settings and are detachable for remote mounting, making this drop-in a popular, reliable choice.

- Made in the USA
- 300-Series stainless steel is durable and long-lasting
- High-density glass fiber insulation on the sides, ends and below the element traps heat
- Easy-to-use infinite controls ensure accurate temperature settings
- Detachable control unit for remote mounting
- Energy-efficient heating element uses smaller circuit and reduces installation costs while offering comparable performance to higher-wattage elements
- Individual drain shutoffs for user convenience
- Flat flange creates a sleek, streamlined appearance
- Cord and plug configuration eliminates the need for hardwiring
- NSF-certified
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces
- 6 ?-inch depth accommodates 6-inch-deep pans
- Please note this is a made-to-order item. These items require additional time for fulfillment. Made-to-order items cannot be changed, canceled or returned and may be subject to a minimum-order quantity. Contact your Vollrath sales representative for details.

Two-well 240-volt 1250-watt modular drop-in hot well with manifold drain, thermostatic controls and Auto-Fill system

Keep a variety of food items at perfect serving temperatures with ease, thanks to the two-well 240-volt modular drop-in hot well by Vollrath. Made of 300-Series stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing. The Auto-Fill system maintains perfect water levels for easy operation, and the unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, while a drip-free flange contains moisture and spills. The control panel can be mounted remotely for convenient operation, and thermostatic controls ensure accurate heating.

- Made in the USA
- 300-Series stainless steel is durable and long-lasting
- High-density glass fiber insulation on the sides, ends and below the element traps heat
- Reliable thermostatic controls ensure accurate heating
- Detachable control unit for remote mounting
- Auto-Fill system maintains perfect water levels for easy operation
- Energy-efficient heating element uses smaller circuit and reduces installation costs while offering comparable performance to higher-wattage elements
- Manifold drains with individual well shutoffs for user convenience
- Cord and plug configuration eliminates the need for hardwiring
- NSF-certified
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces
- 6 ?-inch depth accommodates 6-inch-deep pans
- Please note this is a made-to-order item. These items require additional time for fulfillment. Made-to-order items cannot be changed, canceled or returned and may be subject to a minimum-order quantity. Contact your Vollrath sales representative for details.

Two-well 240-volt 1250-watt modular drop-in hot well with standard drain and thermostatic controls

Keep a variety of food items at perfect serving temperatures with ease, thanks to the two-well 240-volt modular drop-in hot well by Vollrath. Made of 300-Series stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing. The unique design requires a smaller circuit, reduces installation costs and provides comparable performance to higher-wattage elements. Each well features an individual drain shutoff for convenience, while a drip-free flange contains moisture and spills. The remote control panel offers convenient operation, and the thermostatic controls ensure accurate heating.

- Made in the USA
- 300-Series stainless steel is durable and long-lasting
- High-density glass fiber insulation on the sides, ends and below the element traps heat
- Reliable thermostatic controls ensure accurate heating
- Detachable control unit for remote mounting
- Energy-efficient heating element uses smaller circuit and reduces installation costs while providing comparable performance to higher-wattage elements
- Individual drain shutoffs for user convenience
- Full-perimeter gasket under drip flange reduces installation time
- Drip-free flange contains moisture and spills
- Cord and plug configuration eliminates the need for hardwiring
- NSF-certified
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces
- 6 ?-inch depth accommodates 6-inch-deep pans
- 6 ?-inch depth accommodates 6-inch-deep pans

Two-well 208- to 240-volt 2000-watt modular drop-in hot well with manifold drain, thermostatic controls and Auto-Fill system

Keep a variety of food items at perfect serving temperatures with ease, thanks to the two-well modular drop-in hot well by Vollrath. Made of 300-Series stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing. The Auto-Fill system maintains perfect water levels for easy operation, and the unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, while a drip-free flange contains moisture and spills. The control panel can be mounted remotely for convenient operation, and thermostatic controls ensure accurate heating.

Two-well 120-volt 1250-watt modular drop-in hot well with manifold drain, thermostatic controls and Auto-Fill system

Keep a variety of food items at perfect serving temperatures with ease, thanks to the two-well modular drop-in hot well by Vollrath. Made of 300-Series stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing. The Auto-Fill system maintains perfect water levels for easy operation, and the unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, while a drip-free flange contains moisture and spills. The control panel can be mounted remotely for convenient operation, and thermostatic controls ensure accurate heating.

- Made in the USA
- 300-Series stainless steel is durable and long-lasting
- High-density glass fiber insulation on the sides, ends and below the element traps heat
- Reliable thermostatic controls ensure accurate heating
- Detachable control unit for remote mounting
- Auto-Fill system maintains perfect water levels for easy operation
- Energy-efficient heating element uses smaller circuit and reduces installation costs while offering comparable performance to higher-wattage elements
- Manifold drains with individual well shutoffs for user convenience
- Full-perimeter gasket under drip flange reduces installation time
- Drip-free flange contains moisture and spills
- Cord and plug configuration eliminates the need for hardwiring

Two-well 208- to 240-volt 2000-watt modular drop-in hot well with manifold drain and thermostatic controls

Keep a variety of food items at perfect serving temperatures with ease, thanks to the two-well modular drop-in hot well by Vollrath. Made of 300-Series stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing. The unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, while a drip-free flange contains moisture and spills. The control panel can be mounted remotely for convenient operation, and thermostatic controls ensure accurate heating.

- Made in the USA
- 300-Series stainless steel is durable and long-lasting
- High-density glass fiber insulation on the sides, ends and below the element traps heat
- Reliable thermostatic controls ensure accurate heating
- Detachable control unit for remote mounting
- Energy-efficient heating element uses smaller circuit and reduces installation costs while offering comparable performance to higher-wattage elements
- Manifold drains with individual well shutoffs for user convenience
- Full-perimeter gasket under drip flange reduces installation time
- Drip-free flange contains moisture and spills
- Cord and plug configuration eliminates the need for hardwiring
- NSF-certified
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces
- 6 ?-inch depth accommodates 6-inch-deep pans
- Please note this is a made-to-order item. These items require additional time for fulfillment. Made-to-order items cannot be changed, canceled or returned and may be subject to a minimum-order quantity. Contact your Vollrath sales representative for details.

Two-well 120-volt 1250-watt modular drop-in hot well with standard drain and infinite controls

Keep a variety of food items at perfect serving temperatures with ease, thanks to the two-well modular drop-in hot well by Vollrath. Made of 300-Series stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing. The unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features an individual drain shutoff for convenience, while a drip-free flange contains moisture and spills. The easy-to-use infinite controls ensure accurate temperature settings and are detachable for remote mounting, making this drop-in a popular, reliable choice.

Two-well 208- to 240-volt 2000-watt modular marine-grade stainless steel drop-in hot well with standard drain, thermostatic controls and flat flange

Keep a variety of food items at perfect serving temperatures with ease, thanks to the two-well modular drop-in hot well by Vollrath. Made with marine-grade stainless steel, this durable well stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance. High-density glass fiber insulation reduces energy waste, helping you maximize efficiency. The unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features an individual drain shutoff for convenience, while the flat flange creates a sleek, streamlined appearance. The control panel can be mounted remotely for convenient operation, and thermostatic controls ensure accurate heating.

Made with marine-grade stainless steel, this durable well stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance. High-density glass fiber insulation reduces energy waste, helping you maximize efficiency. The Auto-Fill system maintains perfect water levels for easy operation, and the unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, while a drip-free flange contains moisture and spills. The control panel can be mounted remotely for convenient operation, and the easy-to-use infinite controls ensure accurate temperature settings.

- Made in the USA
- Marine-grade stainless steel stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance
- High-density glass fiber insulation on the sides, ends and below the element traps heat
- Easy-to-use infinite controls ensure accurate temperature settings
- Detachable control unit for remote mounting
- Auto-Fill system maintains perfect water levels for easy operation
- Energy-efficient heating element uses smaller circuit and reduces installation costs while offering comparable performance to higher-wattage elements
- Manifold drains with individual well shutoffs for user convenience
- Full-perimeter gasket under drip flange reduces installation time
- Drip-free flange contains moisture and spills
- Cord and plug configuration eliminates the need for hardwiring
- NSF-certified
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces

Two-well 120-volt 2000-watt modular marine-grade stainless steel drop-in hot well with standard drain and infinite controls

Keep a variety of food items at perfect serving temperatures with ease, thanks to the two-well 120-volt modular drop-in hot well by Vollrath. Made with marine-grade stainless steel, this durable well stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance. High-density glass fiber insulation reduces energy waste, helping you maximize efficiency. The unique design requires a smaller circuit, reduces installation costs and provides comparable performance to higher-wattage elements. Each well features an individual drain shutoff for convenience, while a drip-free flange contains moisture and spills. The easy-to-use infinite controls ensure accurate temperature settings and are detachable for remote mounting, making this hot well a popular, reliable choice.

208 to 240 Volt Two-Well Modular Hot Drop-In with Marine Grade Wells with Manifold Drain and Thermostatic Controls

Offer enhanced corrosion resistance and come with a standard two-year warranty.

- Built with marine grade, 316 stainless steel to stand up to hard water and harsher cleaning techniques
- Available for all modular hot drop-ins and Signature Server Hot Stations
- Removable panels at the bottom of the well allow for service access

Two-well 208- to 240-volt 2000-watt modular marine-grade stainless steel drop-in hot well with standard drain and thermostatic controls

Keep a variety of food items at perfect serving temperatures with ease, thanks to the two-well modular drop-in hot well by Vollrath. Made with marine-grade stainless steel, this durable well stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance. High-density glass fiber insulation reduces energy waste, helping you maximize efficiency. The unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features an individual drain shutoff for convenience, while a drip-free flange contains moisture and spills. The control panel can be mounted remotely for convenient operation, and thermostatic controls ensure accurate heating.

- Made in the USA
- Marine-grade stainless steel stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance
- High-density glass fiber insulation on the sides, ends and below the element traps heat and maximizes energy efficiency
- Reliable thermostatic controls ensure accurate heating
- Detachable control unit for remote mounting
- Energy-efficient heating element uses smaller circuit and reduces installation costs while offering comparable performance to higher-wattage elements
- Individual drain shutoffs for user convenience
- Full-perimeter gasket under drip flange reduces installation time
- Drip-free flange contains moisture and spills
- Cord and plug configuration eliminates the need for hardwiring
- NSF-certified
- Mounting clips adjust to varying countertop thicknesses, from stainless steel to laminate surfaces
- 6 ?-inch depth accommodates 6-inch-deep pans

Two-well 208-volt 1250-watt modular marine-grade stainless steel drop-in hot well with standard drain and infinite controls

Keep a variety of food items at perfect serving temperatures with ease, thanks to the two-well 208-volt modular drop-in hot well by Vollrath. Made with marine-grade stainless steel, this durable well stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance. High-density glass fiber insulation reduces energy waste, helping you maximize efficiency. The unique design requires a smaller circuit, reduces installation costs and provides comparable performance to higher-wattage elements. Each well features an individual drain shutoff for convenience, while a drip-free flange contains moisture and spills. The easy-to-use infinite controls ensure accurate temperature settings and are detachable for remote mounting, making this hot well a popular, reliable choice.

Two-well 208- to 240-volt 2000-watt modular marine-grade stainless steel drop-in hot well with manifold drain, infinite controls and Auto-Fill system

Keep a variety of food items at perfect serving temperatures with ease, thanks to the two-well modular drop-in hot well by Vollrath. Made with marine-grade stainless steel, this durable well stands up to hard water and harsh cleaning techniques and offers enhanced corrosion resistance. High-density glass fiber insulation reduces energy waste, helping you maximize efficiency. The Auto-Fill system maintains perfect water levels for easy operation, and the unique energy-efficient design uses a smaller circuit, reduces installation costs and offers comparable performance to higher-wattage elements. Each well features a manifold drain with individual shutoffs for convenience, while a drip-free flange contains moisture and spills. The control panel can be mounted remotely for convenient operation, and the easy-to-use infinite controls ensure accurate temperature settings.

Two-well 120-volt modular drop-in dry induction hot well with flat flange

Thanks to reliable dry heat and powerful induction technology, the two-well 120-volt modular drop-in induction hot well by Vollrath promises superior performance and convenience. Made of strong stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing, and the induction heat is more efficient and accurate than steam. Two induction zones per well with adjustable temperature controls ensure easy operation and versatile, precise heating. Without the need for water, steam or drains, this drop-in hot well offers effortless operation and delicious heated results. And thanks to the sleek design, flat flange and cord-and-plug electrical, this hot well is easy to install, clean and maintain.

- Stainless steel construction is durable and long-lasting
- Insulation traps heat and maximizes energy efficiency
- Powerful induction heating is faster, more precise and 2.9 times more efficient than steam
- Two induction zones per well offer exceptional versatility
- Adjustable, remotely mounted temperature controls ensure easy operation and temperature accuracy
- Dry induction heating means there’s no need for water, steam or drains
- Sleek design is easy to clean
- Flat flange creates a sleek, streamlined appearance
- Two-well, 208- to 240-volt design
- Control unit is mounted remotely for convenient operation
- Custom decorative patterns or logos available — Contact your Vollrath sales representative for more information
- Compact, space-saving design

1-well 120 volt Modular Induction Dry Well Drop In with Flat Flange

Vollrath's modular induction dry well drop-ins use induction technology to deliver superior hot food holding and precise temperature control in a waterless well.

- Eliminates water, steam, drains and hassle
- Two induction zones per well with adjustable temperature control
- No hot steam, hot water or hot flanges
- 2.9 times more energy efficient than steam warming systems
- More precision and control to maintain freshness and quality
- Commercial-grade, durable and easy-to-clean
- Effortless installation with no hard wiring required

Made of strong stainless steel and insulated with high-density glass fiber, this hot well is equally durable and high-performing, and the induction heat is more efficient and accurate than steam. Two induction zones per well with adjustable temperature controls ensure easy operation and versatile, precise heating. Without the need for water, steam or drains, this drop-in hot well offers effortless operation and delicious heated results. And thanks to the sleek design and cord-and-plug electrical, this hot well is easy to install, clean and maintain.

- Stainless steel construction is durable and long-lasting
- Insulation traps heat and maximizes energy efficiency
- Powerful induction heating is faster, more precise and 2.9 times more efficient than steam
- Two induction zones per well offer exceptional versatility
- Adjustable, remotely mounted temperature controls ensure easy operation and temperature accuracy
- Dry induction heating means there’s no need for water, steam or drains
- Sleek design is easy to clean
- Three-well, 208- to 240-volt design
- Control unit is mounted remotely for convenient operation
- Cord-and-plug electrical eliminates the need for hardwiring, making installation simple
- Cord-and-plug electrical eliminates the need for hardwiring, making installation simple
- Covers and insets are also sold separately
- Intended for commercial warming stations

7-quart Mirage® drop-in induction rethermalizer with China plug

Reliable and easy to use, the Mirage drop-in induction rethermalizer by Vollrath fits seamlessly into your lineup and heats your soup, chili, mac and cheese or stew to perfect serving temperatures. Powerful induction technology does not require water, ensuring faster heating times, better temperature control and simpler operation. Three sensors monitor food temperatures on the inset, and an indicator light notifies you when the contents need to be stirred, helping to distribute heat evenly and prevent burning. And the unit won't provide heat until an induction-ready inset is placed inside to reduce energy waste. The remote control features four convenient presets or precise temperature settings in °F or °C, depending on your preference, and a locking function prevents accidental temperature changes. This exceptional product comes with a Vollrath induction-ready inset and top contemporary design inset cover, providing everything you need for operation.

- Designed for soup, chili, mac and cheese, stew and more
- Powerful induction heating works quickly to heat food and hold it at safe temperatures
- Dry induction heating means no water is needed for convenient operation
- Digital controls allow precise temperature from 100-190°F in 1 degree increments.
- Digital controls allow precise temperature settings in °F or °C

- Locking function prevents accidental temperature changes
- Presets included for broth- or cream-based soups, chili and mac and cheese for convenience
- Three temperature sensors monitor heat distribution
- Indicator light alerts operator when stirring is needed, preventing burning and reducing waste
- NSF-certified
- Vollrath induction-ready inset (Vollrath® item number 88184) and inset cover (Vollrath item number 47493) included — use of Vollrath induction-ready insets required
- Contemporary lid design allows convenient, quick serving and helps condensation return to the inset to maintain food quality and prevent messes.
- Covers and insets are also sold separately
- 6-foot cord with China plug

Reliable and easy to use, the Mirage drop-in induction rethermalizer by Vollrath fits seamlessly into your lineup and heats your soup, chili, mac and cheese or stew to perfect serving temperatures. Powerful induction technology does not require water, ensuring faster heating times, better temperature control and simpler operation. Three sensors monitor food temperatures on the inset, and an indicator light notifies you when the contents need to be stirred, helping to distribute heat evenly and prevent burning. And the unit won't provide heat until an induction-ready inset is placed inside to reduce energy waste. The remote control features four convenient presets or precise temperature settings in °F or °C, depending on your preference, and a locking function prevents accidental temperature changes. This exceptional product comes with a Vollrath induction-ready inset and top contemporary design inset cover, providing everything you need for operation.

- Designed for soup, chili, mac and cheese, stew and more
- Powerful induction heating works quickly to heat food and hold it at safe temperatures
- Dry induction heating means no water is needed for convenient operation
- Digital controls allow precise temperature from 100-190°F in 1 degree increments.
- Digital controls allow precise temperature settings in °F or °C

- Locking function prevents accidental temperature changes
- Presets included for broth- or cream-based soups, chili and mac and cheese for convenience
- Three temperature sensors monitor heat distribution
- Indicator light alerts operator when stirring is needed, preventing burning and reducing waste
- NSF-certified
- Vollrath induction-ready inset (Vollrath® item number 88184) and inset cover (Vollrath item number 47493) included — use of Vollrath induction-ready insets required
- Contemporary lid design allows convenient, quick serving and helps condensation return to the inset to maintain food quality and prevent messes.
- Covers and insets are also sold separately

230-volt 300-watt Mirage® drop-in induction buffet warmer with China plug

Thanks to powerful induction technology, the Mirage drop-in induction buffet warmer by Vollrath is an exceptionally efficient addition to your buffet lineup. The low-wattage design means you can connect this warmer to two units and plug them all into one electrical outlet to streamline and simplify your cord management while minimizing energy waste. The remote control panel offers four power levels, and the fast, reliable heat ensures even temperature distribution for superior results. With the sleek, low-profile design, this warmer looks great on any buffet and blends beautifully with the rest of your serving equipment.

- Induction technology offers fast, reliable, powerful heat
- Connect up to three units together with an interconnect cord and run one power cord to an electrical outlet to streamline your cord management and reduce load capacity
- Four power levels: low, medium, high and chafer preheat
- LED indicator lights on control panel and unit are easy to see
- Sleek low-profile design looks beautiful in any buffet lineup
- Cord storage compartment underneath unit keeps cords organized when not in use
- 6-foot cord with China plug
- NSF-certified
- Designed to work with a Vollrath chafer or serving vessel, or equivalent induction-ready chafer or serving vessel
- Maintains hot serving temperatures in your banquet or catering operation
- 6-foot power cord with China plug

Mirage® Drop-In Induction Buffet Warmers

Maximize your menu offerings without maxing out your electrical capacity with the Mirage® Induction Buffet Warmers. The low wattage warmers can be interconnected to one electrical outlet, which simplifies the planning and management of power cords, access to outlets and load capacity.

- Fewer cords- connect up to 3 units together with an inter-connect cord – and only run one power cord to outlet on wall
- Use for holding/warming of foods for serving - ideal for banquets and catering
- Subtle, low-profile, attractive design coordinates with any serving set-up
- Four power levels - low, medium, high and chafer preheat
- LED indicator lights on control panel and glass
- U.S. units only : At 2.5 Amps each, up to 5 units (at maximum power) can be plugged into a 15 amp circuit. 3 per power cord.
- Convenient storage compartment underneath unit for cords not in use
- Designed to work with one (1) Vollrath chafer or serving vessel, or equivalent induction-ready chafer or serving vessel
- Custom decorative patterns or logos available on 16x16 units. Contact your local Vollrath sales representative for more information.

230-volt 300-watt Mirage® drop-in induction buffet warmer with Australia plug

Thanks to powerful induction technology, the Mirage drop-in induction buffet warmer by Vollrath is an exceptionally efficient addition to your buffet lineup. The low-wattage design means you can connect this warmer to two units and plug them all into one electrical outlet to streamline and simplify your cord management while minimizing energy waste. The remote control panel offers four power levels, and the fast, reliable heat ensures even temperature distribution for superior results. With the sleek, low-profile design, this warmer looks great on any buffet and blends beautifully with the rest of your serving equipment.

- Induction technology offers fast, reliable, powerful heat
- Connect up to three units together with an interconnect cord and run one power cord to an electrical outlet to streamline your cord management and reduce load capacity
- Four power levels: low, medium, high and chafer preheat
- LED indicator lights on control panel and unit are easy to see
- Sleek low-profile design looks beautiful in any buffet lineup
- Cord storage compartment underneath unit keeps cords organized when not in use
- 6-foot cord with Australia plug
- NSF-certified
- Designed to work with a Vollrath chafer or serving vessel, or equivalent induction-ready chafer or serving vessel
- Maintains hot serving temperatures in your banquet or catering operation
- 6-foot power cord with Australia plug

120-volt SerVue™ Touchless Refrigerated Slide-In

Create a fresh food bar experience with the SerVue™ touchless refrigerated slide-in. This self-contained refrigerated cabinet replaces open salad bars in the space of a 4-well drop-in. Ingredients are stored behind lit insulated glass doors, in covered canisters to maintain food-safe temperatures and reduce contaminants and waste. The touchless, self-serve design automatically dispenses predetermined portions, while remaining food is stored in configurable covered canisters to reduce transport. And SerVue™ is beautifully customizable; choose fabricated cabinetry, or arrange back to back for design flexibility.

- Self-contained dispensing and storage containers keep foods fresher, longer
- Well-lit glass doors highlight ingredients' freshness and aesthetics
- Touchless, self-serve design reduces food waste, contamination and mess
- Refrigeration chamber captures cold air to maximize efficiency
- Integrated canisters eliminate serving utensils and breath guards
- 2 sets of sensors enable efficient, simultaneous dispensing
- 8 interchangeable canisters in 2 sizes allow for customization
- Durable stainless steel design includes condensate evaporator; no drain required
- Compact footprint fits in the space of a 4-well drop-in

208- to 240-volt Ultra-Series single-hob drop-in induction range with Schuko plug

Perfect for saut?, sauce and stockpots, the Ultra-Series drop-in induction range by Vollrath is a powerful, versatile choice. With impressive induction technology, this drop-in range is a valuable addition to any lineup and approximately 40 percent more efficient than electric or gas. It features a framed ceramic top that's equally sleek and durable, and the countersunk installation creates a streamlined work surface. The digital remote control offers high-speed temperature adjustments and 100 different power settings for impressive accuracy, while the flat face prevents accidental temperature changes. With continuous-duty induction circuitry, this induction range is made for nonstop cooking.

- Made in the USA
- Framed ceramic top and heavy-duty 18-8 grade stainless steel casing is sleek and durable
- Induction heating offers efficiencies of 90 percent or more, 40 percent more efficient than electric or gas
- Continuous-duty induction circuitry handles nonstop cooking with ease
- Firewall-protected circuitry with oversized fans
- Compact, space-saving design and countersunk installation create a streamlined, easy-to-clean work surface
- 100 power settings for impressive accuracy
- Digital control offers accurate, high-speed temperature adjustments and prevents accidental temperature changes
- "Hot" warning display for safety
- NSF-certified

208- to 240-volt 2900-watt Professional-Series drop-in induction range

The Professional-Series drop-in induction range by Vollrath is a powerful, versatile addition to your commercial kitchen lineup. With impressive induction technology, this drop-in range is a valuable addition to any lineup and approximately 40 percent more efficient than electric or gas. It features a framed ceramic top that's equally sleek and durable, and the countersunk installation creates a streamlined work surface. The digital remote control offers high-speed temperature adjustments and 100 different power or temperature settings for impressive accuracy, while the flat face prevents accidental temperature changes. With continuous-duty induction circuitry, this induction range is made for nonstop cooking.

- Made in the USA
- Framed ceramic top and heavy-duty 18-8-grade stainless steel casing is sleek and durable
- Induction heating offers efficiencies of 90 percent or more, 40 percent more efficient than electric or gas
- Continuous-duty induction circuitry handles nonstop cooking with ease
- Firewall-protected circuitry with oversized fans
- Compact, space-saving design and countersunk installation create a streamlined, easy-to-clean work surface
- 100 power or temperature settings for impressive accuracy
- Digital control offers accurate, high-speed temperature adjustments and prevents accidental temperature changes
- "Hot" warning display for safety
- NSF-certified
- 2-year parts and labor limited warranty
- 6-foot cord and plug
- 3-foot remote control cord
- Versatile design is ideal for saut?, sauce and stockpots

230-volt 650-watt standard Mirage® drop-in induction range with China plug

Save space, time and energy with the Mirage drop-in induction range by Vollrath. With powerful induction technology, this drop-in range is a valuable addition to any lineup and approximately 40 percent more efficient than electric or gas. It features a framed ceramic top that's equally sleek and durable, and the countersunk installation creates a streamlined work surface. The remote dial control offers high-speed power and temperature adjustments, as well as a 1- to 180-minute timer function. The temperature memory allows the range to power up to the last used temperature setting, and the bright LED screen is easy to see. Designed for commercial saut? and warming stations, this induction range promises to outperform.

- 100 percent framed ceramic top is sleek and durable
- Induction heating offers efficiencies of 90 percent or more, 40 percent more efficient than electric or gas
- Countersunk installation creates a streamlined, easy-to-clean work surface
- Dial control for accurate, high-speed temperature adjustments
- 1- to 180-minute timer function
- Temperature memory powers up to last used temperature setting
- Bright LED screen is easy to see
- "Hot" warning display for safety
- 100 percent factory bench-tested for ultimate quality control

Mirage® Standard 1800 Watt Drop-In Induction Ranges, China

Mirage® standard drop-in induction ranges use cutting edge technology to provide efficiencies of 90% or more. They are approximately 40% more efficient than electric or gas ranges.

- Cutting-edge dial control with high-speed power and temperature adjustment - includes 1-180 minute timer function
- Designed for commercial saut? and warming stations
- Countersunk installation creates sleek, easy-to-clean counter work surface
- Bright LED digital readout is easy to see
- Temperature memory - powers up to the last used temperature setting
- Compact and mobile, no maintenance
- 100% framed ceramic top for durability
- 100% factory bench tested for ultimate quality control
- "Hot" warning display for safety
- Padded carrying bag available for safe and convenient transport sold separately
- 6' (183 cm) cord and plug

120-volt 1400-watt standard Mirage® drop-in induction range

Save space, time and energy with the standard Mirage® drop-in induction range by Vollrath. With powerful induction technology, this drop-in range is a valuable addition to any lineup and approximately 40 percent more efficient than electric or gas. It features a framed ceramic top that's equally sleek and durable, and the countersunk installation creates a streamlined work surface. The remote dial control offers high-speed power and temperature adjustments, as well as a 1- to 180-minute timer function. The temperature memory allows the range to power up to the last used temperature setting, and the bright LED screen is easy to see. Designed for commercial saut? and warming stations, this induction range promises to outperform.

- 100 percent framed ceramic top is sleek and durable
- Induction heating offers efficiencies of 90 percent or more, 40 percent more efficient than electric or gas
- Countersunk installation creates a streamlined, easy-to-clean work surface
- Dial control for accurate, high-speed temperature adjustments
- 1- to 180-minute timer function
- Temperature memory powers up to last used temperature setting
- Bright LED screen is easy to see
- "Hot" warning display for safety
- Factory bench-tested for ultimate quality control
- NSF-certified
- 1-year standard limited warranty
- 6-foot cord and plug
- Compact, space-saving design
- Intended for commercial saut? and warming stations

11-quart Mirage® drop-in induction warmer with China plug

The Mirage drop-in induction warmer by Vollrath offers exceptionally efficient heating, simple operation and superior results. Powerful induction technology does not require water, ensuring faster heating times, better temperature control. Three sensors monitor food temperatures on the inset, and an indicator light notifies you when the contents need to be stirred, helping to distribute heat evenly and prevent burning. And the unit won't provide heat until an induction-ready inset is placed inside to reduce energy waste. The remote control features four convenient presets or precise temperature settings in °F or °C, depending on your preference, and a locking function prevents accidental temperature changes. This exceptional product comes with a Vollrath induction-ready inset and top contemporary design inset cover, providing everything you need for operation.

- Designed for soup, chili, mac and cheese, stew and more
- Powerful induction heating works quickly to heat food and hold it at safe temperatures
- Dry induction heating means no water is needed for convenient operation
- Digital controls allow precise temperature settings in °F or °C
- Locking function prevents accidental temperature changes
- Presets included for broth- or cream-based soups, chili and mac and cheese for convenience

- Three temperature sensors monitor heat distribution
- Indicator light alerts operator when stirring is needed, preventing burning and reducing waste
- NSF-certified
- 58-inch bottom exit control cord
- Mounting hardware included
- Vollrath induction-ready inset (Vollrath® item number 88204) and inset cover (Vollrath item number 47494) included — use of Vollrath induction-ready insets required
- Contemporary lid design allows convenient, quick serving and helps condensation return to the inset to maintain food quality and prevent messes.
- Covers and insets are also sold separately

7-quart Mirage® drop-in induction warmer with Australia plug

The Mirage drop-in induction warmer by Vollrath offers exceptionally efficient heating, simple operation and superior results. Powerful induction technology does not require water, ensuring faster heating times, better temperature control. Three sensors monitor food temperatures on the inset, and an indicator light notifies you when the contents need to be stirred, helping to distribute heat evenly and prevent burning. And the unit won't provide heat until an induction-ready inset is placed inside to reduce energy waste. The remote control features four convenient presets or precise temperature settings in °F or °C, depending on your preference, and a locking function prevents accidental temperature changes. This exceptional product comes with a Vollrath induction-ready inset and top contemporary design inset cover, providing everything you need for operation.

- Designed for soup, chili, mac and cheese, stew and more

10 ⅜-inch stainless steel round sink with straight sides

The round sink by Vollrath is sleek and smooth. Thanks to stainless steel construction, this bowl is durable and sure to last for years, and the straight sides ensure quick draining. The self-rimming design and optional top or bottom mounting offer versatility and ease of installation, and the satin finish looks great in any establishment.

- Made in the USA
- One-piece 20-gauge stainless steel construction is durable and long-lasting
- Satin-finish bowl and brushed-finish flange create a sleek look
- Self-rimming design and optional top or bottom mounting ensures easy installation
- Positive drain and straight sides for fast draining
- Mounting brackets included
- 2-inch drain diameter
- Compatible with Vollrath gooseneck faucet (Vollrath® item number 2613)

15" x 15" stainless steel bar sink with strainer and gooseneck faucet

The bar sink by Vollrath is perfect for back- or front-of-house applications. The one-piece drawn stainless steel bowl is exceptionally durable, and the self-rimming design ensures smooth installation. The strainer catches pieces of food and other items, preventing those items from going down the drain, and the gooseneck faucet provides a steady stream of water. The satin-finish bowl and brushed-finish flange create a sleek appearance, making this sink an attractive, dependable option for a variety of establishments.

- Made in the USA
- One-piece heavy-weight 20-gauge drawn stainless steel construction is exceptionally durable
- Self-rimming design for smooth installation
- Satin-finish bowls and brushed-finish flanges create a sleek appearance
- Gooseneck faucet is easy to use and ensures a steady stream
- Strainer catches pieces of food and other items
- Stud mounting — mounting brackets included
- NSF-certified
- 3 ?-inch-diameter positive drain
- Two holes on 4-inch centers

Wall-mount stainless steel hand sink with splash guards

Designed for constant use in your commercial kitchen, the wall-mount hand sink by Vollrath is made to last. The strong stainless steel construction is exceptionally durable, and the high backsplash and splash guards help contain water to protect your walls and prevent slippery puddles. The wall-mount design is easy to install, and the two punched holes are compatible with an electronic, hands-free faucet for ease of use and improved sanitation.

- Made in the USA
- Heavy-weight 20-gauge stainless steel and one-piece drawn-bowl design promise durability and a long life
- Brushed-finish flange is equally sleek and strong
- High backsplash and splash guards help contain water
- NSF-certified
- 2-inch drain diameter
- Two punched holes on 4-inch center
